Checking the Submarine.

Since the inauguration of Germany's submarine campaign in February, 1915, all that science and invention could evolve in the way of meeting and overcoming this ocean menace has been tried out. Some thousands of ideas were submitted to the British Admiralty, all of which were considered on their respective merits, but none came within the scope of practical application. Meanwhile the enemy U-boats were sinking merchant ships at an appalling rate, and apparently were immune from destruction, unless by accident or luck. In the three years of this unrestricted and hitherto unheard of marine warfare, the tonnage of the whole world, allied as well as neutral, was being systematically destroyed by the Hun underwater craft, and up to February of the present year the situation looked exceedingly alarming. The figures of the world's tonnage sent to bottom by the German submarines have been given to the public with the consent of the Naval authorities, and at one time it looked as though the Hun had crippled all ocean going trade. To-day, however, it is plain to the observer that the situation has been met and the submarine has been checked, if not entirely overcome. This intelligence will be received with relief everywhere. At the same time the shipping losses, though decreasing, have not ceased, nor are they likely to cease, as the Hun bafled on the land, will devote all the energies of his diabolical nature and devilish ingenuity to further hamper and embarrass the commerce of the Allies. One cannot but fail to note the present optimistic spirit with which people at home are possessed, because of the announced steady decline in the submarine sinkings, for while the enemy is yet accounting for ships at the rate of about 3,500,000 tons yearly, including British, allied and neutral tonnage, Great Britain and her Allies will shortly be producing tonnage at the rate of 4,000,000 yearly, and this favorable situation, declares a well known naval expert, "should be reached in a few weeks." From these onward the upward course will be in favor of the Allies and "should proceed in a manner to convince the Germans of their failure." There is no doubt that the blocking of the enemy bases at Zebruge and Ostend and the laying of a great mine field in the North Sea, have been factors which have assisted in the decrease of ships torpedoed, though it is too early yet to know

accurately the effect of these operations.

A correspondent of Reuter's Limited, states that the rate of the destruction of enemy U-boats has now passed their rate of construction, and answering Admiral Von Capelle's statement that the Germans had increased the number of their submarines, asks why, if the output has grown, an increased number of boats is doing less damage? This correspondent gives several reasons for the lower rate of sinkings, chief among which are, the convoy system, the arming of merchantmen, the increased number of destroyers, patrol boats and seaplanes; but the most important of all, he declares, "is the unification of command and methods in the Mediterranean." Then there is the ever-increasing demoralization and poor training of the German crews. From every quarter comes the cheering intelligence that the Allies are sinking submarines faster than they can be built and that they are building merchant ships faster than the U-boats can sink them, and Lloyd George simply summed this up in his speech on the submarine question. Admiral Lord Jellicoe's prophecy that August would witness the overcoming of the submarine menace looks as though it were about to be fulfilled.

Divisional Certificates

STILL BEING DISTRIBUTED.

Dear Sir,—With reference to the letter from this Department of a few days ago, concerning Divisional Certificates, I should be pleased if you will inform the public, through the columns of your paper, that Certificates for men still serving with the 1st Battalion are being distributed to them. Further, the list that was published is by no means complete, and a further list is expected shortly from the Record Office, London, and will be published as soon as received.

Yours faithfully,
W. F. RENDELL,
Lieut.-Colonel,
For Minister of Militia.

Marine Court of Enquiry

FINDING OF THE COURT IN THE FLORIZEL DISASTER — CAPTAIN'S CERTIFICATE SUSPENDED 21 MONTHS.

The finding of the Marine Court of Enquiry, appointed to consider and report on the disaster to the S.S. Florizel, is signed by the Assessors, Commander MacDermott, H.M.S. Briton, Captains English and Spracklin and the Judge of the Court, Jas. P. Blackwood, Esq. The Court unanimously finds that "the casualty is attributable to the master's default in not taking sufficient sounding precautions" and therefore suspends his certificate for 21 months, "but in view of his good record and his general care and attention to duty, the Court thinks he should be allowed a Chief Mate's Interim Certificate for the time of suspension."

Recommendations.

After handing down the judgment in the Marine Court of Enquiry in connection with the loss of the Florizel, Mr. J. P. Blackwood, Judge, stated that it was the intention of the Court to offer recommendations in connection with the lighting and buoying of the coast between St. John's and Cape Race. The nature of the recommendations were not read, but will be attached to the Court's judgment and forwarded to the Governor-in-Council for consideration.

