W. Scott	158	106	152	416
	632	608	620	1860

To-night's bowling games are: 7:30, Dunfield vs. Oddfellows; 9:00, Felldale vs. Star.

CHAMPIONSHIP BILLIARD TOURNAMENT.

Large Audience Witness Cue Experts In Action.

The first Amateur Billiard Tournament for the Championship of Newfoundland opened up in the Star rooms last night before the Prime Minister, Hon. W. R. Warren, Lt.-Col. Nangle, C.F., President W. J. Martin, and a large attendance of interested spectators. Play opened at 8 p.m. between J. Fawell and D. J. French. This match, though rather slow, grew interesting as the game progressed. French, though not up to his usual form, took the lead from the very outset, and gradually opened up a big lead, defeating his opponent by 154 points. The breaks were:—

D. J. French—300—11, 18, 10, 14, 15, 21, 12, 17, 10—142.
J. Fawell—146—10, 16—36.
Time of game, 1 hr. 14 min.

Scores At Intervals.

French—55, 103, 151, 219, 357, 300.
Fawell—32, 72, 90, 126, 143, 148.

The next game, played between Nix Wadden and R. C. Power, saw good billiards. Wadden had a slight advantage over his opponent in the early stages of the game, but once Power got into his stride the outcome was never in doubt. Many of our oldest billiard enthusiasts were delighted to see Mr. Power in action last night after his many years' absence. The breaks were:—

R. C. Power—300—12, 10, 16, 11, 11, 17, 18, 11, 28—144.
N. Wadden—183—14, 12, 13, 11, 15, 10—88.
Time of game—1 hr. 9 min.

Scores At Intervals.

Wadden—50, 63, 88, 123, 138, 183.
Power—49, 102, 151, 204, 266, 300.

The surprise package of the evening was sprung in the final game, when "Ned" Johnson, a member of the Star Club, defeated Jas. Edwards, of the Masonic, by 54 points. This game was easily the best exhibition for the night. Play was of a give and take nature until after the 200 mark had been reached, when Johnson, by clever billiards, gradually increased a comfortable lead on his opponent, which he kept until the end. Johnson, for his first public appearance, showed that he had all the requirements of a billiard player, and he is being heavily backed by his friends to make a bold bid for the honors. He defeated a player in Mr. Edwards, who has few superiors, and whilst we are sorry to see our friend eliminated from the tournament, hearty congratulations are extended to Johnson on his exceptional feat.

The breaks were:—
E. J. Johnson—300—11, 10, 10, 11, 14, 17, 12, 14, 24, 17, 11—162.
J. Edwards—246—12, 10, 12, 13, 13, 27, 10, 11, 20—146.
Time of game—1 hr. 26 min.

Scores At Intervals.

Edwards—44, 87, 146, 181, 204, 246.
Johnson—56, 109, 155, 217, 251, 300.

Great praise is due the committee of Management for the excellent stage arrangements. The spacious room is fitted up in a most up-to-date manner. All spectators had an excellent view of the games, whilst the greatest order prevailed throughout.

The players for to-night will appear as follows:—

The Garberry-Flynn game set for to-night has been postponed.

8:00—C. Davis vs. A. J. Moakley.
8:15—J. Hickey vs. W. Newbury.
10:30—Rabbitts vs. Freeman.

An added attraction to the games last night was the amusement afforded

ed many of the spectators in trying their luck from the position of balls last played by the winners. Mr. Wm. Cooney, of baseball fame, was high liner, with a well played break of 25.

INTER-CLUB BILLIARDS.

B.I.S. Players Victorious

The Inter-Club Billiard Tournament, between the Masonic and B.I.S. players, was resumed last night, and resulted in victories for the Irish players by substantial margins. In the first game Phelan (B.I.S.) defeated Bartlett (Masonic) by 29 points. The second game, between Moakley (B.I.S.) and Angel (Masonic) proved to be one of the finest played games of the series. Honors were evenly divided until Moakley made a high run of 78, the largest break of the tournament. The breaks are as follows:—

Phelan (B. I. S.)—350—10, 15, 11, 12, 28, 13, 16, 19, 12, 10, 16—162.
Bartlett (Masonic)—321—20, 15, 11, 18, 12—76.

