The Chilkat

Squeiched by the United States Soldiers--Chiefs and Braves in Gaol.

A Big Crowd of Destitute Men at Dawson--No New Strikes.

News is brought from Skagway that the outbreak among the Chilkat Indians, who built a barrier across the new trail white men were building from ped and turned back every one who attempted to pass on to the Porcupine disin the Skagway city jail cooped up in a 10x12 pen, serving out a thirty-day sentence for the unprosaic crime "of obstructing a highway," and thinking that after all, despite the sayings of "Rudyard" that there does run "a law of God and man, to the north of 53."

The arrests were made by United States Marshal Tanner, aided by a detachment of ten United States regulars from the Dyea reservation. The Indians were found about eighteen in number, all armed with rifles, at a point about eight miles from Haines Mission, where they had erected a fence about four feet high of boards, trees and barbed wire, built across the canyon. The diers were too much for the Indians. and they wilted at once, obeying the marshal like lambs, and all getting into their canoes and floating down at his bid-He brought them to Haines and the next morning, Wednesday, April 26. were tried before Commissioner Sehlbrede, and eight of the ringleaders found guilty. The Indians attempted no The marshal handcuffed the prisoners

pairs, which hurt their pride, espethe chiefs, who protested loudly, out without avail, and it resulted in the Indian's casting evil glances at Tanner that portend no good to him. The two chiefs are Koda-Wat and Yeath-Kok. Both are hard customers, and don't beie their looks. Koda-Wa't served a twoear term in San Quentin for resisting an officer several years ago. The troops are still camped on the mission grounds, The new trail now building on the for hippers. Cables from Manchester north side of the Chilkat river has not were encouraging to shippers. Trade was een used very much, and the Indians good and cattle shippers made considerhave a good source of revenue from the money.

Canoeing people up the river. When the Brantford, May 5.—Aurillia Sutherthey stopped it. recommended that Hartley Bay be taken from Bella Bella and transferred to the Simpson district. It was suggested that Bella Coola, Kitimaat and Rivers Inlet be added to the Simpson distract, but this

Rev. S. S. Osterhout made a valuable suggestion during the day, looking towards the education of the native chil ren in standard trades, and Rev. Mr. Woodsworth, the general secretary, addressed the conference on the subject of the best method for securing the most effective service by the missionary steamer. The legislation to be recommended on the potlatch question was on the agenda paper for consideration, but was not reached, being taken up this

STRANDED AND DESPERATE. An Ontario Party in a Bad Way on the Liard.

Following closely upon the news of starvation at Dease lake, as told in yesterday's Times, comes the information that another northern party is in desperlimines Mission to Kluckwan, and stop- ate straits. A letter has been received from Dr. Burke, of Blenheim, Ont., who is with the party sent out by the Penintrict, is now squelched, and eight of sula Gold Mining & Development Comthe braves, including two chiefs, are now pany, that unless money and provisions reach them at once they will perish form The party consisted of sixteen men,

and was under the command of Major J. E. Johnson, formerly Mayor of Leamington, and editor of the Post there. Major Johnson was manager of the company, and although about fifty years of age, personally undertook the leadership of the expedition. The Edmonton route was selected, and Major Johnston led the party to a point on the Liard river where a camp was established for the winter. The conductor of the party managed to secure passage out by the last steamer in the fall, and spent the winter in the east with his family, intending to rejoin the party this spring. The command of the party, in the bsence of the leader, has devolved on Dr. Burke, and his letter indicates that the expedition has reached a stage where the motto of the members may well be expressed in "Sauve qui pent."

Is not so much in the features as in a clear healthy complexion, and a plump body filled with the vigor and vitality of perfect health. Pale, weak, languid women are fully restored to robust health by the use of Dr. A. W. Chase's Nerve Food, a condensed food which creates rich, pure blood

Valuable Hints to Persons in Search of Mineral Treasure.

City Republican, says: "Even with the best of management it is an exceptionally good prospect that will pay cost of development

"Prospecting should be a business t itself, and those engaged in it should be educated and trained for the work. Prospeccing companies would do well to equip and send into the field only those who have a practical and comprehensive knowledge of geology, rock, vein formation, faults, ores, minerals and assaying

"Pay ore is ore that will leave profit after mining, milling, transportation and other expenses are deducted from the average saving. Ore is said to be 'in sight' when it is blocked out into patches of moderate size and exposed to view on three sides. If one side only of the ore body is shown no ore can be counted, but where two adjoining sides are exposed to view a triangular body may be safely calculated as 'in sight.' A single tunnel driven through ore for a considerthe floor or roof, affords only presumptive evidence of the continuance of the ore

oody much above or below the tunnel.