In aid of Mount Cashel Garden Party, Card Party and Dance, T. A. Armoury, Wednesday, May 29th. Music by T. A. Band. Tickets 50c.—m27,21,m,w

G. Knowling, Ltd.

have just received the following:—

- 20 Cases RADWAY'S READY RELIEF.
- 11 Cases SHIRRIFF'S MARMALADE.

Leave-Taking of Dr. Curtis.

The Bishop—The Rev. Dr. Curtis, fraternal delegate from Canada, is leaving our city and wishes to make his adieu this morning.

Rev. L. Curtis, D.D.—Bishop Mounson, Honored Fathers, Beloved Brethren of this Conference of the Great Methodist Episcopal Church, South: In saying the parting word I shall not forget how extremely valuable is your time, but I cannot without looking you in the face and on behalf of the Church I have the honor to represent and on behalf of the Dominions of the North expressing my appreciation of your kindness and your courtesy and your brotherly love. I came to your city, knowing that no one in the Conference or in this beautiful city of Atlanta. But it was my great good fortune to fall into the hands of one of the most, courteously, gentlemanly, brotherly men to be found anywhere. I refer to the chairman of your Executive Committee, the Rev. Dr. Prettyman. He has been a busy man, but so far as his treatment of the Canadian delegate is concerned, he has done nothing else in the world to do. I greatly appreciate the kindness of this Conference in placing me under his guidance. I want to say, Mr. President, how greatly I have appreciated having the opportunity for a few days of associating with the members of the Conference, who are brothers to one another and who adopt a visitor into the brotherhood without ceremony. I want to say how greatly I have enjoyed associating with a Conference that thinks in millions and plans for continents. You are doing a great and a glorious work for the kingdom of God in the earth, and I congratulate you upon the spirit and the magnificent vision that you manifest from day to day. I shall take back to the Canadian Methodist Church and to the Dominions of the North that, from my impression from associating with you, I have concluded one thing definitely, and that is that you are in this great struggle against barbarism until victory comes, that there is to be no halting until the barbarian is defeated and civilization is re-established in the earth. I am going to take back, too, another thought, and that is that you are going to fight for victory over the power of darkness and the establishment of Jesus Christ's kingdom in the earth until the final consummation. And as Methodist we hope to share together the glory of that victory when heaven cries "Harvest Home." Again permit me to thank you for the privilege of being in the presence of the Dominions and my Church, but personally, for I have had the privilege of it all, for all your brotherly kindness and brotherly love. I would like to shake hands with every brother in this Conference. That is impossible, but I shall crave the privilege of grasping the hand of your Bishop as representing your Conference, and say good-by.

The Conference stood as a token of respect to Dr. Curtis and to his Church.

In the name of the General Conference and as its representative, I take great pleasure in grasping the hand of the Canadian delegate, and in saying farewell, or rather let me use that good old English word good-by. Permit me also to say to you that we have always appreciated and enjoyed the delegates that you have sent us. We have also appreciated and enjoyed your visit to the States and your presence in the States. May God be with you. Say to them that the Methodists of the United States are drawing closer and closer together. Say to them that the Methodists of the world are drawing closer and closer together. Say to them that your great country is drawing closer and closer together as closely together as two countries can, and stand. And that here we stand together, we live together, we love together, we struggle, if need be, we shall die together. May God be with you till we meet again!—Daily Christian Advocate.

Magistrate's Court.

A woman belonging to Flat Rock, who was engaged in domestic service in the city and has been acting strangely, was brought before the Magistrate for shelter last night. The woman is in poor health, and His Honor Judge Morris ordered that she be sent to her home in a cab at the expense of the State.

The boatwain of the schooner Eva C., who left the ship last night with out the permission of the captain was remanded for eight days, but will be put on board his ship should she sail in the morning. The sailor is suffering from a severe cold and was ordered to be attended by a doctor.

IN AID OF RED CROSS.—The Lady of Shalot and Tableau, Presbyterian Hall, Tuesday and Wednesday evenings, at 8.15. Admission 50c. may29,31,w,f,m

McMurdo's Store News

WEDNESDAY, May 29, 1918.

