

Shears like Grandmother's

Seventy years ago money was hard to get, every penny was precious. Grandmother bought Wiss Shears, knowing they were worth their price. All through her long and busy life, they gave good service. They cut the dainty muslins for her girls; they cut the coarse, heavy woollens for her men—year after year—year after year.

Get a pair of 6½-inch Wiss Sewing Shears. They are extremely light and without question the finest that can be made. \$1.75 a pair.

Gymnastic Association.

HELD ENJOYABLE DANCE AT THE GRENELL HALL LAST NIGHT.

Upwards of 100 couples attended the Terra Nova Gymnastic Club Dance in Grenfell Hall last night. The affair was most successful, and was enjoyed by all. The Prince's Orchestra was in attendance and rendered very pleasing selections, several of the items being heartily enjoyed. During the interval the Ladies' Branch of the Association served supper, after which dancing was resumed. The elimination dance proved a very popular item, the prizes, which were large Kewpies dressed at gymnastics, were won by Mrs. A. E.

Holmes and Mr. George Hutchings. The evening was voted a great success and did not terminate until early this morning.

Our Water Supply.

Editor Evening Telegram.

Dear Sir.—Many complaints have been made by householders the past few weeks, about the water supply from Windsor Lake. The opinions expressed are that the water is contaminated by some deleterious matter and that when drawn from the tap it gives such a foul odor that one is left in doubt whether in its raw, unboiled state it is fit to drink or not. This week we have heard of several citizens who became seriously ill of dysentery by drinking the water and who have had good reason to be convinced that there is some foreign matter in it that is injurious to health. They have refrained from drinking the water now unless it is first boiled. Others who have learned of their illness have taken warning and now drink it only after being boiled. After the spring freshets and the melting of the snow and ice the rivers and streams that feed the Lake, no doubt, precipitate a large quantity of decayed vegetable matter into Windsor Lake, and possibly this may account for the bad taste and odor of the water, or there may be a source of contamination in the reservoir. In any case we think that the affair is sufficiently serious to warrant the City Council in having the water analyzed. In an unboiled state it is either injurious to one's health, or it is not. An analysis ought to determine this. If there is no danger in drinking it, unboiled the citizens should have that assurance from the Mayor through the Public Analyst. If, on the other hand, it is in its primitive state, the public should be informed so that all could take the precaution of either filtering or boiling it. It is a well-known fact that the water of Windsor Lake is at its maximum height in the spring. The margin of the Lake from ten to fifteen feet that has been high and dry all the rest of the year is then submerged. The public would like to have the assurance of the City Fathers that there is nothing on that margin now under water to cause contamination. The possibility of having bad water would be eliminated by having a proper filtering system at the intake like in other cities; but the cost of this, we are informed, would be so great and our water supply is so much better and purer than that of other cities for the greater part of the time, that the City Council would hardly be warranted in installing such an expensive system. A pronouncement from the Mayor on this particular case would, we assure him, be welcomed by the public.

Yours truly,

St. John's, May 31, 1923.
Note.—Mr. D. J. Davies, the Government Analyst, has now made a report on the water taken from Windsor Lake and assures the public that there is no cause for alarm.—Ed.

Nfld. Football League.

GENERAL MEETING TO-MORROW NIGHT.

The adjourned annual meeting of the Newfoundland Football League takes place in the office of the President to-morrow night. At this meeting the date of the opening games will be decided and the fixtures will be drawn, while all other arrangements regarding the forthcoming season's play will be finalized. Mr. Wm. Call is now busily engaged in placing the field in readiness. The fence surrounding St. George's Field needs considerable repairs, the work at the end will be rushed to completion. It is understood that eight Clubs will participate in the League series this year, the Highlanders having decided to drop out. The applications of the Junior Football and Baseball League, for the use of the field will be considered. The various football teams are most enthusiastic over the approaching games, good hard practice has been indulged in, and a successful season's soccer is assured all fans.

Harbor Grace Notes.

Things have been mighty quiet here since the stir of elections have subsided, and although the time is drawing very near for those who intend to prosecute the fishery this season to be making their departure from our shores, even in this particular there is but little talk of it. We understand there are a few fishermen taking passage by the S. S. Portia to engage in their summer's work.

Hon. A. W. Piccott's schooner "Change," Snow master, was docked during the last few days.

Mr. Jack Stapleton leaves by the Portia for Conche, where he will be employed for several months.

The S. S. Portia is due here to-morrow, Thursday, on her way North.

Messrs. Harry Stevenson and William Regular went out by Tuesday's express enroute to Montreal to seek employment there.

