JAMES McKELVEY'S
PATENT CREAM STILL,
Or Portable Cream Gatherer.

This is the first and only great invention for milk on the Continent of America. This Still is of no use in a cellar. It will increase from twenty-five to fifty per cent. more Cream than the average Cellars of Canada. It is used above ground, in any room or wood shed in the summer, and in a room with a stove in winter. It is perfectly clean, and half less work churning in from ten to fifteen minutes in the common Dash Churn in hot weather. Milk will keep sweet in the Still during thunder and lightning weather seventy-two hours.

No cellar in the world can produce as good Butter nor as clean. No flies or dust or vermin there.

This is the most acceptable and best paying invention known. Capacity, from one cow size to seven ditto. Price from 16 to 50 dollars, all the Pans included.

It is necessary to have ice to use the Still in the Summer time.

Manufactured and Sold
BY JAMES McKELVEY,
ST. CATHARINES, ONT.

ONTARIO BALANCED WINDOW BLIND LIFTER,
PATENTED SEPTEMBER, 1870.

This Blind Lifter is acknowledged the simplest, and superior to any thing yet before the public. It can be adjusted to any size Blind, or to any material. It rolls up even without wrinkling the blind whatever, and remains at any height without fastening.

Country Rights can be obtained, by applying to the Manufacturer,

SAMUEL PALING,
WOODSTOCK, ONT.
