Other good features on the new bill include Jim and Irene Marlyn in a musical skit with clever dancing; Peggy Vincent in a surprise singing; "The Terrible Judge"; and Harry Johnson, brother of the famous Al Johnson of the New York Winter Garden show, in operatic comedy and brand new witticisms hot from the griddle.

PICTURES SHOW 7 KNOCKDOWNS IN FIRST ROUND. Tuesday, July 8.—All doubt concerning the number of knockdowns Dempsey scored in the first round of his heavy-weight championship contest with Jess Willard, July 4, was removed today when motion pictures, exhibited privately to Promoter Richard and a party of friends, revealed that the dethroned champion was sent to the canvas seven times. There were no knockdowns in the remaining two rounds, but Willard probably would have been felled if the ropes of the ring had not supported him.

Future prizefighter Jess Willard left with left hooks to the chin for the first four knockdowns. He upset the defeated champion with right and left swings. The first blow that upset Willard was a short right swing to the heart followed by a left hook to the chin.

ARREST OF 127 WOMEN AND 87 MEN LAST NIGHT IN BIG MONTREAL RAID. Montreal, July 8.—One of the biggest police raids ever made in the city was that of last night when twenty alleged bootleggers and their associates were reported and the department of the men was all that could be desired. There were a few claims for damages but these were all satisfactorily adjusted. One case was reported where one of the house-holders near the circus grounds had a bottle of milk and one of the circus men confessed to having taken it, and compensation was made. A woman complained that she had been robbed of a pair of shoes and one of the circus men admitted the fault but said he was sold out of half-price. The difference was refunded the woman.

CIRCUS LIVED UP TO GOOD REPUTATION. Commissioner Thornton said this morning, in speaking of the circus, that he had a most favorable impression. So far there had been no cases of pick-pocketing or other gross misdemeanors.

ALBERTA SHOWS GREAT PROGRESS IN SOCIAL LEGISLATION. Mrs. Kneill, Here Yesterday, Speaks of Work Done. Public Health Nurses, Municipal Hospitals, Care of Delinquent Children, Children's Bearing House, Mothers' Pensions and Women Magistrates.

An interesting visitor to the city yesterday was Mrs. Kneill of Edmonton, Alberta, of the department of immigration and colonization, who is making a survey of the existing facilities in Canada for the reception, care and oversight of home servants arriving from the other side of the Atlantic.

Mrs. Kneill, who is a native of Prince Edward Island, has been living in the west for several years and has taken a great interest in social welfare, particularly with regard to women and children.

She told the Times of a few of the laws, institutions and regulations which existed in Alberta for the protection, instruction and general social welfare of children. In the province there are at present thirteen public health nurses, the various municipalities working under the department of public health.

There are two municipalities in the province and they are assisted by a big staff of workers at each of the centres. Provision is made in the various homes for the segregation of the delinquent children from the others, and special attention paid to their full care.

Homes are found where possible for neglected children, and the department still keeps in touch with all who have gone out for adoption. Arrangements are made so that Catholic and Protestant children can be kept separate.

In Edmonton there has been provided a children's bearing house under the care of a matron who is a trained nurse. There the children of widowers, etc., are looked after while they are attending school. It is non-sectarian and children can remain there until they reach the age when they are allowed to go to work. The factory act will not permit the employment of children under fifteen.

Two interesting features of child welfare work recently introduced in Alberta are the establishment of mothers' pensions in the respective municipalities. All cases against women and children are dealt with by the women magistrates, and it is found that a great deal of good is resulting from this innovation. The saying that it takes a woman to see through the wiles of women seems to be working out in this system of women magistrates, and in the case of delinquent children the system is working well.

Mrs. Kneill said that the west was far ahead of the east with regard to all kinds of children's welfare work, but she paid a great tribute to the maritime province people who are now numbered among the prominent citizens of the western provinces.

In their care of the feeble-minded, homes have been founded where the patients are received, examined and graded according to their mental condition, and then a system of schooling is applied under expert supervision which is working out excellently.

In Alberta a venereal diseases act is being passed which will do a lot toward stamping out these dread diseases. The act is to provide for free treatment and the care of those suffering from the disease, and every precaution taken for the prevention of the spread of disease.
