NEW YORK STOCKS RALLY AFTER DIP

Leaders Lose One to Five Points at Opening—U. S. Steel Irregular.

New York, Nov. 8.—The stock market continued at the outset of today's moderate operations to reflect the disturbing influences created by yesterday's armistice hoax. Leaders lost one to five points, but soon recovered, in numerous instances being succeeded by material gains over the previous day's highest quotations.

War stocks were alternately heavy and strong, ending in the main at moderate gains on announcement of the principle of additional orders by the government for various supplies, especially railway equipment.

Restricted money conditions did not prevent a rally in oil, motors and in the later dealings in Locomotive, American Car and various specialties made substantial response to speculative buying.

United States Steel was consistently irregular in its less active movement between the low of 103 1/2 and high of 103 3/4, closing at a net gain of a small fraction. The demand for metals seemed to be founded on tangible grounds, but gains in that quarter were reduced by the general realization of the last hour.

Domestic as well as foreign bonds fell in varying degree or drum, the previous day, Liberty issues, however, displaying firmness.

MOLSONS BANK'S YEAR PROSPEROUS

President Macpherson Speaks on Post-War Problems at Annual Meeting.

At the annual meeting of shareholders of the Molsons Bank, held at Montreal, a highly satisfactory statement, covering results of operations for the fiscal year ended Sept. 30 last, was presented. The bank's general business has grown greatly, as shown in assets, which amount to \$77,638,020, an increase in the past seven years of thirty million dollars.

Interest-bearing deposits have reached a total of \$12,194,559, the largest on record. Net profits for the year amounted to \$214,445, and after payment of dividends and making of various appropriations, including \$100,000 reserved for contingencies, a credit of profit and loss, as against \$18,824 a year ago.

In his address to the shareholders, Mr. Macpherson stated that the outlook in Canada with the end of the war in sight was most encouraging. He pointed out the period of the post-war must necessarily cause some anxiety, but he had every confidence that the development of the country's natural resources would enable Canada to return to a normal condition of business and emphasize the great importance of increasing exports, thus making it easier for the country to bear the financial burden arising out of the war.

In the emergency of war the government exercised its power by regulating business, and that our citizens, and about the people willingly submitted to these times of stress. As the end of the war approaches, the government will be as ready to remove all restrictions as the public will be to free from them, and that our citizens, and about the construction period will show sound judgment, and the government will be as ready to remove all restrictions as the public will be to free from them, and that our citizens, and about the construction period will show sound judgment, and the government will be as ready to remove all restrictions as the public will be to free from them.