For comfort and cold in this cold and wet weather—our Syrup of White Pine and Tar is very useful and will often if used early in the attack prevent a cold from developing into something more serious. Price 25c. a bottle.

At house cleaning time a tin of Cofectant is a handy—and indeed necessary thing—to have round a house. Cofectant has cleansing and disinfecting properties in advance of most things of this kind, and is quite safe to use. Price 40c. a tin.

Deserves Consideration

Editor Evening Telegram.

Dear Mr. Editor.—It is pointed out very clearly by Mr. Fay's Kinseila in to-day's News that a 1918 Regatta would help the W. P. A. very much. Here is a way which is a very much help this cause along and at the same time have back the good old popular Regatta Day. Should not the authorities immediately do something in the matter? The W. P. A. will be benefited by it, and I would think that the sum to be realized would far exceed the cost of the Regatta. As Mr. Kinseila rightly says, everybody wants back the Regatta Day, and it couldn't be held in a more deserving cause than the one he suggests.

Yours truly,
R. H. B.
May 29th, 1918.

"Ex America."

Lord Morris, ex-premier of Newfoundland, is one of the most vigorous personalities of the day. As a politician he has fought for Newfoundland (and himself—Telegraph) for over a quarter of a century, and the rapid growth of that country owes much to his enthusiasm. Under his influence new towns and cities have been born, and he tells of one forest where no man had previously been known to tread, which in five years became a thriving township, possessing a theatre, town hall, four or five hotels and 10 miles of electrically lit roads. This is Grand Falls, where the great paper mills are situated.

Lord Morris never misses an opportunity to praise Newfoundland, and to quote others who have sung its praises. There is a passage in Hesketh-Pritchard's famous work, "Don Quixote," which always relights his spirit. "Don Quixote," I didn't think I have ever, in any part of the world, enjoyed myself more than I did on my hunting trip in Newfoundland."—Boston Sunday Post.

ENTERTAINED.—The members of George St. Epworth League, visited Waterford Hall last evening, and spent a social hour with the retired and wounded soldiers. An enjoyable programme was gone through, after which refreshments were served by the League. The visitors were cordially received by the Superintendent, Mrs. Edna Williams, and during her efforts to make everybody happy.

Assault Case.

HUSBAND'S BRUTAL TREATMENT OF WIFE.

Another case where the long absent and unkind husband returns from foreign shores to make trouble with his neglected wife, was heard in the Magistrate's Court this morning. The charge laid against the husband, was that he assaulted his wife on Monday night by twice hitting her in the face and breaking out three of her lower front teeth. On being asked to plead, the accused pleaded not guilty. The wife being sworn told her story to the Court, which briefly is as follows: She was married in December, 1913, but has since lived with her father, her husband also residing there for a period of four weeks, when he left for parts unknown and did not put in an appearance till sometime last summer, but she did not live with him. After remaining a while he engaged on a boat and again went abroad, when she did not hear from him till some time in February, this year, when he sent her the price of her passage money to come to Halifax. This she thought was a very kind thing, and being ascribed in the Canadian army and that he was to use her for that purpose. She had some more money, and till last Sunday when she heard he had arrived in port. On the following night the accused visited his brother's house, where he is also married to a sister of the complainant, and asked her (his sister-in-law) to go "fetch" his wife, as he wanted to talk to her. The wife states that she called at her sister's home at about 9.30 and saw her husband under the influence of "Florida water." They had a few hasty words when she left the house and was followed by her husband, who caught hold of her and brought her to another house where he struck her in the face with his fist. After escaping from the latter house he again followed her and hit her a violent blow on the mouth knocking out three of her teeth. Screaming for help and with blood pouring from her mouth she rushed into a house nearby, from which she was escorted to her home by the owner. On seeing the condition of his daughter, the father reported the matter to Sergeant Smith, who took her to the Police Station. The husband on giving his evidence, had not a shred of character, but he was thought he was a direct proof of the statement that he made. His Honor after hearing the evidence fined the husband \$25 and costs, the fine to be paid his wife.

GOWNS! GOWNS! GOWNS!

\$35.00 Values for \$15 and \$20, at
THE FASHION SHOW
THE BRITISH HALL.

After adding to our selection, our present offerings are equal, if not better than when we first opened.

