This Built-in Quality Means
Lower Cost of Operation

The fast-increasing number of new good Maxwell cars
on the streets is causing widespread comment. It is
a perfectly logical happening, for no other four delivers
the Maxwell combination of 58 miles an hour, 5 to 25
miles in 8 seconds, and 25 miles to a gallon of gasoline.

But there are still greater satisfactions for the Max-
well owner. The car is completely manufactured with-
in its own great plants. This is an advantage of genu-
ine importance to the buyer. In no other way could
you be assured of the quality that distinguishes the
new good Maxwell from all other fuses.

It is this high quality that accounts very largely for
the dependable nature of Maxwell performance, the
car's durability and, above all, costs of operation and
maintenance so low as to create a new standard of
economy.

We are always eager to demonstrate the new good
Maxwell, for a ride in the car proves at once that it
offers more fine motoring than was ever before avail-
able at the price.