Mr. Wilfred Parsons, of Everett, having spent a fortnight here at his old home and amongst his friends, left town again on Thursday last. He will visit his sister, Mrs. (Rev.) Davis, at Curling, Bay of Islands, before returning to the U.S.A. again.

Mrs. Catharine Gordon, who has spent the last eighteen months with her son, Mr. John Gordon, of Halifax, returned by the last trip of the Roanoke and came to town by Thursday night's train.

Mrs. Dickenson and little boy, who spent several months here, with her parents, Mr. and Mrs. Uriah Downes, left on Tuesday last for Parsboro, N.S., to join her husband there.

CITIZEN.

Mr. James Cron, who had been confined to his home several days through illness, is now able to get out again, his many friends are glad to note.

Mr. Allan Parsons, son of Mr. and Mrs. William Parsons, of the east end, left town by Tuesday's express enroute to Toronto, to seek a position in the big city. Allan has a wide circle of friends here who regret his departure, but trust that good luck will follow him in the land of the Maple Leaf.

Mr. and Mrs. Moses Sacrey of the South Side, left on Saturday week for St. John's enroute to Newport, Rhode Island, where they will in future make their home with their son, Capt. Secrey, who has made good there. Their friends wish them a happy future in their new home.

Miss Elizabeth Joy, who was on a month's visit to New York, returned to town again last week.

Miss Olive Thomson spent two weeks visiting relatives and friends in the city and returned by Saturday night's train.

The tern schooner "Netherton," Captain Williams, was towed to port on Monday afternoon from St. John's for dockage. This ship was taken on dock the following day, and will likely be launched in the morning when she will be towed back to the city again.

The members of Lodge Diamond Jubilee, S.O.E.B.S., attended Divine Service at the Methodist Church on Sunday evening last. The parade to the church was headed by the British band. Rev. Mr. Harris was the preacher for the evening, and delivered a very able sermon, dealing with the Fatherhood of God and the Brotherhood of Man, in a most impressive manner. The Anthem, "O Come Let Us Sing Unto The Lord," was very effectively rendered by the choir.

COR.
Harbour Grace, May 30th, 1923.

Shipping.

Schr. Hummriet is now loading codfish at Monroe's premises for Atlantic.

The Lacille B. Crocker, arrived from Barbados yesterday after a run of 22 days. She has a full cargo of molasses for A. E. Hickman & Co.

The General Trenchard, with 3,000 quintals of codfish on board, left Grand Bank yesterday for Maytown, when she will complete her cargo.

Are You the Woman You Were Meant to Be?

Every woman was meant to be healthy, happy, and all her sphere of life to the best of her ability; but, alas, how few have the health or physical endurance to live up to their ideal! Over-ambitious, many of them develop nervousness, irritability, headaches, backaches, irregularities, and often more serious ailments which retard their progress in life. Women in this condition should turn to Lydia E. Pinkham's Vegetable Compound, a root and herb medicine which has been proven to benefit 98 out of every 100 women who try it. Let Lydia E. Pinkham's Vegetable Compound make you well and strong, and the woman you were meant to be.

English Derby.

RESULT OF DRAWING UNKNOWN.

The Cable Derby was drawn on Wednesday last, and it is understood that the favorite horse has been drawn by a Londoner. No word has been received as to whether any of our local ticket holders have been fortunate in drawing a horse. The Derby, which generally takes place on May 24th, will not be run until Wednesday next, June 6th. The Dugan the first prize of which is \$50,000 will be drawn to-morrow.

Arrived for Interment.

The remains of the late Mrs. Patrick Myrick, of Cape Race, arrived by yesterday's train, and were met by a large number of friends of the deceased, including Sir Michael Cashin and Mr. P. F. Moore. The remains were taken in charge by Undertaker Myrick, the cortege wended its way from the railway station to the Mortuary Rooms, on Military Road, from whence the funeral took place this afternoon.

It May Not Be The Cow's Fault That The Milk Supply Has Fallen Off.

If the milk runs short, we are apt to blame the cow, when possibly it is not in the least the cow's fault. The cause is probably deficiency in the food supplies. This matter is well worth looking into. For example, some time ago, some feeding tests were made on a farm with four sets of cows. The local Analytical Chemist reported that "the cows fed on Molassine Meal increased in weight and the butter fats increased from 3.06 to 5.2. There was also a large increase in the amounts of nitrogen in the manure, and in this and every other respect the analysis came out better on cows fed on Molassine Meal than those on other food stuffs." The Experimenter also reported that after the first week's feeding on Molassine Meal, "the quantity of milk sent to London increased by 33 gallons, and the second week to 40 gallons. At the end of the test they weighed the cows and found that the live weight was more than before the tests with Molassine Meal was made." If your dealer does not stock it write to
