A Great Discovery.

All Rossland Delighted by a New Test of Ore.

The Low Grade Dump Will Be Utilized | To the Editor of The Advertiser: to the Extent of Millions of Tons.

out the members of the Grecian reserve forces who are in the United States, and to urge them by every means in his power to go to the assistance of their native country.

A Chicago dispatch says the storm which regard throughout the middle is very silicious and was found to urge them by every means in his power to go to the assistance of their native country.

A Chicago dispatch says the storm which regard throughout the middle is very silicious and was found to urge them by every means in gold to the ton, was taken from the waste dump of the Le Roi and put through the O. K. stamp mill. The ore holding great meetings in Boston, it was successfully demonstrated in The A Chicago dispatch says the storm which raged throughout the middle west on Thursday night stands unparalleled, not only for the extent of the territory over which it raged, but through the O. K. stamp min. The ore holding great meetings in Boston, at was successfully demonstrated in Tremont Temple yesterday afternoon (Feb. 28) that a Prohibition could be equally successfully demonstrated in Tremont Temple yesterday afternoon (Feb. 28) that a Prohibition could be equally successfully demonstrated in Tremont Temple yesterday afternoon (Feb. 28) that a Prohibition could be equally successfully demonstrated in Tremont Temple yesterday afternoon (Feb. 28) that a Prohibition could be equally successfully demonstrated in Tremont Temple yesterday afternoon (Feb. 28) that a Prohibition could be equally successfully demonstrated in Tremont Temple yesterday afternoon (Feb. 28) that a Prohibition could be equally successfully demonstrated in Tremont Temple yesterday afternoon (Feb. 28) that a Prohibition could be equally successfully demonstrated in Tremont Temple yesterday afternoon (Feb. 28) that a Prohibition could be equally successfully demonstrated in Tremont Temple yesterday afternoon (Feb. 28) that a Prohibition could be equally successfully demonstrated in Tremont Temple yesterday afternoon (Feb. 28) that a Prohibition could be equally successfully demonstrated in Tremont Temple yesterday afternoon (Feb. 28) that a Prohibition could be equally successfully demonstrated in Tremont Temple yesterday afternoon (Feb. 28) that a Prohibition could be equally successfully demonstrated in Tremont Temple yesterday afternoon (Feb. 28) that a Prohibition could be equally successfully demonstrated in Tremont Temple yesterday afternoon (Feb. 28) that a Prohibition could be equally successfully demonstrated in Tremont Temple yesterday afternoon (Feb. 28) that a Prohibition could be equally successfully demonstrated in Tremont Temple yesterday afternoon (Feb. 28) that a Prohibition could be equally successfully demonstrated in T per ton, or 75 per cent of gold value, in winning a hearing. Tremont Temwas saved, showing this ore heretofore ple was crowded to the doors, people considered almost valueless, to be practically free-milling, and easily capable were turned away from the doors. Thus tically free-milling, and easily capable of successful treatment. The complete result of the test will not be known until the remaining concentrates have been treated, but it is already established that millions of tons of lowgrade ore which has been thrown on the most of definition of the most of the mos the waste dumps, or left untouched in the mines, wil pay to mine and treat. The problem of Rossland's low-grade benefited because John B. Gough lived benefited because John B. Gough lived The problem of Rossiand's low-grade ore has been solved. This discovery will lead to the establishment of concentrators at the mines. The low-grade ores will be crushed on the grade ores will be crushed on the ground, and the concentrates, after yielding 75 per cent of the gold value, will be sent to the smelter, where most of the remaining gold and copper will be extracted. At the Treadwell mine in Alaska ore running only \$2 French

a ton is successfully mined by this process.

Le Roi has 500,000 tons and Jumbo 700,000 tons of low-grade ore. Nothing else is the dod in the camp since the news of the discovery was made

service than the London Asylum. The services vesterday were under the direction of Rev. M. P. Talling, B.A., of St. James' Presbyterian Church. At the Asylum on Sunday the same regularity prevails in all routine matters as on other days, but the patient has his day of rest the same as those who Miss Tatiana Tolstoy, daughter of sewer after much hard work. While Conciliatory in Its Tone and Tenor,

It States That Her Troops Can not Be Withdrawn From Crete.

The Message Received at the Foreign Office in London,

A British Cabinet Council at Once Held -Salisbury Goes to Windsor to Consult the Queen

London, March 8 .- It is reiterated

The Princess of Wales feels great the left side of the church. This is done generally before the arrival of brother, King George of Greece, and the minister at 9 o'clock, the hour at instead of returning to Sandringham, which the service begins. Yesterday she is remaining in London in the expectation of receiving definite news today of the attitude which Greece will assume. All the dispatches of the

It is learned on good authority that Marys, and were moving southward. In the studied for a life-time, and four points. In the first place, it will be characterized by They did not see the way-freight, bound then not half-understood. Perfect be conciliated in the first place, it will of the powers will be characterized by They did not see the way-freight, bound for London, behind them, until almost too late. The engine struck the handcar just as the men jumped. Three escaped without injury, but William Adams, of this city, had his leg broken by the fall. The way-freight was stoptroops from the Island of Crete, it will offer to place them under the control of the powers, to restore order.
Finally, the reply will meet the statement about the Cretans really preferring autonomy, but suggesting that the Cretans be allowed to choose

> their own Government. RECEIVED IN LONDON.

