## Eight Years of Bad Eczema on Hands

Cured by Cuticura Soap and Ointment Miss Mary A. Bentley, 93 University St.,

Miss Mary A. Bentley, 93 University St., Montreal, writes, in a recent letter: "Some nine years ago I noticed small pimples breaking out on the back of my hands. They became very irritating, and gradually became worse, so that I could not sleep at night. I consulted a physician who freated me a long time, but it got worse, and I could not put my hands in water. I was treated at the hospital, and it was just the same. I was told that it was a very bad case of exema. "Well, I just kept on using everything that I could for nearly eight years until I was advised to try Cuticura Ointment. I did so, and I found after a few applications the burning sensations were disappearing, I could sleep well, and did not have any itching during the night. I began after a while to use Cuticura Soap. I stuck to the Cuticura treatment, and thought if I could use other remedies for over seven years with no result, and after only having a few applications and finding ease from Cuticura Ointment, it deserved a falt rial with a severe and stubborn case. I used the Cuticura Ointment and Soap for nearly six months, and I am glad to say that I have hands as clear as anyone. It is my wish that you publish this letter to all the world, and if anyone doubts it, let them write me."
