COMMUNITY ANTENNA TELEVISION SYSTEMS

Question No. 925—Mr. Dube:

Has a meeting taken place in recent weeks between representatives of the National Community Antenna Television Association of Canada, the Canadian Association of Broadcasters, the board of broadcast governors, and the Canadian Broadcasting Corporation and, if so, what decisions were taken at that meeting with reference to community antenna television systems applying to relay by microwave-hops television signals originating from the United States to Canadians in an area where said signals are not otherwise available?

Mr. McBain: Yes. A meeting was held on June 25, 1962. No decisions were taken. A discussion only was intended following which each party was to provide the department with its views in writing. These comments have now been received and the whole question is under study by the government.

CAMPBELLTON, N.B.—MICROWAVE RELAY OF U.S. TELEVISION PROGRAMS

Question No. 926—Mr. Dube:

Has the board of broadcast governors and/or the Department of Transport received an application from North Shore Community Television Ltd. of Kedgwick, N.B., for permission to microwave from Kedgwick, N.B., to Campbellton, N.B., signals originating from an American television station and (a) if so, was said permission granted and (b) if not, what reasons for refusal were given to the applicant?

Mr. McBain: Yes, an application was received by the Department of Transport, (a) no, (b) the licensing policy applied in this case is that the department may give consideration to an application which is predicated on the use of a radio relay where the programs are to be received from a transmitting station located in the United States, provided that the area does not receive any Canadian television service either directly or by C.A.T.V.
