

A Terrible Pain in the Stomach Cured

Disappeared
the
Second
Time He
had
Worn
Dr.
MacDonald's
BELT

January 24th, 1905.
DEAR SIR—I have now worn your Electric Belt for 30 days and my health has improved wonderfully. Every day for one or two hours before meals I had a most terrible pain in my stomach, which disappeared the second time I had worn your Belt, and has not returned since. I have gained 11 pounds in weight. Yours respectfully, ROBERT MACDONALD, Gravelle, Y. T.

DR. MACDONALD:

lous curative properties of my belt for 30 days. This is the strongest test that any cure could have.

DR. J. Q. MACDONALD, 8 Blouy Street, MONTREAL, QUE.

Sufferer, why don't you give my marvellous cure a trial? A trial will cost you nothing. After 30 days, unless your case is one of the most stubborn, you will be almost well, indeed in 10 or 15 days' time you will experience great relief.

Disease cannot exist in a body that has been strengthened, built up and fed by this marvellous curative Electricity. That is why I offer you a free trial. I want to make you well. I want to banish Rheumatism, Weakness, Nervous Disorders, Indigestion, Liver and Kidney Troubles, Scrofula, Constipation, Eczema, Lumbago and many other complaints from the system.

I will cure every case I take in hand. There are specific quantities and peculiar properties about the Electricity as generated and applied by my method, which acts as a tremendous healing and curative force which simply overwhelms disease and ill health.

My fascinating book on the cure of disease should be in everyone's hands. It is free. Write for it, stating your case fully.

Remember I offer to every responsible person a free trial of the marvellous curative properties of my belt for 30 days. This is the strongest test that any cure could have.

AYRSHIRE BULLS

Two 13-months-old bulls, choice individuals, from grand milking cows, at very much reduced prices. Also an extra lot of last fall bull calves, away down in price if taken soon.

W. W. BALLANTYNE, Stratford, Ont.
Springbrook Ayrshires are heavy milkers and high testers. For sale: Three bulls, 9 months old; 2 bull calves, dropped in January last; also females of all ages.

W. F. STEPHEN,
P. O. box 101, Huntingdon, Que.
MAPLE CLOVE DAIRY AND STOCK FARM
Breeders of Oldenale Horses, Ayrshire Cattle, Berkshire and Tamworth Pigs. Young stock for sale at all times.
R. W. Walker, Utica P. O., Ont.
Farm adjoins Central Experimental Farm.

Ayrshire Bulls for Sale—One 2-year-old, one 1-year-old, one 10 months old. All bred from long-teated, deep milking stock. Also Shropshire sheep, Berkshire pigs, B. Orpingtons and B. P. Rocks. Address:
A. R. YUILL, Carleton Place, Ont.

HOLSTEIN-FRIESIANS at RIDGEDALE FARM
6 bull calves for sale, from 3 to 9 months old, bred from rich milking strains. Special prices to quick buyers. Port Perry, G. T. R., and Myrtle, C. P. R. Shipping Stations, Ontario County. o R. W. Walker, Utica P. O., Ont.

HOLSTEINS and TAMWORTHS
One choice yearling bull, excellent quality and breeding. Will be sold at a bargain to a quick buyer; also a few bull calves. One boar ready for service. Young pigs ready to wean. Write at once for bargains.
A. C. HALLMAN,
Waterloo Co., Breslau, Ont.

Maple Glen Holsteins—Select bull calves from producing dams now for sale. Herd now includes one of the best females ever imported from Holland, a cow bred to Canary Mercedes' son, and one to Mercedes' son. Secure the best.
C. J. GILROY & SON, Glen Ruell, Ont.

IMPERIAL STOCK FARM HOLSTEINS.
For Sale: Four bull calves, 5 months old, whose sire's three nearest dams average 21.79 lbs. of butter in 7 days. Also young bulls by the sire of first-prize herd at London.
W. H. SIMMONS, New Durham, Ont.

We want you to remember that HOLSTEIN COWS

owned by me (formerly at Brookbank Stock Farm, Currie's) were all sorts of honors in milk tests at Toronto, Ottawa and Guelph (5 years), and among many other prizes in the show-ring, including sweepstakes at Toronto and Pan-American in competition with the best in the world. Our herd is always improving. We have now 5 cows whose official test average 22.4 lbs. butter in 7 days, 10 cows whose official test average 20.4 lbs. butter in 7 days, 15 G yrs. and up whose official test average 19.6 lbs. butter in 7 days, 10 G and 4 yrs. whose official test average 17 lbs. butter in 7 days, 10 heifers (average age 23 mos.) whose official test average 11 lbs. butter in 7 days. That is our idea of a dairy herd, and the kind of stock I handle. A few good young bulls, 1 to 13 mos., for sale.

CHAS. RICH,
Aurora Stock Farm, Tilsonburg, Ont.

Lyndale Holsteins

Over 50 head to choose from. A number of young cows and heifers for sale. Six young bulls from 5 to 11 months old.

