English markets seem to have been quiet in the latter part of last week; notwithstanding a continental demand, the tendency of prices was downward; the only cause assigned is an improvement in the weather but we suspect that the increase in the quantity of wheat and flour afloat had something to do with it. That amounted on the 7th inst., to 1.675,000 grs. showing an increase of 150,000 qrs on the week, against 1,496,000 on the 24th ult., and 722,000 at the corresponding date last year. The total supply of wheat and flour in 500 to 390,312 grs., v. 411,000 to 420,624 grs. weekly consumption, indicating a deficiency under con-sumption of 30,387 to 48,500 grs. The supply 640,000 bushels, v. an average weekly consumption in 1877 of 1,261,124 bushels, v. 1,390,774 bushels in 1876, and 773,858 bushels in 1875. Further cable advices to the 5th inst. state that fine weather had improved the wheat plant considerably. Millers were reserved in their purvance, and occasionally slightly declined. Farmers, however, held so little corn that they also were reserved and thus markets were unsettled. The price of foreign wheat was difficult to maintain, wing to heavy shipments from the United States. The approximate quantity of grain on passage for the United Kingdom for orders, expected to arrive during the four weeks from July 24 to August 21, is:—Wheat, 210,000 qrs, comprising 18,000 qrs Rates BY STRAMER—The rates to Montreal have been unchanged to 15c for flour, and 4½ for grain; and to Kingston and Prescott at 10c for flour and 1½ for grain.

Atlantic ports, 55,000 qrs from California, and 90,000 qrs from Chili and Australia maize, 34,000 qrs, all from Atlantic ports. Continental advices by mail are rather meagre. Harvest was concluded in the south of France; the quality of wheat was above the average, but the quantity-varied in different localities. In the east ern provinces wheat was not expected to reach over two-thirds of an average crop. In the west, prospects were brighter than a fortuight previously, but now of the expenses of the contract of the contract of the above per cental. The approximate quantity of grain on passage for pects were brighter than a fortnight previously, but none of the crops was expected to reach an average. Offerings of French wheat were small at average. Offerings of French wheat were small at Paris; and foreign wheat held for an advance. At Marseilles offerings were small, trade active and prices advancing. The Dutch and German markets were tending rather in sellers favour. At Antwerp wheat and rye slightly advanced in value. At Berlin wheat only maintained prayious succeptions had four in bags 34c to Liverpool. lin wheat only maintained previous quotations, but rye was held for a fractional improvement in price.
