City Engineer Rendell

Files Report

DOCUMENT

VALUABLE

Bridg At the meeting of the council last night City Engine r Rendell filed hi-first annual report covering the work atten performed during the year by his do partment and containing a number of valua le suggestions regarding the future. It is an increasing documen, and is reproduced herewish complete: son irom

Dawson, Dec. 31st, 1902. To his worship the mayor and city council of Dawson :--

Gen.l.m.en,-I herewith submit my or fir first annual report for the year endared Ecamber 31st, 1902, togethe. Real with such recommendations as -1 artm think ad isable for your honorabl. body to consider, pertaining to the en_i.eering and public works depart bes of

You are aware that on taking over the affairs of the city, I had no plans or date of any kind to work from, consequently great difficulties were met with in locating the main cul verts and drains, in older to carry ties. Respectfully submitted, that threatened damage by flooding.

The greater part of the box drains were found to be utterly unfit for use many of them were broken and off grade. In some places I found th water did not go through the boxes but had cut charnels through th muck and made outlets in places fa from the main boxes, causing much damage to streets and property. This I attribute to the way in which the boxes were constructed and laid.

There are about fifteen miles o streets open to traffic, and in fairly good condition.

In my opinion drainage water from the hills around Dawson will give very little trouble, if any, as suffici ent drains have been constructed dur ing the past season to take care of said water. To put a large drain around the base of the hill, would not n my opinion be expedient owing to tour and formation of th ground. It would be a very expen sive and unsatisfactory undertaking The necessity of such a' costly drain being put in the past summer, along the east side of the N. C. Company's taail, east of Dawson.

The following is the principal departmental work done during the

1. Establishing bench marks or the following streets : First, Second, Third, Fourth, Fifth, Sixth, Seventh and Eight avenues, Judge, George, Albert, Steele, Duke, York, King, Queen, Princess, Harper, Turner, Dugas, Craig and Bridge streets. 2. Plans, profiles and specifications
