

REGULATIONS

OF THE

MONTREAL LIGHT INFANTRY.

1.—The *Corps* will consist of six Companies, each of 75 Men, besides a Bugler, and due complement of Officers and non-commissioned Officers.

2.—It will be the duty of each Captain of a Company, aided by his Subalterns and non-commissioned Officers, to raise his Company, and keep it at its proper strength.

3.—The standard of height for Recruits will be five feet six inches, and every Recruit, before his enrolment shall take effect, must have been approved by the Commanding Officer of the *Corps*, on report of the Sergeant-Major, confirmed (if there be any doubt as to health or habits) by the Surgeon or Assistant-Surgeon.

4.—Any non-commissioned Officer, Private or Bugler, desiring to leave the *Corps*, will be required to give at least one month's notice of such wish, with a good and sufficient reason therefor, in order to entitle him to his discharge.

5.—Until such time as the organization of the *Corps* shall have been completed, by the final enrolment of its full strength, it shall be competent to the Commanding Officer to allow such part of the strength of each Company as he may deem requisite, to be provisionally enrolled.

6.—Men provisionally enrolled will be liable to be replaced at any time by Recruits offering for final enrolment, subject only to a right of preference (if they themselves shall offer) for final enrolment.

7.—All Officers and non-commissioned Officers, and all finally enrolled Privates, will be held to furnish themselves with uniforms, and to appear therein at all musters when so ordered. The Uniform of the *Corps* (subject only to such modification as the law or any duly issued Regimental Order may indicate) will be that of a Light Infantry Regiment of the Line, with Blue facings.

8.—The Sergeant-Major will receive such pay as the Commanding Officer, with the consent of a majority of the Officers, may allow, from the Regimental Fund; and whenever the organization of the *Corps* shall be sufficiently advanced, a Band may be organized at the cost of such Regimental Fund,—should the Commanding Officer and a majority of the Officers so decide. All other incidental expenses of the *Corps*, as the same shall be established from time to time by the Commanding Officer with the consent of a majority of the Officers, will also be borne upon the Regimental Fund.

9.—The Regimental Fund will be in charge of the Paymaster, and will be raised from time to time by Assessments, to be apportioned by him *in advance* upon the Officers, according to what would be their respective rates of pay, if under pay,—so as to meet (as nearly as may be) the authorised expenses to become chargeable thereon.
