

FIRST AUTO IS RUSTED WRECK IN INDIANAPOLIS

Machine Built by Carriage
Maker and Blacksmith
Denied Patents

GERMAN COMPANY
GETS PRIOR PAPERS

Two Years After Failure
Oil Operator Obtains
Rights

INDIANAPOLIS, Aug. 27.—Time's relentless hand has left only the broken, rust eaten frame of the first gasoline driven vehicle which now lies in the basement of an Indianapolis business house.

The old machine, built by Charles H. Black, an Indianapolis blacksmith

WON'T ROUGE

Here we have "Miss Australia," otherwise known as Miss Beryl Mills, shown as she arrived in San Francisco for a tour of this country.

She won't use rouge or lipstick, but believes face powder is all right. And she can dance the Charleston but won't. Her ambition is to enter the movies.

patents on his engine were denied. Black sought patent papers in 1891, two weeks after the Otto Gas Engine Company of Mannheim, Germany, filed for American protection of a gas engine.

RAN TWENTY YEARS.

Black began operating a forge and wagon plant in Indianapolis in 1866. He lived to see both become universal equipment.

Black began operating a forge and wagon plant in Indianapolis in 1866. He lived to see both become universal equipment. Late in the 80's he became interested in gasoline engine propulsion of vehicles. He eventually perfected an engine which he attached to a type of carriage, known as a runabout. He drove it more than twenty years. Several years ago it was stored in the business house basement by an owner who never reclaimed it. Black first used a kerosene torch in his ignition system, but later procured a cumbersome storage battery. His first spark coil was imported from Germany. It weighed sixteen pounds.

Two years after Black's failure, Elwood Haynes, of Kokomo, an oil operator, who had perfected an automobile in the wagon works of Elmer Apperson, secured patents on his machine. It is today in the Smithsonian Institute at Washington labeled, "First gasoline automobile."

OTHERS FOLLOWED.

Indians became the cradle of the automobile industry through the activities of Haynes and Apperson, and now only Michigan and Wisconsin produce

more cars than the Hoosier state. However, few of the early well known Indiana made cars now are in the market. The Cole, National and Pathfinder no longer are made. The Premier factory makes only cabs. Stutz is out of control of the Stutz plant, and since retiring from that concern, has made the H. C. S.

The Monroes, Lafayette and Maxwell, all Indiana made cars, aren't manufactured now. In place of these pioneers in the automotive field are the Marmon, Stutz and Deussenberg, of Indianapolis; the Studebaker at South Bend; the Elcar at Elkhart; the Davis at Richmond; the Chrysler at New Castle; the Auburn at Auburn, and the Lexington at Connersville.

OTTAWA EXPECTING BYNG BACK SHORTLY

OTTAWA, Aug. 27.—After several weeks at Point au Pic, Quebec, Baron Byng, the Governor-General, is expected back at Government House this week-end.

His Excellency and Lady Byng have been spending a long holiday at the summer resort and necessary official business has been transacted there.

Their Excellencies will spend the next few weeks preparing to vacate Rideau Hall and will sail for England before the end of September. It is not known at present exactly when the new Governor-General, Lord Willingdon, will arrive in Canada. It is customary that the departing Governor and his successor pass each other in mid-sea.

TRIALS OF INDIGESTION

Errors About This Trouble Into Which People Fall.

Many people so far misunderstand the digestive system as to treat it like a machine; neglecting it until it works sluggishly, then irritating it into work again by the use of purgatives. The stomach needs help at all times, but a study of the process of digestion will show that purgatives, as commonly taken, are seldom necessary and often harmful.

To safeguard your digestion the diet must be controlled. Over-eating is always harmful, but one must assimilate enough food to supply the needs of the blood. Remember, the blood has to carry nourishment to all parts of the body and find fuel for its energy.

Hence when the blood becomes weak and fails to do its work, indigestion arises. Therefore the sure remedy for indigestion is to build up the blood. If you suffer from any form of indigestion choose your diet carefully and take wholesome nourishment. Above all, start building up your blood by taking a course of Dr. Williams' Pink Pills. Then under the influence of the new blood supply, your digestive system will respond naturally, your appetite improve and your food will do you good. So begin to improve your digestion by starting to take Dr. Williams' Pink Pills now.

You can get these pills from your druggist or by mail at 80 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

SPEED DURABILITY SAFETY

In the New Rapid Element

SPEEDIRON

(PAT'D and REG'D, 1925)

At last!—after years of experiment and research a perfect rapid iron cooking element has been developed. An element which brings speed, lasting durability and absolute safety to electric cooking—McClary's Speediron!

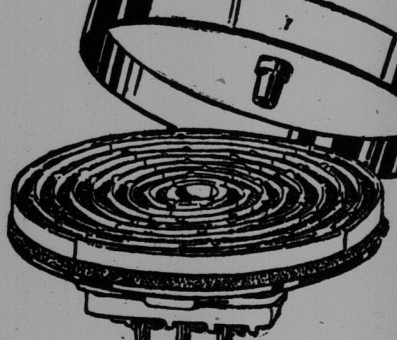

This wonderful, rapid element is as far ahead of all others as electric light is ahead of candle light.

McClary's Speediron is the only protected, removable, repairable element made. It operates on contact heat. This gives it marvelous speed and eliminates waste by radiation which is one of the greatest defects of open elements. And the Speediron is durable. It cannot be injured by liquids boiling over, spilling—or contact with pots and pans. The cast iron surface protects the coils year in and year out—and if the coils by any chance burn out you can have them replaced easily, inexpensively and quickly—while you wait. The element proper lasts as long as the range itself.

Speediron Elements Now on all McClary's Electric Ranges

This great, new electric cooking feature is now on all McClary's Electric Ranges—making it the most efficient, satisfactory range on the market. And you also get the exclusive advantages of McClary's famous porcelain enamel—

ed "fireless cooker" oven—the oven which keeps on cooking even after the current is turned off. The heavily-insulated oven walls retain heat indefinitely—giving splendid baking results and insuring great economy.

Ask your dealer about a McClary's Electric Range. After you've seen him demonstrate the Speediron you'll agree that McClary's is far ahead of any other for economy, speed, strength and general satisfaction.

See the Speediron Element in Action!

McClary's Electric Range

Make your selection at Our Branch Showrooms
McClary Building, Prince William Street
and be assured of permanent service and satisfaction—which is really what you desire and expect.

A FIRST MORTGAGE

for less than 48 p. c. of the valuation of a fireproof building located on St. Catherine Street, Montreal. Interest earned 3 times over—that is the security behind the New Issue of 6½ p. c. 20-year bonds which we will offer publicly on Monday, and furthermore, each bond carries a liberal bonus of common stock with an immediate cash value. Circular on request. 'Phone or wire at our expense.

Compare the assets and earnings of this issue with other current offerings—and the location of this building is in the very heart of Canada's Metropolis—Montreal.
