

After she had reached home and was enjoying the bliss of paradise, she was asking to have you earth for awhile, but I said, "I'll be glad to have you love to have my reward with me in glory (John 14:2). If you are willing to go with me I will let you bring your reward." I think that would be to return, and we know return to the earth many times (verse 42). was the same in the case of the Jews went away and Jesus (John 14:11). The Lord himself in torment wanted some one to warn who were still on earth. could come to the same Luke xvi. 27, 28. So it is to think that some thing to come back from you could take others to bliss.

### NOTICE OF DISSOLUTION OF PARTNERSHIP.

NOTICE is hereby given, That the partnership heretofore existing between us, the undersigned, as Blacksmiths and Horseshoers, in the Town of Aylmer, has this day been dissolved by mutual consent.

All Debts owing to the said partnership are to be paid to Albert Soper of the Town of Aylmer, aforesaid, and all Claims against the said partnership are to be presented to Peter Karn, by whom the same will be settled.

Dated at Aylmer, this twenty-second day of March, A.D. 1916.

In the presence of  
(Sgd.) WM. WARNOCK  
(Sgd.) PETER KARN.  
(Sgd.) A. SOPER.

### NOTICE TO CREDITORS

Of Isabella Saxton, Deceased  
PURSUANT to Sec. 56 of Chapter 121, R. S. O. 1914, Notice is hereby given that all creditors and others having claims against the estate of Isabella Saxton, late of the Township of Bayham, in the County of Elgin, widow, who died on or about the twenty-ninth day of January, A. D. 1916, are on or before the fourteenth day of April A. D. 1916, to send by post, prepaid, to Miller & Backus, Aylmer, Ont., Solicitors for the Executors of the said deceased, their christian names and surnames addresses and descriptions, the full particulars of their claims, a statement of their accounts and the nature of the securities (if any) held by them, and that after the day last aforesaid the said Executors will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to such claims of which notice shall have been given as above required, and the said Executors will not be liable for the said assets or any part thereof, to any person or persons of whose claim or claims notice shall not have been received by them at the time of such distribution.

Dated at Aylmer this thirteenth day of March A. D. 1916.

John A. Saxton and William Fred Saxton, Executors, by  
MILLER & BACKUS,  
Their Solicitors.

### NOTICE TO CREDITORS

Of Margaret Saxton, Deceased  
PURSUANT to Sec. 56 of Chapter 121, R. S. O. 1914, notice is hereby given that all creditors and others having claims against the estate of Margaret Susan Saxton, late of the Township of Malahide, in the county of Elgin, spinster, who died on or about the Thirtieth day of September A. D. 1910, are, on or before the Fourteenth day of April A. D. 1916, to send by post pre-paid, to Miller & Backus, Aylmer, Ont., solicitors for the Executors of the said deceased, their christian names and surnames addresses and descriptions, the full particulars of their claims, a statement of their accounts and the nature of the securities (if any) held by them, and that after the day last aforesaid the said Executors will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to such claims of which notice shall have been given as above required, and the said Executors will not be liable for the said assets or any part thereof to any person or persons of whose claim or claims notice shall not have been received by them at the time of such distribution.

Dated at Aylmer this 13th day of March, A. D. 1916.

### THE SHELL GAME.

(Continued from page 6.)

eight of an inch thick and wide enough to fill the groove. It is just large enough to slip over the shell to the groove. It is then put in a machine with six jaws, which shove in from all directions and squeeze the band into place. It is the same kind of machine big plants use for setting tires on wheels. This band then has to be turned or cut down to be the correct size for the bore of the gun, and also to form a small shoulder or ridge over which the end of the brass cartridge case is eventually pressed or peined in.

The shell is now ready to be loaded with its bullet charge. A small tin cup, about the size of a door knob, with an opening in the top, about the size of your little finger, is first dropped in. This is to contain the explosive charge, which, however, is not put in this munition plant. There are special plants for this explosive work, and the charge can be put in after the shell is finished. Most of the explosive is made and put in in England. The tin cup is held down by a flat steel disc, and into this disc is screwed a brass fuse tube, about three-eighths of an inch in diameter. This tube connects with the opening in the tin cup, which is in the bottom part of the shell, and extends nearly up to the top of the nose. This tube carries the powder fuse down from the nose of the shell to the explosive charge, when the shell is completed.

