PLOUGHING TRACTORS.

Yesterday there was a demonstration of the capabilities of the Ford and Cleveland Tractors as pulling units in Truro. Both machines threw up their hands and balked at the road machine. They clearly showed that they both lacked the strength to handle a job of this sort and the repair of our highways, so the highway commission thought as they looked on, will have to depend upon the horses or the patient ox.

At the ploughing though, the tractors sang a different story. The Ford walked along without a hitch, was turning sod from the start, while a another Ford tractor pulled a set of disk harrows and pulverized the ground. The exhibition with the higher priced Cleveland tractor, the one with the caterpillar tread, was not successful very possibly because it was not attached to a plow suitable for its needs.

HUNS OWN ZEEBRUGEE SERIOUSLY DAMAGED.

London, May 7—That the recent British attack on the submarine base at Zeebrugge was successful is admitted by the Frankfurter Zeitung in commenting on the affair. The newspaper urges that the German navy take measures to deal "With an antagonism of remarkable boldness. It would be foolish to deny," it says, "that the British fleet scored a great success thru a fanatically audacious stroke in penetrating into one of the most important strongholds over which the German flag floats. However unpleasant it may be, we must frankly admit, that the enemy ships actually entered the port of Zeebrugge. That being so there is no reason why they should not achieve a similar feat at other times. It therefore behooves our navy command to be alert for we have to deal with an antagonist of remarkable boldness."

GOOD AERIAL WORK ON ZEEBRUGGE.

London, May 7—Naval aerial contingents, working from Dunkirk have carried out bombing operations against Ostend. West end and the Mole, lock gates and seaplane base at Zeebrugge and enemy shipping in the vicinity, the admiralty announcement says last night. In the course of the offensive one enemy two-seated air-planes was destroyed and another driven down out of control. One British machine failed to return.
