

## Summer School

**July 3.**

Last July, just two weeks after the opening of our Summer session, we had 45 teachers in attendance. Four held the degree of B.A. Thirty had First Class certificates.

One teacher was learning how to present the subject of writing. Two men were preparing to teach Shorthand. A high school principal wanted to be able to take a more intelligent interest in the commercial work. A number were preparing for the Commercial Specialists' examination. Some were preparing to step out into business.

These teachers found us prepared to give them thorough instruction. In the Commercial Specialists' course, for example, we had five men giving a five weeks' course of lectures covering every subject in the course.

This year you will find us better prepared than ever. We have made a specialty of courses for teachers by bringing our work up to the best possible standards. If you want the degree of C.A., or the Certificate of Commercial Specialists we can do the work for you. We are just as glad to handle a single subject for you, such as teaching you how to write a good hand, for example.

Get interested and let us send you particulars.