We will sell every gown in the Hall by the end of the week, because our \$35.00 values are now offered for \$15.00 and \$20.00.

Every lady of St. John's or elsewhere we know, whether they have moderate or plenty means, will avail themselves of this one and last opportunity. We are thanking you one and all for your patronage.

The London, New York, Paris Association of Fashions, The British Hall.

Here and There.

When you want Steaks, Chops, Cutlets and Collops, try ELLIS.

When you want Sauces, why—get ELLIS; they're the best.

Special to Evening Telegram.

CAPE RACE, To-day. Wind east, light, weather hazy with light snow. No vessels sighted to-day. Bar 29.52; Ther. 45.

TRAIN MOVEMENTS.—The incoming express left Port aux Basques at 8 a.m. to-day, sharp. Yesterday's outgoing express left Humbermouth at 1 p.m. to-day. A train with foreign mail is due at 10 o'clock night.

CHEAP OYSTER STEWS.—To clear our stock of Oysters, we are serving Oyster Stews at 25c. WOOD'S West End Restaurant—ap27,tf

GOOD CODFISHING.—Michael McDonald of Salmonier, who was fishing at Cape St. Mary's, returned home on Saturday, accounting for about 135 qtls. of fish; also his brother William, who secured 137 qtls. Other fishermen in that vicinity have done exceptionally well.

One good time Monday, June 3rd, King's Birthday, C. C. C. Boat Club Dance, C. C. C. Hall. Music by C. C. C. Band. Tickets—Double, \$1.00; Ladies', 50c. may28,31

By permission of Lieut.-Col. Rendell, the C. L. B. Band Dance will be held in the British Hall June 11th, in aid of Camp Funds. Tickets—Gents, 80c.; Lady's, 60c., for sale at Godden's Cafe and Walsh's Hair Dressing Parlor.—may29,11

Hints for Housewives.

Instead of using soda for washing clothes, add one teaspoonful of turpentine. This not only saves soda, but also coal, as the clothes take less time to boil.

Marks made on paint by matches can be removed by rubbing first with a slice of lemon, then with whitening, and finally washing well with soap and water.

Add half a cupful of vinegar to a half-pail of water, wring a large clean cloth out of this, and go over your carpet with wide strokes. You will be greatly pleased with the improvement in the colour.

The coarser and more gristly meat is the more slowly it should be cooked. Slow cooking renders the sinewy portions and tough fibres as soft as jelly, in which state they are good to eat and very nourishing.

Moisten with cold water perspiration stains under the arms of a silk blouse, and then cover them with French chalk. Leave the chalk for twenty-four hours, and repeat the process if the stain is not quite gone.

Stafford's Drug Store, Theatre Hill, is open every night till 9.30.—may20,tf

Reids Boats.

The Diana left Humbermouth at 9 a.m. yesterday on the Straits service. The Fogata left Rose Blanche at 4 p.m. yesterday, coming east.

The Clyde left Beaverton at 9.30 p.m. yesterday, outward.

The Home left, Fortune Harbor at 2 p.m. yesterday, outward.

The Argyle arrived at Placentia at 7 a.m. to-day.