With this tube central, the shell is placed under a special hopper, and by means of a funnel, is filled with bullets all around the tube. Each of these shells contains three hundred and seventy-five half-inch lead bullets and they are so tightly packed that the shell has to be shaken up, and down on a special "jogging" machine all the time it is being filled, to get them all in. The shell then has to be weighed, and must be within a few drams of the fixed weight. It is then put under an electrically heated tank, like a coffee urn, and molten resin is poured in. This fills all the spaces between the bullets, and when it hardens, prevents them from shifting position. Then a brass socket is screwed into the nose of the shell and the fuse tube extends through a hole in the centre of it. This tube must be soldered fast in the socket next, and is done with an electric soldering iron in about fifteen seconds. The shell then has to be placed in a machine, and the outside of the brass socket turned or cut down to conform to the shape of the shell nose. A plain plug is then screwed into this socket to keep the socket from being damaged in handling. This plug is eventually replaced by the fuse plug when the explosive charge is put in.

This finishes the machine work, and if the Government inspectors find it measures up to all their standards, the shell is passed. It still has to be painted. It has been ground so smoothly that paint will not stick on it; consequently it has to be given a coat of sizing. This is done by revolving it nose down in a special machine, while the brush is moved up and down the outside and across the base. After

sizing, it has to dry for twenty-four hours, and is then ready to paint. This is done on a similar machine, but it has to be painted in two colors—the nose red, the body grey. Both are done at once, and yet they keep the colors from running. The paint is used to indicate the kind of shell it is, high explosive or shrapnel, and in addition protects the steel. After drying, it is ready to pack, six in a box, to be taken to the cars and shipped to the explosive plant or arsenal, where the cartridge case, fuse plug, and explosive charge are put in, then re-boxed and shipped to "Somewhere in France."

And now you know the table of contents of a shrapnel shell—perhaps you know how it works. The fuse plug, which is a very complicated part, can be set to make the shell itself explode any time after leaving the mouth of the gun up to—say, three or four miles distant. If this fails to work, which is unlikely, it explodes as soon as it hits anything. The fuse plug is fired by a percussion cap, igniting a train of powder which extends down the fuse tube into the tin cup, which contains the explosive charge, as mentioned before. This charge is exploded, forcing the steel disc and all the bullet charge forward. The shell is not intended to burst, as often supposed, into small pieces. It is designed to have its weakest point just a few inches down from its nose, and, we might say, simply "blows its nose off." The bullets are then shot forward with a velocity added to that of the shell, and scatter in all directions to do their deadly work. The term "hail of shrapnel" is most appropriate.

It takes a long time to even give this rough, incomplete, eye-witness's description of the work on one shell. Now, can you imagine a single plant, which till a year ago had never seen a shell, turning out three thousand shells, all ready to be sent to the explosives plant or arsenal, every day of the year, excepting Sundays? These plants work twenty-three hours every day, and produce the three thousand shells with the aid of only a few hundred men. Each one of them is "the man behind the man behind the gun." And it is interesting to note there is not supposed to be a place in the world where shells are being turned out for the Allies as cheaply or efficiently as in Canada. The shells are really made for the Germans—for rapid delivery, via France, and we can only hope they reach their destination.

### POINTS TO CONSIDER WHEN PURCHASING A RAILWAY TICKET

A Canadian Pacific Railway ticket does not represent merely a means of transportation between given points. It, in addition, provides the traveller with every comfort and convenience, developed by modern railway science, "Safety First," with up-to-date equipment, unexcelled dining-car service, palatial sleeping cars; in a word, everything that a railway can provide for the comfortable transportation of its passengers, including courtesy.

### PROPOSED INCREASE IN PRICE OF ONTARIO WEEKLIES.

Ottawa Journal: A movement has set in among Ontario weekly newspapers to make the price \$1.50 per year, instead of \$1.00 as heretofore. The proposition is a good one. The newspaper is about the cheapest thing in the modern world for its value. If nothing else were considered, save the usefulness of the advertisements and the market prices to the average home, a dollar spent in buying newspapers must mean the saving of many dollars in any home.

### TOWNSHIP COUNCIL

The monthly meeting of the above council was held on Monday, April 3rd, at the town hall, Aylmer, all the members present.

After routine a number of accounts were ordered paid, mostly for work, repairs, supplies and salaries. Several committees were then appointed.

The reeve and Hare on Dorchester town line.

The reeve and Hare, re drainage, Dr. Brown, on 9th concession.

Reeve and Hare, re drainage Walter Hollands.

Reeve and Hare at Rogers Corners, Mr. Foster.

Reeve and Hare, drainage at Port Bruce.

Reeve and Hill, re culvert at J. W. Parker's.

Hare to inspect culvert and drainage on townline between Yarmouth and Malahide.

By-laws to appoint pound keepers, fence viewers, overseers of highways were appointed, and were put through the required three times and finally passed.

By-law 951, for the removing of trees in front of Copenhagen school grounds was passed.

The council then adjourned till May 1st next.