Moakley (B. I. S.)—350—17, 11, 27, 26, 11, 78, 18, 15, 11, 16—230.
Angel (Masonic)—279—13, 11, 18, 10, 18, 25, 12, 14, 12, 19—167.

The games for to-night have been postponed owing to the lecture in the B.I.S. rooms and the card tournament at the Masonic.

ENGLISH SEMI-CUP FINALS.

In the English Semi-Cup Finals, played in England on Saturday (March 29) Newcastle United and Aston Villa both won their games. The following are the scores:—
Newcastle U. 2; Manchester City 0.
Aston Villa 3; Burnley 0.

GRAND NATIONAL.

The winners in the Grand National, which was run on Saturday at Liverpool, are as follows:—
1.—Master Robert.
2.—Flymask.
3.—Silvo.

We stated yesterday that Sir Galahad was first in this race. This was an error as Sir Galahad won the Lincoln, which was also run at Liverpool.

TIE CUP HOCKEY SWEEP.

In connection with this sweep conducted, net proceeds in aid of the Child Welfare Association, the prize for the total number of goals scored during the series at \$1 per goal amounted to \$40, and was won by Mr. J. Bragg. The single match prizes at 50c. per goal have all been claimed any anyone interested can obtain a list of the scores and prize winners from the undersigned. Owing to the fact that the tie-cup games were postponed so often and interest therefore lacking, it was found impossible to dispose of all the tickets though fortunately, all the winning numbers were found to be among those sold. After paying the prize money, a balance of \$4 only, was left which has been handed to the Child Welfare Association.

(Sgd.) P. E. OUTERBRIDGE, Organizer.

A WORD OR TWO FROM GAY PAREE ON ROMERO-ROJAS.

Ever since the day that one Luis Angel Firpo turned up his nose at a mere \$200,000 offered by Mr. Tex Rickard for 45 minutes or less of fistie embroglio with Mr. Harry Wills, upright and famous citizen of Harlem, the strange name Quintin Romero-Rojas has been appearing in the composing rooms of most of the great dailies of this country.

Quintin Romero-Rojas just wasn't anybody at all to big Luis when he asked the South American battler for a match for the Argentine title.

Firpo, showing that he has learned footwork since his battle with Dempsey, sidestepped him neatly. And now Tex Rickard has engaged Mr. Rojas to come north, knock over a number of our enterprising young heavyweights—if he can—and step into the ring with Dempsey, completely purchasing Firpo's thunder.

The Man He Is.

What manner of man is Senor Rojas? From Paris comes a bit of elucidation which we gladly pass along. He is a 200 pound specimen who fights in the old Jeffries crouch. They say he is hard to like. Like Luis, his big Bertha is his right hand. But unlike the Wild Bull, he does not use it as a club, but shoots his punches short and sweet.

The new Senor, whose home is Antofagasta, Chile, can box as well as slug, has a nice left hand, which he is training himself to use more and more each day, and owns for a cognomen the modest title of the Lion of the Andes.

Rojas is further described as a perfect combination of the primitive cave man type with brains. Yes, indeed, the Senor does not leave his wrists behind him once the bell rings, but forswears his crouch with the express intent of carrying into immediate execution heady and deep-laid plans for the enemy's undoing. It yet remains to be seen what happens when the Senor is, through some mishap, jarred loose from some of these plans.

How He Fights.

The following excerpt was spoken of Rojas by Paul Casquet, veteran French trainer:

"When he knocked out Bluerie, the French veteran, in two rounds in his second fight in Paris, Romero missed a right to the point of the jaw and a right to the solar plexus. The first blow missed the point and cracked Bluerie's jawbone, paralyzing one side of his face and head, and the other broke a couple of ribs. When Marcel Nilles woke up on the night of Dec. 1 he couldn't tell where he had been hit. He remembered suddenly getting numb all over and floating into darkness. Romero had hit him in the stomach with a right and a left."

