HOW TO CURE TOOTHACHE.

M. Dunogier in the Independence Medical gives the following as an instantaneous cure for toothache proceeding from carious teeth: Phenol, crystallized, two parts; essential oil of lemon, two parts; alcohol, ten parts. Mix. Immerse a little pledget of lint cotton in the solution and carry it to the bottom if possible of the cavity and press it in. In cases where for any reason it is not possible to get a pledget into the cavity convey a minute drop of the liquid thither, using a hypodermic syringe for the purpose.
