ANNOUNCED IN LEGISLATURE

Hon. Mr. Grimmer Adds This To
Premier Fleming's Statement in
Support of Aid to Assist Ship-
building Plant—The Sanitarium

Fredericton, March 17.—The resolution respecting the encouragement of shipbuilding in St. John was moved in the house this afternoon.

A new form of taxation appeared today. The premier introduced a short but important bill that gives the government power to tax all railways for provincial purposes.

Hon. Mr. Grimmer introduced a bill to amend New Brunswick elections act. He explained that the bill related to the form of oath taken by a party challenged at the polls and specified the qualifications required by the act to enable him to vote.

Hon. Mr. Fleming said that it had been proposed to interest shipbuilding concerns in the project of establishing a shipbuilding plant at St. John. It went without saying that it would be of the greatest possible advantage not only to St. John but to the province at large to have such a great industry established at that port.

It seemed likely that shipbuilding plant would be established at some convenient point in eastern Canada within the next few years, and once work had begun at one point other places would be precluded for a good many years; therefore, it was important that steps should be taken towards the establishment of a plant at St. John.

Norton Griffiths Co., who were carrying on the construction of the drydock, breakwater and other work at St. John, had made proposals to the city of St. John, municipality of the city and county of St. John, and the government of New Brunswick in regard to a project for the establishment of a shipbuilding plant.

Norton Griffiths Co. had made a proposition that the city and county of St. John and the province should enter into a guarantee of bonds to a certain extent for a considerable period of years. The arrangement was not disposed to enter into any way with the contract of Norton Griffiths Co. with the dominion government to perform certain work at St. John. But the government was alive to the advisability of securing for this province and for St. John a shipbuilding plant and the object of this resolution was to secure an expression of opinion from the legislature which would strengthen the hands of the government in going ahead and dealing with the matter in what they felt to be in the best interests of the province, and a definite plan decided upon to be submitted to the legislature.

It was well within the range of possibilities, however, that in addition to the dry dock and shipbuilding plant there would also be large blast furnaces established alongside of the great industries, and that New Brunswick would be taken the advantage of having one taken from the earth and made into ships, all within the confines of the province. It was not too much to ask and not too much to expect that the government should have the assistance of every member of the house and of the people throughout the entire province in bringing about such a desirable end.

Hon. Mr. Grimmer, in seconding the resolution, said that he was here to endorse all that had been said by the hon. premier in introducing the resolution. He had feared that the premier might forget to mention regarding the strong possibilities for the erection of blast furnaces as one of the group of industries at St. John. He felt free to tell the house and country that the Canada Iron Corporation was seriously considering the removal of their foundries and blast furnaces, an immense plant, from Londonderry, Nova Scotia, to a place where they would be more closely associated with a big shipbuilding industry, and if the land which the premier referred to was reclaimed it would offer excellent opportunities for the work they had in mind.

The Canada Iron Corporation plant was of such immense proportions that the whole province would benefit from its establishment at St. John and it would mean the complete realization of hopes which had been expressed for an iron industry in this province.

Premier Fleming's report was adopted. Mr. Fleming presented a statement of the accounts received and expended on the Jordan Memorial Sanitarium. In addition to the gift of the grounds and existing buildings valued at from \$60,000 to \$80,000 Mrs. Jordan had given extra sums to the extent of \$30,000. The latter amounts included the cost of water tower, fire protection, power house with electric light and heating plant, lighting grounds and buildings, free ward, cost of moving barn and foundations for free ward, screening pavilions, land, heating cottage and beautiful grounds. She also had erected three cottages which on her death will become the property of the sanitarium.

The government is erecting two pavilions and Mrs. Jordan's daughters have contributed the cost of a third pavilion for children. The expenditure to be made by the province will amount to about \$20,000 and when the plant is complete it will represent a total cost of from \$125,000 to \$150,000. Patients will be charged \$1 a day, about half the cost of maintenance, and arrangements may be made for an emergency fund for the benefit of those who cannot afford to pay the full amount.

The house went into committee with Mr. Dickson (Albert) in the chair, and took up consideration of a bill to amend the Game act.

The committee reported progress. The house went into committee with Mr. Perley in the chair, and agreed to bill amending act respecting the police commission in the city of Fredericton and Harland & Miramichi railway county.

LOCAL TOWN PLANNING.
James Crossland of London, passed through St. John yesterday on his way to Calgary. He is associated with Professor Thomas Mawson, one of the principal town planning experts of the world, who has undertaken a town planning scheme for Calgary. Mr. Crossland will secure the necessary data in advance of the arrival of Professor Mawson who will now in five weeks. An effort is being made to arrange to have Professor Mawson stop in St. John for a conference with the local town planning committee and to give a lecture on the subject.

