Lord Dunraven replied to the adverse criticism of the report, saying that the conferees could not lay down a specific formula to be adopted. They were obliged to deal with the matter on the broadest lines, considering both the interests of the nation and those of individual landlords and tenants. He did not think the Government would be able to specify a strict formula, which, if attempted, would confuse the issue. The minor details of any plan based on voluntarism must be left to the purchasers and sellers. The conference only sought to formulate the conditions on which it would be possible to complete the transfer of the land within a reasonable period. "Never in any previous times," said the speaker, 'have Anglo-American relations been more cordial. Both peoples are in fairly good humor with themselves, and so it is unlikely that they should be in a bad humor with each other. I welcome the tendency on the part of the United States to take a larger and keener interest in affairs outside the

A NEW CARTRIDGE Will Be Used in Quelling Riots, But

Will Not Kill.

Washington, Feb. 24. - The war department has sent notice to the gov-ernors of each state that it is prepared to supply them upon demand and according to their legal allowances, with "riot cartridges." This is a new form of ammunition prepared by the experts of the ordnance bureau, to enable officers of the law and soldiers to repel rioters with the least possible loss of life to the "innocent spectator." The shell is like that of the regular one used in the army rifle, with the important exception that instead of the long nickel-plated and steel bullet two balls are placed in the mouth. The design apparently is to secure something of greater range than buckshot, yet not dangerous to persons at a distance. It is effective as to accuracy up to 200 yards.
