Missionary Intelligence.

INTELLIGENCE FROM REV. G. L. MCKAY.

We are in receipt of another letter from Mr. McKay, our missionary in Formosa, it is dated 5th May. Mr. McKay says: “An English doctor has arrived, and wishes to help me in this great work; therefore I have rented another house for \$2.50 a month. It will make a good hospital for this year, and is connected with my house in which I live, and which I use as a chapel. The foreign community have contributed to help on the work, and without drawing on the Church (save for the house-rent and perhaps a few dollars for incidental expenses), we have enough to carry on the work till the close of the year. I cannot tell you how much good the work I have been carrying on myself has done. Scarcely a day passes without some one applying for my assistance, and, thank God, I have been able to cure scores of poor suffering ones. The doctor comes once every day to assist me. It is all for the sake of the Lord's work, therefore He will bless feeble efforts. I will let you know, from time to time, about the work. Would that the whole Church would pray the Lord of the harvest for a great blessing. I do hope that this will not keep back a doctor from Canada. This man is in the employment of the foreign community, and is employed for a limited time. He cannot attend to work away from here. His sympathies cannot be like those of a medical missionary. In the meantime I am thankful for the assistance; but I hope a doctor will come from Canada before long. It is altogether best for him to take a course in theology. I expect to go into the interior in a week or two. Yesterday I preached in Chinese to a house crowded, and many standing outside. Yours sincerely, G. L. MCKAY.”
