Champagae Delhikers.

In 1896-7 the champagne district exported more than 28,000,000 bottles of wine, says The Economiste Francise, France's best customer in this industry is England. Our exporters find me the United Kingdom an excellent market. In 1894 and in the first months of 1895 the exports Pfor this market fell off somewhat, like all others, but in the second half of 1895 the business became more active and the diminution of our importations in England, which was 44,000 dozens of bottles for the first six months of 1895, was more than made up in the six months. The American narket does not come up to expectations, and champagne wines have suffered from the effects of the recent commercial stagnation in that country. The exportations to Belgium, Germany and Russia have increased in the same proportion as those of England.

The Word 'Toast,"

tury will close with over 300,000. Of the present number about one-half are in this country. The cost of ruilroads all over the world, thus far, has beer \$36,685,000,000, and it is estimated that the street ruilways cost \$2,500,000,000 people. These are big figures, but the railroads represent a vast interest in the world's wealth.—Baltimore American.

DEER HUNTING

The Seribe of the Reporter Resounts the "Annals of the Hant" for the Edification of Readers of this Paper.

It is eighteen years since the Scribe of the Reporter first shouldered his gun and started out to the north woods in search of game and adventure. Many strange stories have been received in the past, and the expressed desire, both verbally and by letter, of readers of the Reporter, have induced the Scribe to again attempt to entertain them with an account of this year's hunt.

It might be interesting to those who have not had the privilege to follow all the years' annals to give a short retrospective glance over the last few years and give the place where the hunt for each year took place and the number of deer killed. It is only loss of yore; Brook ville, will be called plain was chosen as president and E. A. Geiger of the Reporter Resounts the membership limited to 9 hunters and a cook. The Muskoka district was picked upon as the location for the annual hunt, and Lake Me-Sa-Sag a-Saw or "Lake of Many Islands," as the headquarters for hunting.

The party for 1897 was made up as follows: The president, Phil Halladay Elgin, will retain his old sobriquet of the "Machine Agent"; E. A. Geiger of the Reporter have been received in the party for 1897 was made up as for the collows: The Muskoka district was picked upon as the location for the annual hunt, and Lake Me-Sa-Sag a-Saw or "Lake of Many Islands," as the headquarters for hunting.

The party for 1897 was made up as for the Collows: The president, Phil Halladay Elgin, will retain his old sobriquet of the "Machine Agent"; E. A. Geiger of the club in the summer of 1897.

o Gallant Swain's Surprise and How

A young gentlemen, whose gallantry was largely in excess of his pecuniary means, sought to remedy this defect and shive the money required for the purchase of expensive flowers by arranging with a gardener to let him have a bought from time to time in return for his cast-off clothase.

It thus happened one day that he received a brunch of the most beautiful roses, which he at once sent off to his lady love. In sure anticipation of a friendly welcome he called at the house of the lady the same evening, and was not a little surprised at the frosty reception he met with.

"You sent me a note to-day,"the young lady remarked, after a pause, in the Long boas are fastened at the and belt with jeweled pins in the White cloth skirts are considered very chic to wear with the fancy blouse waist for semi-evening dress.

Just Where He Would Go. An amusing incident was witnessed at one of the precinct polling places the other day during registration, while an effort was being made to keep out-of-town students from registering. A big awkward medical student presented himself. He looked as though he could be casily tripped up on questions, and he was picked out for "a soft mark," but right there was where the challenger mede a mistake, as results proved. The student was beighter than he looked. The following dialogue ensued:
"Where do you live?"

For reply the student gave his street number.

ror reply the student gave his accer-number.
"Yes, but where is your home?"
"Columbus."
"Columbus."
"Well, where would you go if you were sick?"
This was intended to make him give the name of the place whence he came to Columbus, but it didn't. He promptly replied: replied:
"Why, I would go to bed."
He registered.—Columbus Dispatch. Diet in Fiji.

not as lofty as your style, or you lid have broken your neck."—Sas A Kural Tollet Ciub.

a quantity of pink and silver-gray ostrich feather as trimming.

New Fashlon-In .iewelry.

To begin with, says a writer in The Lady's Pictorial, there are the new heart-shaped lockets, destined to hang below the waist, atter the pretty fashlon introduced by Ellaline Terriss—one of these is an absolute necessity of the moment; the very latest displaying either a diamond shamrock leaf, a sprawling toroise, or an inner heart with many little diamonds encircling a central opal.

Among the other decidedly pretty things in the way of diamonds are those slides for a neckfand of ribbon velve-with a diamond heart to hang from the centre. These bands of velvet—so decorated—are the most approved finish to any of the diamond slides can be utilized for other purposes when so desired, and figure with excellent effect on a narrow waisband. Indeed, most of the fashlonable jewelry is designed with a view of doing double duty in this weg. Furthermore, to conclude the fintroduction of our sketch s, there is that gold brooch where one great diamond shazes out, its magnite trace contrasted with the daintiness of that little diamond shazerock last with as single pearl affixed to the prettily-curved stalk. A novel arrangement of opals and diamonds is shown in another brooch; and then there is that lovely diamond crescent which bears the out-den of a glittering spray of the little diamond-petaled flowers and leaves.

mitted."
"But, Your Honor," protested the bi-cyclist, "I rang my bell when I was half a block away, and he paid no attention to it."—Chicago Post.

From Talk to Action.

"Here I have been going with you for a year and have yet to kiss you for the first time," he said complainingly,

"I bave thought of it a thousand times," abe answered, "but you understand the social restrictions to which my sex is subjected."

Then the bonds of conventionalisms were broken and for some time there was a sound that was not that of conversation.

Teacher-Willie, that is not the way to spell "emperor." You should not end the word with an "e-r." If you will no-tice all titles denoting power and great-

PARODY FOR THE PRESENT.

The warld may tremble at her call, Wil bounct doffed and a' that; Her voice may fill the council hall; She bides at less for a' that, For a' that and a' that, Our duds usurped and a' that, The one who warks to pay the gowd, He is the may for a' that, GROWTH OF NAILS.

hose on the Middle Fingers Are the Most Rapid. Those on the Middle Fingers Are the Most Rapid.

Fingernails, like hair, grow faster in summer than in winter. The nails of two fingers never grow with the same degree of rapidity.

The nail of the middle finger grows with the greatest rapidity, and that of the thingernail is 1-32 of an inch per week, or a little more than an inch and a half per year. The growth, however, depends to a great extent upon the rate of nutrition, and during periods of sick-mess or of abstinence it is retarded.

Authorities differ with regard to the equality of growth on both hands, some holding that the nails of the right hand grow faster than those of the left, but others can perceive no difference tween them. According to the rate growth stated, the average time for each fingernail to grow its full, is about four and a half months, at this rate a man of 70 would have newed his nails 186 times. Taking length of each nail at half an inch would have grown 7 feet 9 inche nail on each finger, and on all his ers and thumbs an aggregate lengt 77 feet 6 inches.—New York Jour
