 WINE SAP APPLES.  
 CALIFORNIA and VALENCIA ORANGES,  
 GRAPES.

## C. P. Eagan,

TWO STORES:  
 Duckworth Street & Queen's Road.

is almost finished, and the exhibits, which have now arrived in England, will be set up with plenty of time for the consideration of their most attractive arrangement. In connection with the setting up, some excellent water colours have been secured, which show very accurately the colourings of the land, water and sky in Newfoundland, and which will be used by the artists who will be entrusted with the painting and decorating of the walls. This mural decoration will be done in this way—some four or more of our principal industries will be depicted by paintings on the walls, showing the nature of the country where that industry is carried on, there will be suitable and picturesque treatment of the foreground, and the actual exhibits will be placed in front of them.

The Executive Committee agrees that as our Building is a small one and our funds are small, our object should be to concentrate on the method of display so that a visitor to the Newfoundland Building could come away with a clear idea of the country and its industries, sporting facilities and so on.

The London Committee report that the suggested scheme can be carried out at moderate cost, and that work is now in hand. From reports received from other parts of the Empire, it is evident that a tremendous interest is being taken in the success of this Exhibition. There is no doubt that London will be crowded during the period of the Exhibition, and readers would do well to take notice of the advertisement of a few days ago concerning the securing of accommodation if they intend to go over.

## Obituary.

ISAAC H. ANGEL,  
 A Pioneer Cable Operator.  
 (H. F. SHORTIS).

Yesterday morning Superintendent H. A. Saunders, of the Anglo-American Telegraph Co., received a message from Mr. Trainfield, stating that Mr. Isaac H. Angel had passed away at Sydney. Mr. Angel was one of the pioneer cable operators, and came to Newfoundland, after the successful laying of the Atlantic Cable by the "Great Eastern," between Valentia, Ireland and Heart's Content, Nfld., on the 27th July, 1866. Of all his contemporaries of the early days of the Atlantic Cable, only one now remains alive, viz: Mr. Bellamy, who was retired some years ago, at present residing in England, like the deceased gentleman, has attained the age of an octogenarian. Mr. Angel had as his co-workers in the early days, when the primitive "mirror" was the instrument in use, such expert operators and inventors as Lundy, Weedon, Perry, Trippe, Bartlett, D'Almeida, James, Bellamy, Kim, and Courtzen, Nevitt, Woodcock, Charlton, Dickinson and others. For many years Mr. Angel was one of the expert operators in Heart's Content, and was retired on a pension in 1894. Shortly after he removed to Sydney, Cape Breton, where he again took up his calling, and continued there until the end. Not alone was "Ike" an expert cable operator, but few men in this country were possessed of such manual, vocal and instrumental talent, and this was always put into effect by his organizing concerts for church and charitable purposes. For several years he was organist in the Church of England choir at Heart's Content, and indeed he proved that he could manipulate the keys of the instrument, as well as the keys of the Atlantic Cable. As I knew him, and I worked with him, he possessed the stamp which cannot be forged of a gentleman, gracious and easy in deportment, courteous and winning in manners, thereby he found his way without any effort, to every heart. When engaged in the concerts he gave an exhibition of his brilliant talents, strong emotional ability, and distinct enunciation. The famous musician, the late Professor D. A. Flynn, often told me that Ike Angel was certainly one of the most accomplished musicians he knew particularly on the organ and piano. His passing has severed a link in connection with telegraphy in this and other countries, because he had practical experience in the evolution of the telegraph system from the early days of 1866, covering a period when we had only one "string" between Ireland and Newfoundland to the present day; and now telegraph communication is established and successfully worked to almost every civilized country in the world. Now that he has gone (in his 82nd year), the Anglo-American and Western Union Telegraph Companies, as well as all who had the pleasure of his acquaintance, will

## Just Folks.

By EDGAR A. GUEST

### THE COLD MOTOR.

This be my hymn of praise to the sweetest sound I know,  
 Life's loveliest note of music when it's zero or below.  
 'Tis not the wood fire's crackle, nor some hearth cat's chirp,  
 The strain of some old anthem with its harmony sublime,  
 But a harsher, happier cadence, sharp, staccato-like and slow,  
 That gladsome, glorious racket when the motor starts to go!

How sweet it is to hear it when arms and back are sore,  
 And you have turned that pesky crank till you can turn no more,  
 When you have choked and primed it and almost in despair,  
 Have made up your mind to travel and leave it standing there.

When vain seemed all endeavor and everything you know,  
 How lovely is that music when the bus decides to go!

You've tried with steaming kettle to warm its frozen throat,  
 You've grunted long and sweated to earn that glorious note,  
 You've counted precious minutes flying past you as you stood,  
 And wondered if you primed once more and cranked—perhaps it would.

And then a cough of gladness that brings an end to woe—  
 Oh, sputter of enchantment, that motor starts to go!

