

PART II

CONSERVATION AND USE OF THE FISH STOCKS COVERED BY THE CONVENTION

ARTICLE IV

Application of the Precautionary Approach

1. The members of the Commission, directly and through the Commission, shall apply the precautionary approach, as described in the relevant provisions of the Code of Conduct and/or the 1995 UN Fish Stocks Agreement, for the conservation, management and sustainable use of fish stocks covered by this Convention.
2. In particular, the members of the Commission shall be more cautious when information is uncertain, unreliable or inadequate. The absence of adequate scientific information shall not be used as a reason for postponing or failing to take conservation and management measures.
3. Where the status of target stocks or non-target or associated or dependent species is of concern, the members of the Commission shall subject such stocks and species to enhanced monitoring in order to review their status and the efficacy of conservation and management measures. They shall revise those measures regularly in the light of new scientific information available.

ARTICLE V

Compatibility of Conservation and Management Measures

1. Nothing in this Convention shall prejudice or undermine the sovereignty or sovereign rights of coastal States related to the exploration and exploitation, conservation and management of the living marine resources within areas under their sovereignty or national jurisdiction as provided for in UNCLOS, or the right of all States for their nationals to engage in fishing on the high seas in accordance with UNCLOS.
2. The conservation and management measures established for the high seas and those adopted for areas under national jurisdiction shall be compatible, in order to ensure the conservation and management of the fish stocks covered by this Convention.
