PANCREATIC EMULSION, FOR THE TREATMENT OF CONSUMPTION. "On the 14th of October, the patient commenced the Pancreatic Emulsion, (Savory & Moore's), in two teaspoonful doses, two hours after dinner and supper. I can only describe its effects by saying that it seemed to work like a charm. The cough grew less, the dreary night perspiration diminished, the respiration grew so much easier that she was able to lie down at night, which for some time had been impossible; the pains grew so much easier that she could dispense with the anodyne draught; the pulse sank gradually from 130 to 70, and grew full and strong. She increased in weight, and grew stout, and her strength returned by degrees."—Paper on "Phthisis Pulmonalis," by Dr. Kinkead, Medical Press and Circular, Feb. 29th, 1868.