S. CLEGHORN RELIEVED FOR FIRST TIME IN 76 GAMES SATURDAY.

MONTREAL, March 24.—When Sprague Cleghorn, captain of the Canadian hockey team, was relieved in the last period of the Calgary-Canadian game on Saturday night, it was the first time in the seventy-six games he has played with the locals that he has been given a rest.

In 1922, he played 24 games, in 1923 he played the same number, and this year he participated in 23 fixtures and five play-off battles. He has missed one or two games but has never been relieved in all the time he has been with Dunderdall's tri-colored band.

Mantha was sent on to replace the "big train" Saturday night after all danger in the contest had passed.

The Passing Hour

VERY LIKELY.

Cynthia—How is your husband?
Dorothy—I haven't seen him for five years. I think I must have said something to annoy him.—From the London Mail.

SLOW.

Barber—Your hair is turning gray at the back, sir.
Customer—I don't wonder at it—hurry up.—From London Opinion.

HOW THE DOCTOR LOST A PATIENT.

Mrs. Stephens, a regular visitor in the doctor's room, started on a long story of her afflictions. The medical man endured it patiently and gave her another bottle of medicine. At last she started out and the doctor was congratulating himself: "Why, doctor, you didn't ask to see if my tongue was coated."

"I know it isn't," he wearily replied, "you don't find grass on a race track."—Capper's Weekly.

TURNS ABOUT.

"Going ahead, dear? Why, it's awfully early!"
"Yes, but I want to get in before my husband. It's my turn to scold to-night."—From the London Mail.

SPAN OF LIFE.

Prof. (examining)—"What is the average lifetime of a human being?"
Student—"About 30 years. After that time he's married."

REASON.

Prospective tenant—But why do they make these apartments so small?
Agent—That, sir, is so that the tenants will have no room for complaint.

After illness—
recuperate
take
SCOTT'S
EMULSIONSchooner's Trek
Across Country

EDMONTON, Alta.—A schooner built in the city of Edmonton has just completed its 700 mile journey through the bush from the end of the steel line to the shores of the Reindeer Lake, and arrived at its destination without a scratch. The schooner was built for the Hudson's Bay Company, and is quite the most modern schooner built for work on the northern lakes. The bush trail for 700 miles had to be cut and hacked for the eight-horse team hauling the schooner, which was built as much for the rough land journey as for her ultimate duties on the lake.

MEAD'S RE-CO-LAC.

Mead's Re-Co-Lac is a re-constructed Milk for feeding infants, used and recommended by the Community Nurses.

Advantages of Re-Co-Lac.

Re-Co-Lac has a place in infants feeding because it is preferable to fresh milk under conditions such as the following:—

1. When the quality of the available fresh cow's milk is known or suspected to be questionable.
2. In warm weather when certified or Grade A milk is not obtainable.
3. Where there is no supply of ice or other means for cooling and preserving fresh cow's milk.

STEEL OF CANADA.

(Financial Post March 14.)
Earnings of 12.4 per cent. on the common stock are indicated by Robert Hobson, president of Steel Co. of Canada, after all charges and preferred dividends have been taken care of. The report will soon be ready. Mr. Hobson verified the figures given in last week's POST in regard to the reduction in funded debt. The balance at the end of 1923, after taking care of all charges including common stock dividends of \$805,000, will be shown as \$627,875, which shows that after paying preferred dividends there remained, applicable to common shares, \$1,432,875 or 12.4 per cent. This compares with \$448,556 in 1922 or 3.9 per cent., and \$562,551 in 1921, or 3.15 per cent.

Mr. Hobson says that 1923 saw working capital increase from \$1,372,444 to \$11,279,809. This was largely due to increases in inventories and accounts receivable. The increase in inventories was due largely to two factors, the policy of the company in accumulating coal as insurance against the possibility of a coal strike in the United States this year and the accumulation of pig iron sufficient to meet requirements while blast furnace "A" is out of operation. This furnace was blown out some time ago to undergo repairs.

CANADIAN CAR.

