

Dairy Cattle at Sherbrooke Fair

HOLSTEIN and Ayrshire breeders made creditable exhibits at the Sherbrooke exhibition, held during the week of September 3. In the Province of Quebec, which is the home of some of the best Ayrshire herds on the continent, it was to be expected that this breed would make a strong showing. Nor were the admirers of the great Scotch dairy breed disappointed. Most of the classes were well filled and the quality of the animals was of the best. G. H. Montgomery, Phillipsburg, Quebec, annexed the grand champion ribbon for bulls with Aucherbrain Seaform, Imp. The championship in the female classes also went to Montgomery on Morton Mains Greenside. Besides Mr. Montgomery, the principal exhibitors were Alfred Gingras, St. Cesaire; D. T. Ness, Howick; A. Phaneuf, St. Antoine; W. D. Parker, Compton; M. St. Marie, Compton, and P. J. Whitcombe, Massawippi. The animals were placed by Mr. J. H. Grisdale, of Ottawa.

The grand championship Holstein bull was Faforit Schulling Poesch, owned by Harding Bros., Wexford, N.B. This firm also captured the female championship with Shadelawn Aulinda 2nd. H. Wise, Sherbrooke; J. J. Alexander, St. Louis Station; Wm. Clark, Wakeville; C. E. Rose, Barnston; W. Clarke, Waterville; W. J. Arberry, Sherbrooke; W. F. Parker, Hatley; W. J. Parnell, Lennoxville, and C. C. Hanson, Dixville, were successful in getting into the prize money. Mr. A. S. Stevenson, Lancaster, did the placing.

The Problem of the Country

(Continued from page 3.)

mental machinery may be silent. The minister in the country is there because he can not get out of it.

You must note that city churches are in strategic centres. They grow because of members received by certificates from country churches. How many reports have you seen written regarding a country church, though it has given to the city leaders in every walk of life? Even our church colleges grant to the ministers of the city their coveted degrees of Doctor, etc., while men of the country, with deeper scholarship, men who have braved the winter's storms for 35 or 50 years, men who have inspired virile young men with the noblest heroism in achievement, men of God, who are the backbone of the commonwealth, yet veritable Bishops of Christ's church, are passed over. However good, degrees are not necessary for effective work in the country, but seem to be a necessity in the city, since men need all these honors in order to keep their place.

Renfrew Standard

Truly Reliable

You can absolutely rely on the accuracy of the Renfrew Truck Scale. Each one is tested by the Government, and a Government Inspector's Certificate is attached to each scale. There is practically nothing to wear out or get out of order so that you can depend on the scale to keep weighing accurately for years. You can weigh anything on the Renfrew Truck Scale from one pound to two thousand, whether small or large, alive or dead. Wheels around like a truck. The handiest scale for farm use. Every farmer needs one. Write for scale booklet.

The Renfrew Standard gasoline engine starts without cranking. Has both batteries and high tension magnet. Can be as closely regulated as a steam engine. Has a carburetor that saves gasoline. Built on large and strong. All styles from 1 1/2 h.p. to 60 h.p. Write for engine catalog.

The Standard cream separator has increased the cream profits of thousands of Canadian dairymen. It skims to .01 per cent, and gives cream with the butter fat globules unbroken—cream that makes high-class firm butter. It turns easily, the gears all running in a bath of oil. Its interchangeable capacity enables the size of the bowl and discs to be changed and the capacity increased or decreased at any time without purchasing an entirely new machine. This is a feature that is appreciated by dairymen, who increase the size of their herds from time to time. This feature and others are explained fully in our separator catalog. Write for a copy.
