

WESTERN ONTARIO.

ELGIN.

Duart is talking "brass band." Benjamin Robinson, Clearville, and his uncle, John Ford, were sharpening fence posts the other day. Ben was holding a post while his uncle was sharpening it. Mr. Ford struck too high and cut the right hand of Mr. Robinson, injuring it seriously. Mr. Robinson is now compelled to carry his hand in a sling.

ESSEX.

The Windsor merchants will close their stores at 6:30 each evening, except Saturdays, during July and August.

A. H. Lidwell, reeve of Pelee Island, having died, nomination for a new election was held Friday, and W. Mickle and J. Brown were nominated.

Referee Jewell has completed his work on the books of Treasurer Wright, Windsor, and finds a deficit of \$22,050, which with his fees, \$1,700, bring the amount up to \$24,050. The county council committee will meet Thursday and decide what to do in the matter.

Planner & Cowan, Windsor, acting for Peter Williams, of Leamington, has issued writ in the High Court of Justice against Bel Wile for \$1,000. This is an outcome of the Wile failure, and will be made a test case to ascertain if S. Wile was a partner at the time of the failure.

John Wilson and Thomas Sorell are neighbors in Sandwich West, and there has for some time been bad blood between them. Wilson, it is stated, put poison on his own ground next to Sorell's fence, and Sorell's chickens were killed by it. Sorell's chickens, which Wilson had no right to put poison where it would damage other people and fined him \$18.

The attendance of pupils at Clinton public school for May was 171, the average attendance being 234.

Thomas Nixon, miller, of Bluevale, who recently made an assignment for the benefit of his creditors, gives up an estate valued at \$7,000, while his liabilities are said to foot up to \$5,000.

The old hotel building at Nile in West Wawanosh, which had been vacant for some time, was burned down the other night. The fire was of incendiary origin.

The Bayfield school building is to be overhauled and enlarged by having another story put on the building.

Forest has 40 telephone subscribers. Forest is organizing a board of trade. Heber Rawlings' sale of shortbuns netted \$1,004, an average of over \$50 per head.

Burglars stole \$225 from R. Frayne's residence, Forest, one night recently. It will cost the township of Euphemia \$1,800 to repair the damage done by the recent floods.

T. Doherty, Sarnia, has been granted a patent for a hot water boiler from the United States Patent Office.

The secretary, J. J. O'Connell, of Sarnia, states that the following lodges of the Orange Order will celebrate the 12th of July at Sarnia: Counties of South Huron, North Huron, South Perth, Elgin, East and West Lambton, and the following districts, Adelaide, Munceytown, also two lodges from Detroit, Port Huron one, Saginaw two, Oscoda one, Bay City one, Lee's Corners two, Rosebud one, Evansville one, Everitt one, Presland one, Louis one. Three of the above lodges are composed of ladies. The City of Cleveland has been chartered for the occasion. Thirty brass bands will be in attendance.

MIDDLESEX.

An East Williams man recently sold four fleeces of wool that weighed 524 pounds.

The Hodgins Bros., of Bidulph, have purchased the farm of Albert Beasly, near the farm for the sum of \$4,000.

The death is announced of Wm. Wright, of the township of McGillivray, at the age of 68. He was a man of superior intelligence. He was a municipal councillor for several years, also auditor and vice-president of the McGillivray Mutual Fire Insurance Company and secretary-treasurer of the McGillivray Agricultural Society.

John Anderson, con. 9, lot 14, Caradoc, has sold his 100-acre farm for a handsome figure to John Welch, of Adelaide. Mr. Anderson intends moving to Petrolia next spring.

The Women's Hospital Aid of Stratford purpose holding a calico ball in the rink there on the 8th inst. for the purpose of raising funds for the General Hospital. The tickets are placed at \$2 for gentlemen and one lady and 50 cents for each extra lady.

Daniel Flood, London township, has purchased Joshua Thompson's farm, 10th con., Bidulph, for the sum of \$6,000.

W. M. Shoebottom, for many years a farmer at Alder Creek, has sold out his stock of groceries to H. Hutchinson, and his stock of boots and shoes to Mr. Chapman. It is understood Mr. Shoebottom will remove to Lucknow, where he will establish a canning and fruit evaporating factory.

