

AN INTERROGATORY.

To the Editor of THE HOME JOURNAL.

SIR In Thursday morning's *Colonist*, I saw a public meeting called for Tuesday next, to consider Victoria's water supply, by the editor of the *Province*. Now, sir, the editor of THE HOME JOURNAL we know—the editors of the *Colonist* and *Times* we've heard of; but, in the name of all that is lovely, who is the editor of the *Province*? I am astonished at the Board of Trade lending themselves to such a means of advertising a publication that very few people have ever heard of. I should have thought some public man, or at least somebody we had heard of before, would have taken the initiative in such an important project. Who will be represented at the meeting—the people or the la da da element only?

Yours truly, WATER.

Our poultry notes are unavoidably crowded out this week.

The field trial between two of the Andie Gladstone pups will take place on or about 1st October.

versity Graduates. University, Professional,
Commercial and Modern Courses.

Reasonable fees. Cricket, football, swimming,
athletics, etc.

PRINCIPAL: J. W. CHURCH.

Autumn Term begins Sept. 10th, 1894.

The Chase Metallic
Roof-Plate.

POINTS OF SUPERIORITY:

A Metallic Conducting Plate, covering the
roof of the mouth.

Thinness and perfect adaptation of the same.
The accuracy of adaptation to that portion
of the alveolar ridge with which the rubber or
celluloid comes in contact.

A plate when made by this method is much
lighter than an all gold plate, hence more
pleasing to the patient.

The metallic roof-plate cannot become de-
tached from the rubber, as the peculiar con-
struction renders it impossible.

It is one of the most cleanly, durable, com-
fortable and beautiful dentures ever devised.

The metallic plate can be reswaged in case
of absorption or shrinkage of the mouth, thus
saving the expense of new metal.

These plates can be fitted to any mouth,
however irregular or ill shaped.

Enunciation is much better than when the
roof of the mouth is covered by a rubber or cell-
uloid plate.

Perfect conduction of heat and cold, there-
by preventing inflammation of the mucous
membrane.

The peculiar and original method of making
these Plates renders it possible to give to
the patient the advantages of both a
Metallic and Rubber Plate at a
price within the reach of all.