Canadian Car and Foundry have secured another order, amounting to \$4,000,000 from the government. The company is turning out work at a very fast rate and although only five months have passed since the end of their fiscal year, September 30th, 1923, business is up to last year's record. Orders on hand since that date now total around \$20,000,000, the equivalent of the gross sales for 1923, which compared with \$9,000,000 the previous fiscal period. \$7,500,000 of business was carried over from the previous year, \$4,000,000, was secured by the company up to the time of the annual meeting in January, about a \$1,000,000 new business recorded in February, some \$3,000,000 to the Canadian Steel Foundries Ltd., (a subsidiary) and the present announcement of \$4,000,000, brings the total up to about the figure mentioned. The gradual paying off of the preferred, the placing of the issue on a regular basis and prospects of a good year have had their effect on the securities of the company; the preferred is selling at 94%, with the common around 45.

World's Water
Power Conference

MONTREAL, Que., March 24.—(By Canadian Press)—The first world's power conference is to be held in London, England, from June 30 to July 12 next. The idea of a world power conference originated in England during 1915, when the relation of power to production was vividly brought forth. The idea remained dormant until the British Electrical and Allied Manufacturers' Association evolved the scheme of holding such a conference during the British Empire Exhibition.

Canada is expected to play a prominent part in the coming conference. The Dominion is vitally interested in this gathering because of the magnitude of water power resources and hydro-electric development, and this interest will be furthered by the energy of the engineers who have been the builders and who are now directing these enterprises. In point of potential and actually developed water powers, Canada stands second among all the nations and has a distinct advantage in this respect in comparison with other Dominions.

It is expected that Canada will be represented at the conference by the following: Hon. Charles Stewart, Premier G. Howard Ferguson, of Ontario; Sir Adam Beck, F. A. Gaby, chief engineer of the Ontario Hydro-Electric Commission; H. G. Acres, chief hydraulic engineer of the Ontario Hydro-Electric Commission; J. G. Glasco, Manager Winnipeg Hydro-Electric System; J. B. Chaffles, Director of Water Power for Canada; General Mitchell, Dean of the Engineering Faculty, University of Toronto; Arthur Surveyor, member of the Canadian Research Council; Julien C. Smith, vice-president of the Shawinigan Water and Power Company; Prof. C. V. Christie, McGill University; F. B. Brown, Montreal; A. A. Dion, General Manager, Ottawa Electric Company; John Murphy, Electrical Engineer, Department of Railways and Canals; Hon. H. Mercer, A. Monro, Ontario, K.C., president Canadian Niagara Power Co.; B. G. Haanel, Department of Mines; K. H. Smith, chief engineer, Nova Scotia Power Commission; A. Amos, director of hydraulic service, Quebec; O. LeFevre, Quebec Streams Commission.

According to the latest official figures in potential water power the United States leads the world with a minimum available 28,000,000 horse power. Canada comes next with 18,255,316 horsepower; other important countries being: Norway, 5,500,000 horsepower; France, 4,700,000 horsepower.

"The height of the page is about nine and a half inches, and the breadth four and a half inches. Each is numbered in Coptic letters at the top left-hand corner. The first page extant is numbered '7' and contains the text of the end of the second chapter of the Gospel. There are therefore three leaves missing. Of course, there would be originally no title page like those to which we are accustomed in our modern books.

"In those days such information was given at the end of the book, and unfortunately that, too, has been lost. The last extant page is numbered '96' and ends with the latter part of the twentieth chapter. Apart from these only two whole leaves are wanting—namely, those containing pp. 11-12, and 33-34. Most probably the remainder of Chapter XX, and the whole of Chapter XXI, would have taken six pages, so we may presume that the manuscript originally consisted of some 100 pages.

"The marvel is that of these we have no fewer than 86 containing the continuous text of an early Egyptian version of this Gospel. These 86 leaves have been consigned to the care of the famous library of the British and Foreign Bible Society, at 146 Queen Victoria Street, London, where they will be available for consultation by those interested in such treasures."

Acid foods can be safely cooked in aluminum vessels.
