The  
**KODAK**  
 Method of Tank Development has succeeded, not merely because of its convenience, but because it gives better results.

Tank development is to-day in general use for plates as well as for films. Professional photographers are using our tank method of development because it gives them better results than they can get by hand. When the professional, with his superior skill, can obtain better work by the use of the Tank, there's no argument left in favor of hand development for the amateur—and the cost is but a trifle—one dollar to seven-fifty covers the range.  
 "Tank Development" booklet free at the dealers or by mail.
