Re-appearance of "Jack the Ripper."

LONDON, May 4.—The denizens of Horseley Down, Surrey side of the Thames, were thrown into a fever of excitement this morning on discovery in the river of the lower portion of a woman's body out into two pieces. The rest of the body and legs were nowhere to be seen. The ghastly object is tied in a parcel with a stout cord. Shortly after a parcel of feminine clothing was found at Battersea. Both fragments of the body were wrapped in pieces of cloth, which together had comprised a pair of woman's drawers. On the waist band of the drawers was the name of "Fisher" in indelible ink. It is evident that the clothing found belonged to the murdered woman. A man of the name Fisher was shown to have been large and well developed. She had apparently been in the water about a year. The discovery revived the excitement which prevailed during the period of the Whitechapel horrors and it is generally believed "Jack the Ripper" has resumed his bloody work. At Battersea was found the thigh of a female, showing conclusive evidence of a violent cut from the trunk found at Horseley Down. They too, were wrapped in a piece of a pair of drawers.

THE VALLEY OF DEATH

The Disaster Which Overwhelmed Johnstown.

A Rich and Populous Region Turned Into a Sea of Desolation.

The Number of Dead Now Estimated at 10,000—Harrowing Scenes—Urgent Need of Help.

JOHNSTOWN, June 4.—A sad and gloomy sky, almost as sad and gloomy as the faces under it, shrouded Johnstown to-day. Rain fell all day and added to the misery of the wretched people. The great plain where the best part of Johnstown used to stand is half covered with water. The few sidewalks that escaped the flood were a few inches thick with black, sticky mud, through which tramped a steady procession of people. Many women are left utterly destitute. The tents where people are housed who cannot find other shelter were cold and cheerless. The town seemed like a great tomb. The people of Johnstown have suffered so full of horrors that they cannot express the full extent of the disaster. In fact, when one looks at the sight he is nonplussed and hardly knows what to think. No one can realize the terrible disaster he sees before him. All the bodies which are burned to such an extent that they cannot be recognized, are placed in coffins and buried immediately. Bodies were being dug from the ruins at the rate of one every five minutes and there are at present about fifty bodies lying on the bank. The supply of coffins on the west side of the valley, over and over, grinding a pulp and finally leaving it against an unusually firm foundation or on an eddy. These masses contain the bodies of the dead, and if they do not come soon the burning ruins will have to be stopped, as the stench arising from the place is terrible.