The reply of Greece to the identical notes of the powers delivered at Athens on Tuesday last, and insisting upon the withdrawal of the Greek troops from Crete and of the Greek fleet from Cretan waters, was received here at noon, and confirmed the fore-cast cabled exclusively to the Associated Press.

CABINET COUNCIL CALLED. A Cabinet council was immediately tubes connected with a small round box held, after which the Marquis of Salisbury went to Windsor in order to con-

Ballot Stuffing.

ficer at the Assizes. Winnipeg, March 8.—Two of the eleven charges against deputy returning officers for ballot stuffing, to defeat the Liberal candidate, in the June election in Macdonald constituency, have been concluded hinney has been found not guilty on the given in both cases was of a highly interest ing character, interspersed with a few legal arguments. The evidence in chief of Freeborn, the principal witness for the Crown substituting one ballot for another. Freeballot, but when the voter returned it after The speaker closed an eloquent ser- marking, the deputy would have one of his prepared ballots ready in his hand. He would place the proper ballot over this, and after tearing the counterfoil off, would calmly substitute his own ballot for it, waiting his chance afterwards to destroy the proper ballot. He kept the ballots returned to him by the accused until he gave them over to the Attorney-General. He

did not give the ballots up to force a criminal prosecution. JOHN G. WOOLEY.

I learn from The Advertiser that John G. Wooley is to lecture in Lon-don on March 9. I am very glad of it, for I have been desirous to see and hear this man, of whom I have heard Rossland, B. C., March 8.—The great-est mineralogical discovery in the his-tory of Train Creek was made during vertised, so that the people for miles

THE PHONENDOSCOPE.

A Newly-Invented Telephone for Locating

consists of a hollow box, about as big as a large-sized watch, furnished with two

serves to put the box in contact with the body of the patient, the button being pressed firmly on the surface just over the organ to be examined. On the opposite side flexible tubes are attached, which convey the sounds from the box to the ears of the operator, or operators, for several persons may listen to the sounds

at the same time. The following description is given in a London paper by one who saw the instrument tested in a Parisian hospital:-"A man stripped to the waist stood in the center of a circle of doctors, each of whom held his ears to a pair of flexible against the patient's breast. A pair of

tubes was also handed to me, and I was

"While we all listened intently Prof. Bianchi gently rubbed his fingers upon the man's skin over the spot where the heart is usually located. Immediately we heard a murmuring sound, and the circle of a ctors expressed satisfaction with grutted exclamations and nods. Suddenly, while the professor continued drawing his fingers in larger and larger circles across the man's breast, the sound ceased. "'Ah! there is no longer the heart there,' said the professor. 'We have touched the end of it.' Whereupon he dabbed a blue pencil mark upon the skin

to indicate the point where his finger had

arrived when the sound stopped. The patient twisted his eyes downward and stared wonderingly at the mark. "Prof. Bianchi resumed his rubbing, while the doctors and I stuffed the tubes once more into our ears. As long as the professor's finger was over the heart we heard the murmuring sound, but the instant the finger passed beyond the boundaries of the hidden organ there was a dead silence in the tube. And at every cessation of the sound the pencil, followed by the strained eyes of the patient, made its mark on the skin. This operation was continued for several minutes, at the expiration of which there appeared, clearly drawn in blue upon the man's breast, the outlines of a misshapen heart. strangely shifted from its right position. But I was glad, for the patient's sake, to

hear the doctors say that it was not a very bad heart, after all. "Next the same method was employed to outline the position and shape of the lungs, the liver, the stomach, and other organs, and, at the end of half an hour, the body, front and back alike, was covered with an intricate series of outline pictures showing his internal structure and condition. Any defect in the form or position of an organ and the existence of diseased places in the lungs was indicated at once by the sound or absence of sound in the tubes. The practiced ear, I was told, could detect a difference in the quality of the sound given by different organs of the body, but to me they nearly all sounded alike, except when the patient was caused to swallow a little water a change in the sound given forth

from the stomach was clearly perceptible. Prof. Bianchi asserted-and a number of members of the Clinical Society of Practitioners of France and the Syndicate of Physicians of Paris and the department of the Seine, who assisted at the experiments, corroborated his assertion-that it would be easy by this pro cess not only to discover general disease, but to locate any foreign body lodged in any of the organs or tissues, as well as to determine the existence and extent of a cancerous or similar internal growth.

Troubles often spring from idleness and grievous toils from needless ease

Headaches

are frequently caused by some defect of the eyes. It you have found no relief from medicine come in and have your eyes examined. It costs you nothing for the examination.