Miss Annie Horton, of McGillivray, was driving along the second concession of that township the other day when her horse became frightened and plunged over Boyce's bridge, some sixteen feet into the water, carrying buggy and driver with it. Singularly to relate, none were seriously injured by the fall. The water where they took the plunge being four feet deep was the means, no doubt, of saving their lives.

On Saturday some young fellows were shooting sparrows in an orchard belonging to Andrew McWilliams, lot 13, con. 14, London township, near Birs, for the purpose of feeding them to a pet hawk. One of the boys did not pay sufficient attention to the direction in which he was shooting, and a portion of the charge went through a window in the house, striking a little girl named Rowell, a niece of McWilliams, on the side of the head, inflicting a painful although not serious injury. The child was taken to a doctor, who removed several grains of shot and dressed the wound.

OXFORD.

The Ancient Foresters of Ingersoll and Woodstock have made all arrangements for their excursion to Port Stanley, on Friday, July 13.

Mr. Smith has tendered his resignation as councillor for ward 2, Ingersoll, and been appointed assessor at a salary of \$200 per annum.

PERTH.

The Kirkton creamery is doing a good business under the management of Mr. James Ross. At the present time the make of butter, which is of superior quality, will average about 2,500 pounds a week.

The 202nd anniversary of the Battle of the Boyne will be celebrated at Listowel by the local and neighboring Orange lodges. A fine programme of athletic sports and other amusements has been prepared.

WELLINGTON.

During the last two weeks it is estimated that from 12,000 to 15,000 people have visited the Model Farm from all parts of Ontario.

The teachers of the Central School,

Guelph, have presented Mr. Cook, who has received an appointment in the Inland Revenue service, with a gold-headed cane. The following gentlemen of the township of Pilkington have recently been appointed justices of the peace for the county of York: Robert McQuinn, Geo. A. Wallace, Thos. R. O'Brien, Wm. L. Gordon, Geo. Strangways, sen., John Doyle, Thos. Pritchard, Joseph Stickney, James Hunter, Joseph Joseph, John Kleicher, James Hill, Wm. J. Wadick.

At the ripe old age of 94, David Smuck, Carleton Place, has been called away. His remains were laid in Salem Cemetery. A large procession of friends and old-time acquaintances paid the last act of respect due the deceased. His partner, 91 years of age, passed away only a few weeks ago.

ARE YOU A MOTHER?

If You Are, This Will Interest You.

Just a word to mothers who are obliged to feed baby artificially. There is nothing more neglected than the feeding bottle, and a large measure of baby's happiness depends upon it. The "feeding bottle" should be attended to with the most scrupulous attention. After feeding baby, the bottle should be put in ice cold water, to which should be added a teaspoonful of good baking soda to each pint of water. The "teats" should also be placed in this same solution in order to prevent them becoming sour.

Food should never be put into an unwashed "feeding bottle"; and food should not be allowed to remain in the bottle for feeding, and fed again to the child. If these matters are neglected, the infant's stomach, by being subjected to stale and sour food, becomes deranged, and the child's whole system is disordered from a mere act of inattention and carelessness.

If you feed baby with that healthy and life-giving milk which is so easily and readily obtained in Canada, the ordinary infant will not require it often than every two hours when awake; the quantity should not exceed three ounces, or an ordinary nursing bottle half full. As the child increases in age the quantity can be increased. A three month's child will thrive well on four or at the most five meals a day, and the quantity given should be six to eight ounces.

Babies fed regularly on Lactated Food as indicated above will be strong, healthy and vigorous; they will sleep well and soundly, and will pass safely through the excessively hot weather. We strongly advise mothers to try the celebrated Lactated Food. Already it has become a household word from the Atlantic to the Pacific, and thousands of little lives have been saved by its use.

THE DAIRY.