Mr. Crossland pointed out the desirability of undertaking scientific town planning before the city had arrived at a condition where it would cost huge sums to rectify the mistakes which occur when a town is allowed to grow in a haphazard manner.

How a cut
led to 4 years
of suffering

Mr. J. E. Arsenault, a Justice of the Peace and station master at Wellington, on the P. E. I. Ry., says: "Four years ago I fell on a freight truck, sustaining a bad cut on the front of my leg. I thought this would heal, but instead it developed into a bad ulcer, and later into a form of eczema which spread very rapidly and also started on the other leg. Both legs became so swollen and sore that I could only go about my work by having them bandaged."

"I consulted two doctors, and tried all the salves, liniments and lotions I heard of, but instead of getting better I got worse."

How Zam-Buk
cured.

"This was my condition when I got my first box of Zam-Buk. Greatly to my delight that first box gave me relief. I continued to apply it to the sores, and day by day they got better. I could see that at last I had got hold of something which would cure me, and in the end it did."

"It is now over a year since Zam-Buk worked a cure in my case, and there has been no return of the eczema."

Purely herbal in composition, Zam-Buk is a sure cure for all skin diseases, cold sores, chapped hands, mores, blood-poisoning, various sores, piles, ringworm, inflamed patches, burns and bruises. All druggists and stores sell at 50c. box, or post free from Zam-Buk Co., Toronto, for 75c.

FORMER ST. JOHN MAN
47 YEARS A MINISTERRev. W. T. Wilkins Retires—
Was 30 Years in Presbyterian
Church of Trenton, Ont.

The Kingston, Ont., Whig of March 11 contains the following appreciative story of the life of Rev. W. T. Wilkins, retired Presbyterian minister, who is a native of St. John and a brother of Robert J. Wilkins of the customs staff.

In the active ministry for forty-seven years. Such is the record of Rev. W. T. Wilkins, B. A., clerk of the presbytery of Kingston, who, at the last session of the presbytery, asked for permission to retire from the ministry. For nearly thirty years he has been the pastor of St. Andrew's church at Trenton.

As clerk of the presbytery he has rendered able service, and his work has been greatly appreciated by all the members. Mr. Wilkins, apart from church work, has always taken a keen interest in the progress of Trenton, and is an ex-chairman of that body. Broadminded, with a clear conception of citizenship, he is esteemed by everyone with whom he is acquainted. His friends are legion, for he is well known all over Canada.

Mr. Wilkins has long had a great interest in the work of the Masonic order, and a few years ago he had conferred upon him the honor of grand chaplain for Canada, a position which he ably filled.

A few years ago he was also honored by the synod of Kingston and Toronto. He was appointed to the position of clerk of the presbytery in 1881.

Mr. Wilkins was born at St. John, N. B., on July 15th, 1843, and graduated from the University of New Brunswick in 1863. He studied theology at the University of Kingston, and at Princeton, N. J., where he was ordained in 1868. He was minister of St. Paul's church, Trenton, N. S., for several years, and afterwards of St. Andrew's church, Stratford, Ont., prior to his appointment at Trenton.

Alberta Elections in May.
Edmonton, Alta., March 17.—The general elections for Alberta will be held in May.

A LITTLE ANXIOUS FOR
THE YOUNG TREES SET OUT
IN THE ST. JOHN STREETSH. E. Gould's Report to the
Arboriculture Society

ANNUAL MEETING TODAY

Few of The Trees Destroyed by Boys.
More by Horses—Financial Report
Shows Trifling Sum to Start New
Year

The annual meeting of the St. John Arboriculture Society is being held in the Board of Trade rooms this afternoon. The report of H. E. Gould, forester for the society is as follows:

The undersigned would beg to report that, agreeable to your instructions, trees were planted in May 1912 as follows:—Thirty-nine Norway maples in Elliot Row, eighty-three Norway maples in Broad street, ten Norway maples in Alexandria street, twelve elms in King street, West St. John, thirty-four elms in Peter street, thirty-two Queen Square, West St. John.

You also replaced dead and damaged trees as follows: thirteen elms Waterloo street, seven elms Duke street, six maples Elm street, seven elms King street West St. John, one Maple Mecklenburg street, two maples Wall street, three elms Wall street.

Of the twenty-three elms ten were destroyed by horses, thirteen natural causes. Of the ten maples eight were destroyed by horses, two natural causes.

The Market Square was sodded, seeded and broken ground repaired. In November, as instructed by you, damaged and dead trees were replaced as follows: three elms Peter street, three elms Elm street, sixteen elms Waterloo street, one elm Duke street. Of these twelve were destroyed by horses, one by boys, ten by natural causes. Five maples were planted in Elliot row, four in Elm street, two in Piddock street, one in Garden street triangle. Of these four in Elm street were destroyed maliciously, two in Piddock street by horses, four in Elliot Row by horses, one in Elliot Row and one in Garden street by natural causes.