### KEEP CHILDREN WELL.

To keep little ones well the bowels must be kept regular and the stomach sweet. Nine-tenths of childhood ailments are caused by derangements of these organs. Baby's Own Tablets never fail to regulate the stomach and bowels—that is why thousands of mothers would give no other medicine to their little ones. Concerning them, Mrs. Chas. A. Turner, Marie Joseph, N.S., writes: "We have been using Baby's Own Tablets off and on for the past year and a half, and have found nothing to equal them." The Tablets are sold by medicine dealers or by mail at 25¢ a box from The Dr. Williams Medicine Co., Brockville, Ont.

### AYLMER COUNCIL

The regular meeting of the Aylmer Council was held on Monday evening last, all the members being present but Councillors Trim and Laidlaw.

After the minutes of the previous meeting had been read and adopted, No. 1 Committee reported and recommended the payment of accounts to the amount of \$1,745.51, which was adopted on motion of Scott and King.

Ex-Mayor Wagner requested, in the interests of the Aylmer Horticultural Society that a curb be built 3 ft. x 105 ft. on the north side of the park. This was granted, and as the Society has several cannas, roses and gladiolus ordered for the beautifying of the town, we shall expect to see this hitherto rather unsightly spot brightened up considerably.

Scott-McKenney—That the tender of the British American Oil Co., for road oil, be accepted.

Cline-McKenney—That the resignation of Councillor A. Trim, be accepted, and that this board take the necessary steps to fill the vacancy. Carried.

McKenney-Little—That the request of the ratepayers on Chestnut street, to have the street curbed be allowed, and that Mr. Widdfield be requested to lay out the work when required. Carried.

Cline-McKenney—That the tile and lumber asked for to build a drain on South street east, opposite the residences of S. Smith and others, be granted, the work to be done to the satisfaction of the council. Carried.

Scott-McKenney—That tenders for town teaming be laid over for further consideration.

A committee was appointed to find some suitable location and have the drinking fountain which was presented to the town a couple of years ago, again installed. Mr. King thought it was a most ungrateful piece of business to let it stand stored away, and showed lack of appreciation on the part of the authorities.

The Council then adjourned.

### HOW'S THIS?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

Hall's Catarrh Cure has been taken by catarrh sufferers for the past thirty-five years, and has become known as the most reliable remedy for Catarrh. Hall's Catarrh Cure acts through the blood on the Mucous surfaces, expelling the Poison from the Blood and healing the diseased portions.

After you have taken Hall's Catarrh Cure for a short time you will see a great improvement in your general health. Start taking Hall's Catarrh Cure at once and get rid of catarrh. Send for testimonials, free.

F. J. CHENEY & CO., Toledo, Ohio.  
Sold by all Druggists, 75c.

### EXECUTOR'S SALE

There will be offered for sale, by Public Auction, on Tuesday, the 11th day of April, 1916, at the hour of one o'clock in the afternoon, at the premises known as the North half of Lot No. 2, Concession 8, Malahide, known as the Joseph Stevens' farm, the following property: 8 first-class dairy cows, 2 yearling cattle, 1 King Melrose colt, rising 2 yrs., 1 King Melrose colt rising 3, 1 brood mare, aged, 1 buggy, 1 cutter; all household furniture and other chattels, the property of the late Kate Livingstone.

Taylor, Miss Amelia	1 00
Trim, George	1 00
Trim, Frank H.	1 00
Thayer, G. E.	1 00
Yeo, Mrs. Wm.	1 00

Total \$263 00

## WHAT CATARRH IS

It has been said that every third person has catarrh in some form.

Science has shown that nasal catarrh often indicates a general weakness of the body; and local treatments in the form of snuffs and vapors do little, if any good.

To correct catarrh you should treat its cause by enriching your blood with the oil-food in Scott's Emulsion which is a medicinal food and a building- tonic, free from any harmful drugs. Try it.

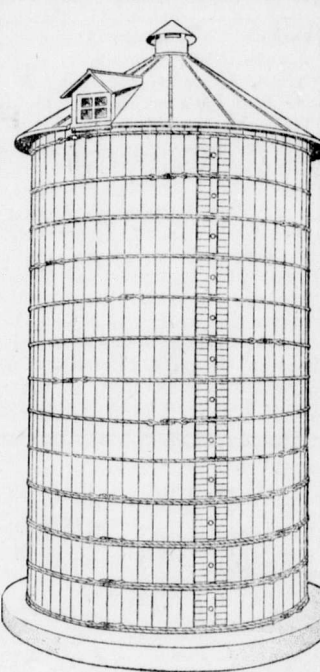

Scott & Bowne, Toronto, Ont.
