Children Love Candy Cascarets
Careful mothers know that Cascarets in the home mean less sickness, less trouble, less worry, less cost. When one of the kiddies has a white tongue, feverish breath, sour stomach or a cold, a Cascaret quickly and harmlessly "works" the poisons from the liver and bowels and all is well again.

Children Love Candy Cascarets
Careful mothers know that Cascarets in the home mean less sickness, less trouble, less worry, less cost. When one of the kiddies has a white tongue, feverish breath, sour stomach or a cold, a Cascaret quickly and harmlessly "works" the poisons from the liver and bowels and all is well again.
TO MOTHERS! While all children detest castor oil, calomel, pills and laxatives, they really love to take Cascarets because they taste like candy. Cascarets "work" the nasty bile, sour fermentations and constipation poison from the child's tender stomach, liver and bowels without pain or griping. Cascarets never disappoint the worried mother. Each 10 cent box contains directions for children aged one year old and upwards.

VIEWS OF STRIKING EMPLOYEES

Editor The Journal, St. Catharines.
Dear Sir: Pursuant to the "advised policy" of the Beaver Wood Fibre Company and on behalf of the striking employees, members of the International Brotherhood of Papermakers, I desire to reply to some of the statements made by the above-mentioned Company, under date of June 19th. I would thank you to publish same in order that the position of the striking employees might be placed in its true light. Space will not permit me to reply in detail, however, I therefore, will try to be as explicit as possible.
As a matter of explanation it is my desire to take up the matter of Mr. G. C. Robinson's statement regarding "a Mr. Nellegar" who stated he was an organizer. To this I wish to say that Mr. Nellegar is not only an organizer for the International Brotherhood of Papermakers but is also General Organizer for the American Federation of Labor. It is true that Mr. Nellegar called upon Mr. Robinson at the Buffalo office of the Beaver Company and presented demands and memorandum of agreement and it is also true that Mr. Robinson stated the position of his Company and the arbitrary position the employees had taken. Mr. Robinson further explains that Mr. Nellegar called him in the phone at ten minutes after eleven on the morning of June 17th. I desire to say that this is also true but as a matter of fact Mr. Nellegar endeavored to communicate with Mr. Robinson as early as nine o'clock of the same morning but was unable to do so, due to the fact that Mr. Robinson was absent from the Buffalo office.
On the morning above mentioned Mr. Robinson was at the mill in Thorold where he had gone for the purpose of meeting with the members of the Union.
I desire to say further, that as early as Friday morning June 13th, Mr. Nellegar was in communication with the Buffalo office of the Beaver Company and endeavored to communicate with Mr. McGlashan or any other accredited representative, receiving the advice, that Mr. McGlashan was absent in Europe and that the authority to appeal to was Mr. Robinson. This information was given by a Mr. Davis who advised that Mr. Robinson was absent from the city and would not return until Saturday or Monday. The nature of Mr. Nellegar's business was communicated to Mr. Davis who I have reason to believe communicated with some representative of the Company, for the reason that on the same afternoon, Friday, a notice was posted in the mill at Thorold to the effect that the grinder room help would go on the eight hour basis on Monday morning, June 16th. In my opinion that is considerably more time given the company than the fifty minutes mentioned in the article which appeared in The Standard.
For past four weeks work of organizing has been going on among the employees of the mill at Thorold and it is safe to say that the Company was well aware of the intention of their employees.
It has been stated that the demands of the employees are arbitrary and that the grievances are imaginary. Let me ask if when men are compelled to work eleven and thirteen hours they have not grievance enough and especially when they are coming against their fellow workers in other localities who are compelled to work eight hours only. Let me ask again, if a demand should not be made for good lavatories and sanitation, and further, if unfiltered water pumped from the canal is not grievance

LEMONS BEAUTIFY!