Several broken guards were repaired, and all trees tied for winter.

On the Market Square forty-five Golden Elder shrubs were planted, in beds prepared for the purpose, and the grass top dressed with compost.

The winter of 1912-1913 has been a most extraordinary one from the point of view of high temperature, and lack of snow, and its effect on young trees cannot but be a cause of anxiety, as this is a critical year to many of them. However the loss so far from natural causes in the past has been so slight, as to be negligible, and we can only trust that a normal spring will follow the abnormal winter.

Your forester wishes to thank the commission of public works, the road engineer, and the chairman of streets for the many courtesies extended; also the many public spirited citizens who have donated the trees from horses, etc., and have watered and cared for them when necessary. That this the all important feature in your report, the results on certain streets demonstrate.

The finance report shows receipts of \$300 in members' fees, \$31.20 from the sale of tickets, \$300 from the city. Add \$288.32 balance from last year and there is a total of \$919.52.

The expenditures were: for trees, shrubs and labor \$604.92; printing \$15.26; Page Wire Fence Co. \$172; collecting \$33.25; sundries \$33.91, a total of \$910.38, leaving a balance of \$14.14.

Contract your hands, your legs the muscles of your back, raise up your chest, stiffen your neck, then turn it vigorously slowly, from side to side, or bend it backward and forward. This will keep you from taking cold. One need never take cold when sitting still. You can make your muscles work just as hard when sitting down as when walking about, and it may be more convenient.

DR. FRIEDMANN'S ANSWER TO HIS
CRITICS IN HIS OWN HANDWRITING

*Ich bin auf dem Schlaricht-
felde und bin sicher
dass ich unsere Sache
siegeln wird. Ich bleibe
ich und Kampfe etc.*

Dr. Friedrich Franz Friedmann, the Berlin tuberculosis expert, now in America to demonstrate the value of what he says is a cure for consumption, has been subjected to bitter criticism in New York. The medical profession of that city, it is charged by Friedmann's friends, put many obstacles in his way, interfering with his plans to make a thorough public test of his serum.

Dr. Friedmann was asked for a statement, and this is his answer, written in German in his own hand. Translated, it reads as follows:

"I am on the field of battle, and I am sure that our cause will win. Here I stay and fight!"

FEEL SHAKY, BILIOUS, HEADACHY,
OR CONSTIPATED? TAKE CASCARETS

Sick headaches! Always trace them to lazy liver, delayed, fermenting food in the bowels or a sick stomach. Poisonous, constipated matter, gases and bile generated in the bowels, instead of being carried out of the system, is reabsorbed into the blood. When this poison reaches the delicate brain tissue it causes congestion and that dull, sickening headache.

Cascarets remove the cause by stimulating the liver, making the bile and constipation poison move on and out of the bowels. The effect is almost instantaneous. Ladies whose sensitive organisms are especially prone to sick headaches, need not suffer, for they can be quickly cured by Cascarets. One taken tonight will straighten you out by morning—a pleasant box will keep your head clear, stomach sweet, liver and bowels regular and make you feel bright and cheerful for months. Children need Cascarets, too—they love them because they taste good and never grip.

IN PARLIAMENT

Sir Wilfrid Given Rousing Reception—
The Charges Against Mr.
Corderre

Ottawa, March 17.—When Sir Wilfrid Laurier made his appearance in the house tonight after his partial recovery from an attack of bronchitis, he was given a great demonstration, and the cheering by the Liberals lasted several minutes.

Alphonse Verrette received eight communications from representatives of different branches of trades and labor unions extending congratulations upon his demand for free goods and British fair play and assuring him that the labor interests were heartily behind his parliamentary champion.

Secretary of State, Corderre was today charged by Mr. Gauthier, of St. Hyacinthe, with having organized persecution and after the election with having paid \$100 each to two and appointed to a public office a third person who threatened exposure. Affidavits were put in from the persons who were put in from the same men by Minister of Justice, Deberry, who said the men were evidently perjurers and the case should be left to the courts.

Mr. Gauthier read the affidavit that two men had received \$100 each for personal and another had been given a government job. He also read affidavits from Thaneur Marcell and G. S. Jarry, of Montreal, the former a Nationalist-Conservative, showing that the statements in the former affidavits were true, and telling of conferences with Messrs. Corderre and Nantel at Ottawa regarding the matter. Mr.

