No separate check has been kept Look at the tongue, mother! If coated, your little one's stomach, liver and bowels need cleansing at once. When peevish, cross, listless, doesn't sleep, eat or act naturally, or is feverish, stomach sour, breath bad; has sore throat, diarrhees, full of cold, give a teaspoonful of "California Syrup of Figs," and in a few hours all the foul, constipated waste, undigested food and sour bile gently moves out of its little bowels without griping, and you have a well, playful child again. Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which coatains full directions for bables, children of all ages and for grown-ups. of the Princess Patricias' losses, but

# **FATRIOTISM** and **PRODUCTION**

Looking at the situation in even its most favorable light, there will be a demand for food that the world will find great difficulty in supplying." HON. MARTIN BURRELL, Minister of Agriculture.

Great Britain Needs Food

VEGETABLE growers can render a real service to the Empire by increasing the production of vegetables, especially those that can readily be stored and transported. The war in Europe has devastated thousands of vegetable-producing acres and made it difficult for Britain to-obtain her usual supplies. Vegetable growers are urged to select carefully the best varieties of seed and plant in properly cultivated and fertilized soil. Work hand in hand with the agricultural specialists of both the Canadian Department of Agriculture and your Provincial Department. POTATOES There is no farm **POULTRY and EGGS** 

rop the yield of which, perhaps, can be increased so much as potatoes. Potatoes have been grown in a small plot at the rate of over 700 bushels per acre at the Central Experimental Farm, Ottawa. So great is the difference in the yield of varieties that while one gave this large yield, another, under same conditions, gave but 154 bushels. It will thus be seen how important it is to plant a productive variety.

BEANS The fact that beans have been a good price for a number of years, and also that they are of very great food value, should encourage every person who can to grow beans. Western market prices will not be influenced this year by foreign beans, and for that reason we should produce a bumper crop. The world will need them.

To the farmer's wife, the Government makes a special appeal. In many cases the vegetable garden and the poultry are largely under her direct management. Anything that she can do to increase production will be so much ald given to the Empire.

> Canadian Department of Agriculture, Ottawa, Canada

Remember that live stock is the only basis for a prosperous agriculture. You are farming, not speculating

It has been said that European farmers farm better than they know; Canadian and American farmers not as well as they know. Let us this year live up to what we know. Let our contribution to the "Patriotism and Production" campaign be bumper crops.

POULTRY and EGGS

Up to the commencement of the year, Great Britain imported from Belgium, France, Russia, Germany and Austria-Hungary poultry to the value of \$3,000,000 per year and eggs amounting to 136,000,000 doz. Canada in 1914 imported \$200,000 more poultry than she exported.and imported \$2 000,000 more eggs than exported. Canada needs 1,500,000 emore hens, averaging 100 eggs per year, to supply the home demand before having any eggs for export. The average egg yield per hen in Canada is but 80 eggs per year, which is very low. Careful selection, feeding and housing could in a few years bring the average up to 180 eggs per hen per year. It would be a profitable thing to strive for.

LIVE STOCK Breeding stock are today Canada's most valuable asset. The one outstanding feature of the world's farming is that there will soon be a great shortage of meat supplies. Save your breeding stock. Plan to increase your live stock. Europe and the United States, as well as Canada, will pay higher prices for beef, mutton, and bacon in the very near future. Do not sacrifice now.

and this opportunity are not for farmers only. Residents of towns and cities can help the Empire by growing vegetables on small plots or raising chickens in their back yards. City Councils, Boards of Trade, and other organizations can help by arranging for the cultivation of vacant lots, which will relieve the unemployment situation at the same time. Those at home have a duty to perform as well as those in the firing line. From the interest manifested by the people in the "Patriotism and Production" announcements, we feel sure every one has good intentions. What we urge is that these good intentions be carried into action. Get busy. Every extra bushel you grow means that much more for export.