BROWN BROS., Lyn, Ont.

WOODBINE HOLSTEINS

Herd headed by Sir Mechthilde Pouch, absolutely the best official-backed sire in Canada. Dam Ianthe Jewel Mechthilde, 25.8 pounds butter in seven days. Champion cow of Canada over all breeds. Sire's dam, Aaltje Pouch 4th, holds the world's largest two-day public test record—8.6 pounds butter. Young bulls of the choicest quality for sale.
Ayr, C. P. R.
Paris, G. T. R. A. Kennedy, Ayr, Ont.

Maple Grove Holsteins—In official tests they for 3-year-old, 1st 3-year-old and 1st under 3 years old. Special inducements are offered in high-class bulls to quick purchasers. For particulars address,
H. BOUTWELL, Canal, Ont.

QUESTIONS AND ANSWERS. Miscellaneous.

MILK PAINT.

Can some reader tell how to paint out-buildings with milk instead of paint oil and what preparations it takes? I know of one building that has stood for twenty years painted with milk, but do not know how it was prepared. G. B.

WATERPROOFING COTTON—PEANUTS

G. O., Alvinston, Ont., wishes to know how to waterproof cotton; also information as to peanut culture.

Ans.—For question re waterproofing, see answer to R. S., elsewhere in this issue. As to the peanuts, we do not feel confident that it would be wise to risk much time on them in Ontario. We understand a few have been grown at the O. A. C. at Guelph. You might write there for further information.

FATALITY IN COWS

Have had two cows die recently without apparently any cause whatever. They both gave full flow of milk until day before death, when they reduced to about one pound. Is it a case of poison, or sunstroke, and would stagnant water affect them? G. T.

Ans.—It is impossible from this information to form any idea of the nature or cause of the malady. Only a post-mortem by a competent person could reveal the secret, if, indeed, anyone could. Death may have been due to the causes you mention.

A BUDGET OF QUESTIONS

A subscriber, Whitfield, Ont., writes: Would you kindly answer the following questions:

1. Is celery a healthy vegetable to eat? Give me some information how to cultivate and grow it successfully.
2. I sow radishes in good soil every year, and when they begin to grow nicely, small white worms begin to work in them so that we cannot use the radish at all. Could you give me a preventive?
3. Is lettuce a healthy vegetable to eat?
4. I cannot keep black ants out of my pantry or cupboard. Can you tell me how to get rid of them?

Ans.—1. Celery is considered very wholesome, and especially beneficial in nervous or rheumatic troubles. As the seed is very slow to germinate, it should be started early in the spring, say in March, in a hotbed or in boxes in the house. Transplant later to a cold frame, leaving the plantlets there just long enough to send out a new set of roots; then transplant to the open ground. The old system of trenching is not now generally used, the plants being placed on the level. Moist, peaty soil is best, but celery does very well in well-enriched, sandy loam, or in any good garden soil. Set the plants from six inches to a foot apart in the rows, and when well grown blanch. For the early varieties this is usually done by means of boards set edgewise each side of the rows, and drawn almost together at the top, where they are secured by wooden cleats; but for the late varieties, banking up with earth may be substituted. From two to four weeks are usually sufficient for blanching purposes. Celery needs plenty of water, and this precaution must not be forgotten throughout its entire growing season.

2. Perhaps you have used fresh manure on the radish bed, or have planted them too many years in the same place. It is best not to manure the soil for radishes, but to use soil that has been put in good order for some other crop in a preceding year. If this is done, and plenty of water given to ensure rapid growth there will be very little trouble from maggots.

3. Lettuce is very wholesome to the majority of people, although a few find it rather indigestible. It is supposed to have a very soothing effect on the nerves.

4. Directions for disposing of ants were given on page 965 of last issue. When possible to find the hill, any of these methods will be found effective. If the hill cannot be found, you may obtain temporary relief by moistening a small sponge and sprinkling it with sugar. The sponge will soon be full of the ants, when it may be dropped into hot water and the process repeated.

Boo Spavin

Lameness resembles bone spavin, but the bunch is in front of the true hock joint, a little to the inner side, and is soft and yielding, hardening sometimes as the case grows old.
Fleming's Spavin Cure (Liquid)
Is a special remedy for the soft and semi-solid bunches that make horses lame—Boo Spavin, Thoroughpin, Splint, Curb, Capped Hock, etc. It isn't a liniment to bathe the part, nor is it a simple blister. It is a remedy unlike any other—doesn't irritate and can't be limited. Easy to use, only a little required, cures the lameness, takes the bunch, leaves no scar. Money back if it ever fails. Write for Free Horse Book before ordering. It tells all about this remedy, and tells what to do for blemishes of the hard and bony kind.
FLEMING BROS., Chemists,
45 Front Street, West, Toronto, Can.

BARREN COW CURE

makes any animal under 10 years old breed, or refund money. Given in feed twice a day. Particulars from
L. F. SELLER, Morrisburg, Ont.
