

FARM AND DAIRY

April 1, 1915

The policy of shipping light has been continued by country drivers and it is being planned to bring in more cattle. The market for light cattle has also had its effect on the market. From the farm end it is being brought to bring in a larger number of cattle of good quality. The price of the extra well finished stock brought as high as \$32. The end of the week found the yards well cleaned.

The stocker trade has been light, principally because of recent rains. Farmers and buyers referred to last week in three columns, who were expected to be back this week, did not come. The future of the stocker trade does not look good. Buying cattle and feeding them up, and the fact of the low price of production, and the fact that so many feeders have lost money in the last few months will discourage buyers from getting into the game.

Quotations range as follows: Easter steers and heifers, \$7.75; light steers and heifers, \$7.35 to \$7.65; bunchy doves, \$5.50 to \$7.35; heifers, \$5.50 to \$7.25; light bulls, \$6.75 to \$8.75; feeders, \$6.25 to \$6.75; bulls, \$6.50 to \$8.75; calves, \$6.75 to \$7.75; cattle and cut steers, \$7.75 to \$8.75.

Mutton animals are strong. Lambs, \$9.50 to \$12.50; heavy to \$18.00; lambs, \$7.75 to \$12; light wows, \$6 to \$8; heavy sheep and bucks, \$5 to \$6; ewes, \$1 to \$2.

Hogs continue in strength and have regained some of the ground lost earlier in the year. \$8 to \$8.50. U.S. country pigs,

HOLSTEINS AGAIN ON TOP

I am glad to be able to announce that the Holstein-Friesian herd at Flandersburg, Ohio, has broken all records for fat production, not only Holstein-Friesian but those of all other breeds. The production record is as follows: 1. Milk containing 1.116.05 lbs. fat. She freshened at the age of three years four months 14 days. 2. Milk containing 1.116.05 lbs. fat. Payne, 666353; her dam is Mutual Hollingen Payne, 111849. She was bred by Mr. W. A. McElroy, and is now owned by The Somerset Holstein Breeders' Company, Somerville, N. J., and is now owned by The Somerset Holstein Breeders' Company, Somerville, N. J. She is the result of a cross between a cow of the New Jersey Agricultural College, and eight different super purebreds employed in the production of fat. She has produced no fat produced any competitor, but her maker could make 1.202.06 lbs. of fat the best commercial herd in Hollingen Payne for the year's test.
