In this work the authors of "The History of Trade Unionism" deal, not with the past, but with the present. They describe, with the systematic detail of the scientific observer, and in the same objective spirit, all the forms of Trade Unionism, Factory Legislation, and other regulations of industry to be found in the British Isles. The whole structure and function of Labour Organisation and Restrictive Legislation in every industry is analysed and criticised in a manner never before attempted. The employer in difficulties with his workman, the trade unionist confronted with a fresh assault upon his standard rate, the politician troubled about a new project for Factory Legislation, the public-spirited citizen concerned as to the real issues of a labour dispute, will find elucidated in this work the very problems on which they are thinking. It is a storehouse of authenticated facts about every branch of the "Labour Question," gathered from six years' personal investigation into every industry in all parts of the kingdom: systematically classified and made accessible by an unusually elaborate Index.

But the Book is more than an Encyclopædia on the Labour Question. Scientific examination of trade union structure reveals, in these thousand self-governing republics, a remarkable evolution in democratic constitutions, which throws light on political problems in a larger sphere. The century-long experience of these working-class organisations affords unique evidence as to the actual working of such expedients as the Referendum, the Initiative, Government by Mass Meeting, Annual Elections, Proportional Representation, Payment of Members, and, generally, the relation between the Citizen-elect, the chosen Representative, and the Executive Officer. The intricate relations of trade with trade have an interesting bearing upon such problems as Local Government, Federation, and Home Rule. Those who regard the participation of a working-class electorate in the affairs of government as the distinctive, if not the dangerous, feature in modern politics, will here find the phenomenon isolated, and may learn how the British workman actually deals with similar issues in his own sphere.

The analysis of the working of Trade Unionism and Factory Legislation in the various industries of the United Kingdom has involved a reconsideration of the conclusions of Political Economy. The authors give a new and original description of the working of industrial competition in the business world of to-day; and they are led to important modifications of the views currently held upon Capital, Interest, Profits, Wages, Women's Labour, the Population Question, Foreign Competition, Free Trade, &c. The latter part of the work is, in fact, a treatise upon Economics.

Finally, it should be stated that the authors, in the Preface, describing their investigations, propound a new view as to the scope and method of Political Science.