Strain lemon juice well before mixing and massage face, neck, arms, hands.
Here is told how to prepare an inexpensive lemon lotion which can be used to bring back to your skin the sweet freshness of which it has been robbed by trying atmospheric conditions. Wind-chafe, roughness, tan and redness are warded off and those tell-tale lines of care or age are softened away.
The juice of two fresh lemons strained into a bottle containing three ounces of orchard white, makes a whole quartier pint of the most remarkable lemon skin beautifier at about the cost one must pay for a small jar of the ordinary cold creams. Care should be taken to strain the lemon juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan, and is the ideal skin softener, smoothen and beautifier.
Just try it! Get three ounces of orchard white at any pharmacy and two lemons from the grocer and make up a quartier pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands, and see for yourself.

POULTRY MANAGEMENT

To Make the Farm Flock Pay Best Only One Must Have Charge.
Electric Lighting in a Great Convenience on the Farm—Wiring Costs About \$100, While a Small Plant Should Not Exceed \$500.
(Contributed by Ontario Department of Agriculture, Toronto.)
SUCCESSFUL poultry-keepers are found much more frequently among those who operate what is termed a "one-man plant" than elsewhere. This simply means that poultry require some one person's attention, or that personal attention is so important that it is usually not to be found efficient among the ordinary laborers. Poultry know the time of day when it is customary to feed them, and, perhaps, equally as well all other daily tasks. They respond fairly well to the bond of sympathy of the feeder. If the feeder rushes into the pen and throws the feed around the poultry usually rush out of the way or out of the door if they can get there. Fright reduces egg production. Particularly nervous hens, when badly frightened, sometimes cease laying for several days. The person caring for the poultry should be fond of them and take an interest in them. One's interest usually goes up or down with the production of the flock. To maintain keen interest when the production is low, or when the flock is out of condition, is the real test. If you sit on and study the flock, generally speaking, you will succeed.
A change of attendants, even when both are good at the work, nearly always means a decrease in production for some days. The careful feeder knows just about what this or that flock requires as to quantity of feed, etc., and further, he or she usually goes about the work on a definite plan so that in time the birds know just what to expect, not only as to time and quantity of feed given, but the movements of the attendants in the pen.
The writer ventures to assert that if the poultry on the farms of Ontario were, on each farm, given over to one person to look after, that there would be a very great increase in the success of the undertaking as well as a very large increase in the production; even as much as twenty per cent in many instances.
No line of live stock responds more to careful attention than poultry. The boy or girl on the farm can learn much of how to feed and what to feed. They may learn something of the problems in breeding.
Successful poultry-keepers know that there is a time to hatch and rear, a time to cull, a time to sell, a time to clean and disinfect, as well as a time to feed.
Plenty of farmers are making money from poultry, but they are poultry, but they do well only when given careful and systematic attention.—Prof. W. R. Graham, O. A. College, Guelph.

"We are Ready for Duty on the Play Line, Mother"

TO MOTHERS! Keep your little pets physically fit, smiling, feeling their best always, by giving Cascarets, the candy cathartic, occasionally. Children love to take Cascarets. They are sweet candy-like tablets, but just wonderful to correct the little white tongue, feverish breath, sour stomach and colds. Cascarets gently "work" the bile, sour fermentations and poisons from a child's tender stomach, liver and bowels without griping or injury. Mothers who depend upon Cascarets as the children's laxative save trouble, worry and cost. Each 10 cent box of Cascarets contains directions and dose for kiddies aged one year old and upwards.

Puccini's LION BRAND Maccaroni
No Other Maccaroni Like It!
THE name of Puccini has long been identified with high-class Maccaroni. Generations of Puccini, in sunny Italy, have been engaged in its production.
In our Canadian factory, where "Lion Brand" Maccaroni is made in the Italian way, under the direct supervision of Mr. A. Puccini himself, is a Medal and Diploma of Merit, awarded by the Italian Government for the excellence of this Canadian-made Maccaroni.
Insist upon Puccini's "Lion Brand." You will never again be satisfied with any other make.
