Heffelfinger, the famous guard at Yale in the '90's, now a prosperous business man of the West, recently told a story of a countryman who, with his wife, had come down to New Haven the danger has not yet disappeared. undoubtedly command by far the greater portion of western traffic. It would make the distance from Duluth to Montreal one-half of the distance to New York; it would be a come down to New Haven to see the "footballers."

The rural one had walked around the stalwart Heffelfinger with an air of critical curiosity, much as he might have surveyed a horse be was about to stalwart to New York; it would be a come down to New Haven to started today for Paris, where it is the danger has not yet disappeared. The firm attitude of the authorities has, however, undeceived the natives in their belief that they could with have surveyed a horse be was about to impunity preach the natural applicadistance to New York; it would have surveyed a horse he was about to make practically ocean ports of Fort William, Duluth, and even Chicago; and by reason of the shortened haul and of the lessened handling, ain't he?" would reduce the cost of transportation would reduce the cost of transportation of grain possibly three and a half cents per bushel. It would not only claim all the business now passing through the countryman; "it do beat all how foot-Soo, but would capture much from ball do develop 'em!"
"He certainly is a fine young man!" Lake Michigan and Lake Huron ports said the wife. which now goes elsewhere. It would have an advantage over all other routes such as would enable it to compete successfully even were the canal tolls to.

said the wife.

"Man!" observed the countryman.

"Sary, one of them professors told me hisself that this feller's in his fourth year! I wonder what they feed 'em on!"

the canal there would be developed a water supply of 500,000 horse power, almost equal to what is available at Niegara and this will available at Niagara, and this will certainly be regarded as a probable source of income should the government consider the canal proposition. Sir Wilfrid Laurier ily has said that he would go ahead with this work immediately if he had the money. If this is a correct report of the premier's feelings, it may safely laugh?"

The man told a second story, and the novelist sat unmoved, even gloomy.

"It was a very good story," chided the novelist's mentor. "Why, didn't you laugh?" be assumed that within the next year or two parliament will be asked to approve of the scheme. It will have no direct effect on St. John; it will not injure any St. Lawrence port, but will A man who was angry the other day threw his watch down the cellar stairs. build up an enormous direct trade from He should have let it run down.

St. John has a very fine high school, with as cheap and unkempt approaches
as any hundred dollar shack in the
city. If the board of trustees could

Why should we fiercely flout it?
No matter what the weather is
We cannot do without it. manage to remove the rickety boards, misnamed steps, which lead to the building and get rid of the mud which fills the path, they would earn the Although to my flannels I cling, gratitude of all who now risk their And I would that my tongue could lives while attending evening meetings in the institution. The building inspector might also take a look at the lighting of the school, for if a fire broke out at night while the assembly hall is filled, there would almost certainly be loss of life in the pitchy dark-

ness in all the stairways and halls. Winston Churchill and the London Daily Mail as to whether Sir Robert Bond, after a passionate presentation of Newfoundland's case, and upon being refused any relief, unceremoniously left the conference chamber declaring that Britain's policy was a gross humiliation and an insult to the colonies. Whether Premier Bond said such a thing or not, he should not have said it. A man in his position has no right to so far forget himself, to lower his dignity by acting like a naughty child who goes out and slams the door.

whirled right back to the passengers.

These little points indicate a looseness which does not add to the popularity of the service.

In accordance with general instructions, 3,096 professors of dancing, members of the academy, discreetly questioned their 1,097,503 pupils, married or about to marry, as to how they fell Could anything be more expressive in love with their spouses or spouses to be. The results of the inquiry show

Frond stated that she came her to pur-chase a farm at Gagetown. She found From these statistics it would appear

THE CRISIS IN INDIA MET WITH FIRMNESS.

One Instance in Which the British Government Has Acted With Strength and Intelligence—Hindu Leaders Misled by Radical Sentiments—Tide Turning Towards the Unionists

LONDON, Ma 20.—It is a pleasure to to be able to speak in terms of commendation, at least in one of respect of the policy of the present British Government. They have shown qualities of strength and intelligence in meeting the serious crisis caused by the seditionary outbreak in India which commands the approval of the entire country. There are some exceptions of course, even in the House of Commons, where certain doctrinaries, notorious for their swashbuckling democracy pretended that their dearest principles had been outraged by the high-handed banishment without trial of prominent inciters to rebellion. A of prominent inciters to rebellion. A TELOPMENT.

Telopment majority of even the Radi al members, however, understand the necessity of the suspension of the ordinary form of law in dealing with

ON THE HORNS OF A DILEMMA. Such is the present dilemma of the fomenters of rebellion in India. The effect upon them scarcely makes for peace and tranquility either now or in the future. It will have a change in the Indian point of view of British character, and will not make éasier the difficult problem of the future Government of the Indian Empira.

The week has brought some signs of exasperation from the leaders of the government as fresh causes of embarrassment and weakness appeared. The colonial conference, which began with invitations to a closer union and with invitations to a closer union and co-operation, ended with protests. Then came the sharrest popular rebake ever flung in the face of a British gov inment by an outraged, disgusted public. The Wimbeldon majority indicated a complete revulsion of English public sentiment in the past eighteen months. sentiment in the past eighteen months. The Radical organs attempt to argue that it is only an impression of British overwhelming opposition to woman suffrage, but this is childish evasion of the larger significance of the vote. It was said more than six months ago in these despatches that Great Britain would turn out the Campbell-Ban man government if it got a cha No sane observer any longer do