—Glass in the dairy is seldom used in large quantities, but even when fitted with large gauges they are liable to get broken and make endless trouble. The thermometer is the only glass instrument used from parts of testing machines that meets our approval. As food in many parts of dairy machinery—as churns, paddles, butter-prints, etc.—is a necessary evil to be tolerated, it is better to have a thermometer in the churn, than to have appointments, that used wooden covers for pans that alone and unknown to the owner cause nine-tenths of all the trouble that comes to the butter. If you do not believe this, take any of the oil in the implement in use in the churn for a long time, and pour it into the open air, and you will find the oil for your lungs to get full of dust, pure air, and then carefully smell the old oil and see if you cannot detect the odor of old butter in it. From common use cream gets split up the whole of the oil sinks into it, and to such an extent that the amount of scrubbing can remove it, and heat with time renders butter-oil extremely rank. If this oil comes in contact with fresh cream that cream is sure to absorb the odor, and is great injury. Such wooden covers should be entirely abandoned and sheets of tin or galvanized iron substituted, if covers must be used. With the churn and butter-worker the only remedy is constant scrubbing and watchfulness. —The New Dairy.

—The number of factories reported in operation in Ontario in 1901 was 308. The 45,000 patrons supplied \$5,453,574 pounds of milk from 296,199 cows. The factories made \$1,920,042 pounds of cheese, which was sold for \$7,556,484. The total output was 15,000,000 pounds higher than the average for the same period. The number of patrons per cheese factory was 50.

—The number of public creameries reported in operation in Ontario in 1891 was 30. Returns from 30 of these show that they made 1,402,309 pounds of butter valued at \$287,559. The number of patrons per creamery was 119.

—That the moon jumped over the moon once in this very day. We will make Her come through the heavens. We will make And we call it the Milky Way. —Truth.

THE SICK ROOM.

—One of the most convenient articles to be used in a sick room is a sand bag. Get some clean, fine sand, dry it thoroughly, and have the sand make a bag about eight inches square of flannel, fill it with the dry sand, sew the opening carefully together and cover the bag with cotton or linen cloth. This will prevent the sand from sitting out, and will also enable you to heat the bag quickly by placing it in the oven or on top of the stove. After once using this you will never again attempt to warm the feet or hands of a sick person with a bottle of hot water or a brick. The sand holds the heat for a long time, and the bag can be tucked up to the back without hurting the invalid.

—Everyone knows how much more delicious freshly-made jelly is than old; part of the work is done in cool weather; there will be no shrinking or molding of this winter-made jelly; grape jelly will not have time to form its gritty crystals, or the crab-apple to become too solid by placing it in the sun, or the juice than to try to preserve the jelly in numerous little glasses, and finally, if a particularly pretty mold is wanted, it can readily be made at any time from the fresh juice.

—Charcoal prevents fermentation, hence is an aid to digest relief in suffering dyspeptic and indigestion. It is less trouble to take than the juice than to try to preserve the jelly in numerous little glasses, and finally, if a particularly pretty mold is wanted, it can readily be made at any time from the fresh juice.

—Tired All the Time.

Is the complaint of many poor mortals, who know not where to find relief. Hood's Sarsaparilla possesses just those elements which build you up, give you an appetite, strengthen your stomach and nerves. Try it.

—Hood's Sarsaparilla acts especially upon the liver, cleansing it from impurities, and thus promoting its normal duties, cure constipation and assist digestion.

Hard wood in Wisconsin is being rapidly cut up to be made into charcoal for the iron furnaces in that State.

Carters' Little Liver Pills must not be confused with common Cathartics or Purgatives. Pills as they are extremely unlike them in every respect. One trial will prove their superiority.

ANKLE-DEEP IN MOLTEN METAL.

LOCKPORT, July 3.—While a ladle containing four and one-half tons of molten metal was being transferred from one crane to another, in the Holly foundry Friday night, the screw appliance on the handle, which regulates the tipping of the huge vessel, slipped, dumping the fluid iron among the workmen below. P. Scherer, became much excited, ankle-deep, sustaining frightful burns. It is feared he will lose his feet.

At the ripe old age of 94, David Smuck, Carleton Place, has been called away. His remains were laid in Salem Cemetery. A large procession of friends and old-time acquaintances paid the last act of respect due the deceased. His partner, 91 years of age, passed away only a few weeks ago.