From a Man
Who Knows

From the Magdalen Islands, away down among the fogs of the Gulf of St. Lawrence, comes a letter from a man who knows that Dr. Chase's Ointment is not only a relief but also a positive cure for protruding piles.

"Too many make the mistake of stopping this treatment when relief is obtained, when by persistence they could be entirely cured."

Mr. Joseph Meuse, Grand Entry, Magdalen Islands, writes: "After using Dr. Chase's Ointment as a treatment for piles I must say that it did not only relieve me but has effected a cure. I had protruding piles for a number of years. Dr. Chase's Ointment cured me and I have no return of the ailment. You may publish this statement, so that it may be the means of helping other sufferers."

Surgical operations, with all the pain and risk are unnecessary, for Dr. Chase's Ointment is a proven cure for every form of piles.

SAVES ELDERLY PEOPLE FROM
KIDNEY AND BLADDER MISERIESSleep Disturbing Bladder Weaknesses, Backache, Stiff Joints,
Rheumatic Pains Disappear After Few Doses are Taken

While people along in years are naturally more subject to weak kidneys, they can avoid the tortures of backache, and rheumatism, and be saved the annoyance of getting up at night with disagreeable bladder disorders, for the new discovery, Croxone, quickly relieves the most severe and obstinate cases.

Croxone cures these conditions because it removes the cause. It is the most wonderful remedy ever devised for ridding the system of uric acid. It is entirely different from all other remedies. It is not like anything else ever used for the purpose. Croxone makes the kidneys filter the blood and sift out all the poisonous acids and waste matter that cause these troubles.

It works right in and cleans out the stopped-up, inactive kidneys like water does a sponge, dissolves, and drives out every particle of uric acid and other

poisonous impurities that lodge in the joints and muscles and cause rheumatism. It neutralizes the uric acid so it no longer irritates the bladder, overcomes unnecessary breaking of sleep and restores the kidneys and bladder to health and strength.

It matters not how long you have suffered, how old you are, or what else you have used. The very principle of Croxone is such that it is practically impossible to take it into the human system without results. There is nothing else on earth like it. It starts to work the minute you take it, and relieves you the first time you use it, and all your misery and suffering soon disappear. You can secure an original package of Croxone at trifling cost from any first class druggist. All druggists are authorized to personally return the purchase price if it fails in a single case.

Most ladies would resent any imputation of personal carelessness and neglect. And yet very many women permit their natural hair to become ab dull, brittle and listless that it looks no better than the artificial.

This is as unfortunate as it is unnecessary. Half that is unsightly or thin may usually be attributed to the malicious activity of the dandruff germ. Two vicious germ burrows down into the hair follicle, shortly destroying its life. The hair becomes dead, loose and finally drops out.

There is a remedy sold by all druggists, the intelligent use of which will kill the dandruff germ. It also cleanses the scalp of all accumulations and makes the hair shine with the luster of life and beauty. That remedy is Newbro's Herpicide, the Original Dandruff Germ Destroyer.

Applications may be obtained at the best barber shops and hair dressing parlors. The Herpicide Co., Dept. R., Detroit, Mich., will send a nice sample and booklet to any address upon receipt of 10c. in postage or silver.

Newbro's Herpicide in 50c. and \$1.00 sizes is sold by all dealers who guarantee it to do all that is claimed. If you are not satisfied your money will be refunded. E. Clinton Brown, Special Agent.

Service Means Success

You can't question that Marshall Field & Co. are the largest retailers of dry goods in the world.

You might question how their enormous business was obtained. Was it obtained by selling merchandise cheap? No! Thousands of Field's competitors sell merchandise cheap.

Was it obtained by selling merchandise at low prices? No! Was it obtained by selling merchandise at a shop where merchandise can be depended upon? No! Was it because they were always reliable? No! Was it because every transaction must be satisfactory to the customer? Again, no.

Field has many competitors doing the identical thing. Was it because their store was better located, more elegantly furnished? Not on your life. Field never had a monopoly on this. Was it on account of service? What's that?

Service. Say it again. Service, that's it—service. Field built his business by service, and service for Field spelled S-U-C-C-E-S-S.

If service meant the combination of dependability, reliability, and right prices, it also included promptness, courtesy, a beautiful store, and that the customers were always right—"not he."

The same thing applies to the Neal method of treating the drink habit. Is the success of our fifty-nine institutes due to the fact that we are the only institute of its kind that treats the drink habit? No!

There are scores of public institutions who claim to do the same thing. Dr. Neal made his success, after 12 years, by proving to the public, that he could cure and did cure thousands of people of the drink habit, before he ever opened a branch institute. St. John has been curing people for the past eight months with the same success, many scores cured during that time. True right, terms made agreeable, guarantee solid, efficient physicians and trained nurses. Special arrangements made for charitable cases.