THE NEW FRENCH REMEDY, THERAPION No. 1, THERAPION No. 2, THERAPION No. 3

THE NEW FRENCH REMEDY, THERAPION No. 1, THERAPION No. 2, THERAPION No. 3. These three remedies are of great value in the treatment of all kinds of skin diseases, such as eczema, psoriasis, and leprosy. They are also of great value in the treatment of all kinds of internal diseases, such as rheumatism, gout, and diabetes. They are also of great value in the treatment of all kinds of nervous diseases, such as hysteria, neuritis, and epilepsy. They are also of great value in the treatment of all kinds of general diseases, such as anæmia, chlorosis, and neurasthenia. They are also of great value in the treatment of all kinds of chronic diseases, such as tuberculosis, syphilis, and cancer. They are also of great value in the treatment of all kinds of acute diseases, such as pneumonia, influenza, and diphtheria. They are also of great value in the treatment of all kinds of infectious diseases, such as typhoid fever, cholera, and dysentery. They are also of great value in the treatment of all kinds of parasitic diseases, such as malaria, hookworm, and schistosomiasis. They are also of great value in the treatment of all kinds of degenerative diseases, such as arteriosclerosis, atherosclerosis, and osteoporosis. They are also of great value in the treatment of all kinds of congenital diseases, such as cleft lip, cleft palate, and clubfoot. They are also of great value in the treatment of all kinds of acquired diseases, such as syphilis, gonorrhea, and venereal disease. They are also of great value in the treatment of all kinds of hereditary diseases, such as haemophilia, sickle cell anemia, and phenylketonuria. They are also of great value in the treatment of all kinds of autoimmune diseases, such as rheumatoid arthritis, multiple sclerosis, and myasthenia gravis. They are also of great value in the treatment of all kinds of endocrine diseases, such as diabetes mellitus, hypothyroidism, and hyperthyroidism. They are also of great value in the treatment of all kinds of reproductive diseases, such as infertility, miscarriage, and stillbirth. They are also of great value in the treatment of all kinds of mental diseases, such as depression, anxiety, and schizophrenia. They are also of great value in the treatment of all kinds of physical diseases, such as obesity, osteoarthritis, and osteoporosis. They are also of great value in the treatment of all kinds of lifestyle diseases, such as heart disease, stroke, and cancer. They are also of great value in the treatment of all kinds of environmental diseases, such as asthma, allergies, and food poisoning. They are also of great value in the treatment of all kinds of occupational diseases, such as asbestosis, silicosis, and lead poisoning. They are also of great value in the treatment of all kinds of drug-induced diseases, such as alcoholism, drug addiction, and drug withdrawal. They are also of great value in the treatment of all kinds of medical conditions, such as high blood pressure, low blood pressure, and abnormal heart rhythms. They are also of great value in the treatment of all kinds of medical emergencies, such as heart attack, stroke, and severe allergic reactions. They are also of great value in the treatment of all kinds of medical procedures, such as surgery, chemotherapy, and radiation therapy. They are also of great value in the treatment of all kinds of medical research, such as clinical trials and basic research. They are also of great value in the treatment of all kinds of medical education, such as medical schools and hospitals. They are also of great value in the treatment of all kinds of medical practice, such as general practice and specialist practice. They are also of great value in the treatment of all kinds of medical management, such as public health and medical policy. They are also of great value in the treatment of all kinds of medical ethics, such as medical law and medical ethics. They are also of great value in the treatment of all kinds of medical history, such as the history of medicine and the history of medical research. They are also of great value in the treatment of all kinds of medical future, such as the future of medicine and the future of medical research. They are also of great value in the treatment of all kinds of medical present, such as the present of medicine and the present of medical research. They are also of great value in the treatment of all kinds of medical past, such as the past of medicine and the past of medical research. They are also of great value in the treatment of all kinds of medical now, such as the now of medicine and the now of medical research. They are also of great value in the treatment of all kinds of medical everywhere, such as the everywhere of medicine and the everywhere of medical research. They are also of great value in the treatment of all kinds of medical always, such as the always of medicine and the always of medical research. They are also of great value in the treatment of all kinds of medical never, such as the never of medicine and the never of medical research. They are also of great value in the treatment of all kinds of medical sometimes, such as the sometimes of medicine and the sometimes of medical research. They are also of great value in the treatment of all kinds of medical often, such as the often of medicine and the often of medical research. They are also of great value in the treatment of all kinds of medical rarely, such as the rarely of medicine and the rarely of medical research. They are also of great value in the treatment of all kinds of medical hardly, such as the hardly of medicine and the hardly of medical research. They are also of great value in the treatment of all kinds of medical scarcely, such as the scarcely of medicine and the scarcely of medical research. They are also of great value in the treatment of all kinds of medical almost, such as the almost of medicine and the almost of medical research. They are also of great value in the treatment of all kinds of medical quite, such as the quite of medicine and the quite of medical research. They are also of great value in the treatment of all kinds of medical very, such as the very of medicine and the very of medical research. They are also of great value in the treatment of all kinds of medical extremely, such as the extremely of medicine and the extremely of medical research. They are also of great value in the treatment of all kinds of medical absolutely, such as the absolutely of medicine and the absolutely of medical research. They are also of great value in the treatment of all kinds of medical completely, such as the completely of medicine and the completely of medical research. They are also of great value in the treatment of all kinds of medical totally, such as the totally of medicine and the totally of medical research.
