BRIDGE BUILDING !

The attention of Engineers, Contractors, and all Municipal men is called to the merits of the Baer Patent Combination Bridge. This is a combined wood and iron Bridge, so constructed as to allow them to be thoroughly protected from the weather, and at no place throughout the structure is it possible for any water to get into the joints or timber, thus preventing decay and possessing all the qualities of neatness, durability, strength etc., possessed by iron Bridges, and is much cheaper in construction. These Bridges can be built in spans from 30 to 200 feet and over, if necessary. Over 50 of these Bridges have been built throughout Ontario during the past three years, and in every case the greatest satisfaction has been given. References will be cheerfully given.

Estimates and all other particulars furnished on application to