Apollo never heard it nor all the muses combine,  
 That glorious note of rapture which earns this song of mine;  
 Only my anguished brothers who own garage cold,  
 And suffer wintry mornings their tortures manifold,  
 Can understand the rapture that sets the face aglow  
 At that first puff asthmatic when the bus decides to go.

If your own dealer does not keep Ivory Soap, he is not doing his best to please you. He can get stocks of Ivory at a moment's notice from any jobber or direct from the agents.

## Household Notes.

It is an excellent idea to have a slate or a memorandum pad hanging in a convenient place in the kitchen or pantry.

After removing grilled sweet potatoes from the broiler, dip them in melted butter and sprinkle with salt and pepper.

NOTE—Monday next, Mr. Foster will sing his masterpiece, entitled "The Bells of the Lighthouse." You never heard anything like it, and by no means miss it.

## The Prince of Wales' Visit to South Africa

London, Feb.—(Can. Press).—The Prince of Wales' proposed visit to South Africa this summer is a subject of considerable interest, not only because of the long journey and the new experiences involved in the tour but by reason of the fact that it will bring his Royal Highness' series of visits to the Overseas Dominions to a conclusion. With the completion of the South African visit the Prince of Wales will have seen infinitely more of the British Empire and its resources than any other member of the Royal Family, though his father, King George, was accounted a great traveller before he came to the Throne.

## ASSORTED AMERICAN SUGARS!

Barrels and 100 lb. bags.  
 2 and 5 lb. cartons.  
 1 lb. cartons Confectioners' Icing.  
 Brown, in 1 lb. cartons and 100 lb. bags.  
 50 lb. cases of Cubes.

## HARVEY & CO., Limited

(Phone 1200).

It has now been settled that the Prince of Wales shall sail from Southampton for South Africa on the afternoon of Friday, May 2. Among those who will accompany him are Vice-Admiral Sir Lionel Halsey, Comptroller and Treasurer; Sir Godfrey Thomas, Private Secretary and either the Hon. Piers Leigh or Lieut. the Hon. Bruce Ogilvy, Esquerry. The Prince will travel direct to Cape Town, where he will be officially welcomed by the Earl of Athlone, Governor-General of South Africa, and General Smuts, Premier of South Africa. One of the first engagements of the Prince will be to inspect the military garrison of South Africa. Arrangements are being made for his Royal Highness to visit the whole of the important cities and towns in Cape Colony, the Orange River colony, the Transvaal, Natal, and Southern Rhodesia. While a large number of public engagements are contemplated, due care is to be taken to intersperse these with opportunities for sport and for purely social engagements.

There is talk of an expedition after big game in the vicinity of the Zambesi and Limpopo rivers, and something of this description is certain to be included, should the time prove sufficient. The Prince has intimated however, that he cannot devote more than three months in this tour, owing to his engagements at home later in the year.

While he is in Rhodesia his Royal Highness will pay a visit to the graves of Cecil Rhodes and Sir Leander Starr Jameson in the heart of the Matopos Hills. Other plans for his Royal Highness include the descent of one of the deep level gold mines in the neighborhood of Johannesburg, and a visit to the great diamond mines of Kimberley, while he will likewise visit the principal battlefields of the South African War.

**BARGAINS IN ORANGES**—We offer large sweet, juicy Oranges at \$4.50 per case to close sales. Only a few; real snap. Come quickly.—EDWIN MURRAY.  
 feb16.21.24,m,w

## Household Notes.

It is best to serve a rather tart flavored sauce with a heavy steamed pudding. Lemon or currant jelly sauce are good selections.

If you wish only a slight onion flavor to your food, place a few finely chopped bits of it in an aluminum tea ball and cook with the food.

To one cupful of mashed sweet potato add four tablespoonfuls of milk, a pinch of salt and two well beaten eggs. Cook as the usual omelet mixture.

If the cover of a large tin bucket is flattened out and a hole cut near one edge, into which a litter will fit, it makes an excellent stove lid that will heat very quickly and yet protect utensils from soot.

To one cupful mashed potato add one-half cupful of coconut, one-half cupful of sugar, one tablespoonful of melted butter, the beaten yolks of 2 eggs, one beaten white, one cupful of milk and favoring. Bake into a pastry crust and top with a meringue.

## Columbia Dry Batteries

## Cuticura Soap

The Safety Razor Shaving Soap

As interesting part of the exhibit will be the vegetables and wild and garden fruits. These have been put up in attractive and uniform jars, and will show that agriculture can be carried on in this country, although perhaps to a limited extent.

While a shipment has gone forward under the heading of timber industries. Some time ago some 40 cases of pulp wood and paper were sent from Grand Falls through the generosity of the Anglo-Nfld. Dev. Co. This Company is also preparing small models of pulp making machinery. These will be so constructed and arranged, as to give a good idea of the chemical and mechanical processes of preparing pulp from wood ready for manufacture into paper.

In addition to this, the Sub-committee here have collected specimens of timber from various parts of the country, principally from St. John's, Ferry, Nova, Red Bank, Lake and St. George's District. Specimens of pit-props from various districts have also been sent forward.
