CLOGGING THE PIPES

A SENSIBLE SERMON ON HOUSEHOLD SANITATION.

Some Suggestions' About the Plumbing and the Care That Should Be Exercised In the Avoidance Both of Expense and Disease.

Nowadays the plumber and his bill are your true household specters. Like other specters, careful common sense will put them to rout and confusion nine times in ten. Wise men have been studying this subject ever so long to devise plumbing that would take care of itself, but they have not yet suc-Neither are they likely to without a revolution in mechanics whereby the tendency of fluids always to seek their own level may be eliminated and other things as wonderful brought to pass. So long as knowledge remains nearly static so long will it behoove every housemistress to look well to the usage of her pipes and her

A bit of rag or even string, a burnt match, a wisp of hair, seems a very little thing, one that the pipes can carry off with no possible hurt, but the rag, by hanging over the bend of the trap, may serve as a siphon to take away the water seal, which is all that stands between the household and unlimited sewer gas. And the rag may keep on doing it for weeks and weeks until deadly disease is rampant.

A string snarled and twisted may work the same ill. The match end, of course, ought to float away harmless, but is very much likelier to be caught in some eddy of the flush water, jammed into a crevice and there to take to itself other solid particles until they form a clot both offensive and danger-

As for hair, there is no end to the harm it harbors. A wisp quickly forms itself into a sort of strainer, catching and holding all that passes. Aside from that, it has a trick of lodging in the most inconvenient places, catching upon the least roughness inside the pipe and staying there until by accre-

tion it has clogged the whole space Hair has special affinity for bits of soap. Solid soap, by the way, should never be sent down the pipes. Very strong soapsuds even is objectionable unless you follow it with a flood of clean water, preferably hot water.

Coffee grounds and tea leaves either clog a pipe very soon or else, if the flush water prevents that, wear it A farmer must be the bona through quickly, partly by mechanical come in contact with grease from pipes your whole pipe system, making neces-sary costly and inconvenient unclog-

can, emptied once a week in winter and in summer every three days. All sorts of refuse fat should go into it, even the scrapings from plates and dishes. Greasy water, as from boiling hams or corned beef, should be allowed to cool thoroughly, then have the grease carefully taken off before it goes down the pipes. Skillets and frying pans ought to be filled with very hot sods water and let stand half an hour before washing. This gives time for the soda to partly saponify the grease and keep it from sticking to the pipe

or caking on top of the trap.
In scouring faucets be careful to keep the scouring grit out of the joints. Even the finest particles cut away screw threads turning many times s day. After scouring also take care to let the water run at least a minute before catching any for use. In washing sandy vegetables, as spinach, tur-nips, potatoes, use a big pan and drain off the dirty water, so the sand may be caught. Even a spoonful of sand going down a pipe will cut and wear it more than a hogshead of water.

Milky water is one of the hardest things to manage. Even a small quantity daily fouls pipes unless the milky water is followed by a flushing of sods water moderately strong, with a lime-water flush about every three days. The limewater is made more effective by adding salt to it. Sea salt is best. Put a lump as big as the fist in an earthen or wooden vessel along with twice the bulk of quicklime and cover with four gallons of hot water. Stir well and let settle. Pour the clear liquid down the pipes and follow it in half an hour with a flush of clear wa-ter boiling hot. Thus every kind of a sink may be kept sweet and fresh.

ON CRUTCHES.

Even if you are obliged to use crutches Dr. Hall's Rheumatic Cure can fix you up. This was the experience of John J. Peters, Sharbot Lake, Ont. He suffered with rheumatism in his legs (sciatica) for a year and had to creep about on crutches all the time. Fortunately he tried Dr. Hall's remedy and it only took three bottles to cure him completely. This great blood purifier is put up in bottles containing ten days treatment. What is her secret ? She is at the middle age of life, when many women are worn, wasted and faded, and yet time has only ripened her charms. The secret of this matrimonial health and beauty may be told in the brief phrase, Dr. Pierce's Favorite Prescription. The general health of wo-man is so intimately related to the local health of the delicate womanly organs, that where these are disease the whole body must suffer. "Favorite Prescription" dries the debillitating drains, heals ulceration and inflammation, cures female weakness and imparts to the delicate female organs patental vices and vital male organs natural vigor and vitality. Women who have lost their health and their beauty have been made "ro-bust and rosy cheeked" by the use of this marvelous medicine.

After dinner all retired to the parlors, where David Hamil took the chair, and the following address was read by Mr. Robert Taylor and was read by Mr. Robert Taylor and was accompanied by an appropriate presentation on behalf of the family made by the eldest son, Henry. There were also a number of choice gifts by friends of the family.
