Britains Wheat and Meat Supply is Such that There Should be No Famine During the Present War.

LONDON, Aug. 5—The authorities are taking all possible steps to allay public anxiety in regard to food supplies, and to prevent unjustifiable attempts to artificially raise prices. The Them Office to day issued an official statement to the effect that in addition to the four months "supply of wheat actually in the country,, or being harvested there were large consignments of wheat now on the way here, much of which was already near British shores.

There was no conceivable circumstance, it was said in which a wheat famine could arise and ac-cordingly fear of a scarcity was groundless. The situation regard-

ing meat was not less satisfactory.
"Normal killings of home stock supply 60 per cent, of our annual consumption" reads the statement. and we are not necessarily depe ent upon foreign exports for the balance of our supplies as in case of emergency it could be provid-ed by slaughtering a larger pro-portion of our own stock."

"This contingency cannot arise in the present circumstance. There is now an exceptionally large supply of foreign meat in cold storage and heavy consignments are on the way to our shores. Therefore, no justification exists for any rise in the prices of bread or meat."