"Mining properties of all kinds are valable only for the ore they contain. in quantity too small for a profitable working the mine has no real value; so, also, if the property is undeveloped and shows no ore 'in sight' it has no real or true value. Surface ore exposures are valuable only for what they promise or for what they are supposed to reveal. The revelations of outcrops are differently interpreted by different persons; there s no infallible guide to their meaning. Herein is the element of risk in the purchase of prospects. It is different with worth the net value of ore blocked out. plus its presumptive or estimated value. The latter is the value of ore which may be found beyond the present working and which is supposed to be available for mining. The estimated value is to be determined by the geological conditions of the mine, as well as of the district in

general, and is largely a question of opinion.
"Following are some of the factors to be considered in deciding a mine's value Montreal, May 5.—Private cables from and its ability to pay a profit, viz.: Purchase price, production, timber or coal supply, water for mill and power purposes, railroad facilities, roads, altitudes, climatic conditions, living expenses, wages, mine and mill management, location f property, character and value of ore, freight rates, ore markets, smelting facil

ities, and the probable life of the mine. "Frequent cross-cutting is of the utmost importance to successful mining. Ore bodies equally as good or better than the one being worked, are by this procedure not infrequently encountered Cross-cuts have often revealed the existence of one or more parallel veins. Sheet count on soldiers. The two chiefs are tor of St. John, N.B., will succeed the veins and link veins have thus been discovered. Immense chambers of aggre gate deposits, the existence of which had Pyramid Harbor to create the uprising. Winnipeg, May 5. Jas. Robb, of never been suspected, have been opened Late arrivals from Dawson say that Scandinavia, has accidentally killed him-up by cross-cuting. Every mineralof the 10,000 men now at Dawson City self. He had been using a rifle and left stained seam or decomposed portion of a 5,000 are "broke" and almost destitute. it standing loaded against the side of the vein wall should be looked upon with 35 miles in length, is to be constructed American smelters have held this camp's now being put in.

"The age of rock formation in itself tion of valuable ore deposits. Formerly the oldest rocks were thought to be the considered is not maverial to the deposionly bearers of true mineral veins, but which assays 46 per cent copper and the occurrence of many such veins in the younger rocks has taught us that the chief conditions governing ore depositions ping at an early date. are entirely independent of the age of

rocks, and that no formations are excluded from ore-bearing possibilities. for the occurrence and discovery of mineral verns viz: Where the strata have been upheaved, folded and fractured; where dike and intrusive sheets of porphyry or other eruptives occur; along, in thing of the curative powers of Doan's or near to fault plane; where intense metamorphism has prevailed; on the

> "The character of ore in one lode does not govern the kind of ore in adjoining lodes. The ore may be the same or very different. Neither is it true that because one vein of a group is good, therefore adjoining parallel veins are necessarily good. Brothers of a family are often

> quite unlike. "It is never safe to appoint as superintendent of a mine one who has not a practical knowledge of mining. Success other pursuits will not atone for ignorance in this. Incompetent management is sure to stamp a mining enterprise with the seal of failure. As the process should be adapted to the ore, so should the man be suited to his work.

Kootenay contains an interesting de- May that 50 properties will be under May that 50 properties will be under scription of a visit to the Silver King development work on Toby, Horse Thief property of the Hall Mines Company, and Boulder creeks alone. of the comfort and security afforded to them by Dr. Williams' Pink Pills.

Headaches and Backaches that come expectedly or unexpectedly are charmed away, and the rich, red blood made by

Dr. Williams' Pink Pills for Pale People

shows itself in the rosy cheeks and clear, bright eyes of those who use them. These pills are not a purgative; they give strength instead of taking it away. They act directly on the blood and nerves; invigorate the body; regulate the functions, and restore health and strength to the exhausted woman when every effort of the physician proves unavailing. Mothers anxious for the healthy development of their growing girls should insist upon their taking Dr. Williams' Pink Pills.

IN A DECLINE.

Mrs. W. Goodwin, Argyle Sound, N.S., says :- "After the birth of my first child I was in poor health and unable to recover my strength. I had a severe pain in my lest side and lung, which almost made it impossible for me to breathe. I had a bad cough day and night, and was troubled with night sweats, and on awakening found myself very weak. My complexion was sallow, and my appetite entirely gone. All my friends believed me in a decline. Our family physician attended me for a long time but I got no better. Then a friend advised me to try Dr. Williams' Pink Pills. Acting on this atlvice I bought a supply, and continued their use for a couple of months, when my health was fully restored. I am sincere in saying that I believe Dr. Williams' Pink Pills saved my life."

The wonderful success of this remedy has led to many attempts at imitation and substitution, but these never cured anyone. Refuse any package that does not bear the full name "Dr. Williams' Pink Pills for Pale People." Put up in packages that look like the engraving on the right, the wrapper printed in red ink Sold by all dealers, but if in doubt send to the Dr. Williams Medicine Co., Brockville, Ont, and they will be mailed post paid at 50 cents a box, or six boxes for \$2 50.
