BEWARE OF THE MICROBE

THE BLOOD IS THE LIFE; and if life is to be preserved and prolonged, an imperative condition is that the blood be pure, rich and active. For all the life which flows in the veins is but one cause, and that cause most undeniably vitiated or impure blood. Without pure blood, the life-giving current is weak and sluggish; therefore, the life-giving current is weak and sluggish, and the life-giving current is weak and sluggish.
