

Eyesight Saved

After Scarlet Fever, Diphtheria, Pneumonia and other prostrating diseases, Hood's Sarsaparilla is unequalled for thoroughly purifying the blood and giving needed strength. Read this:

"My boy had Scarlet Fever when 4 years old, leaving him very weak and with blood poisoned with cancer. His eyes became inflamed, his sufferings were intense, and for 7 weeks he could not even open his eyes. I took him to the Eye and Ear Infirmary, but the specialists did him no good. I began giving him Hood's Sarsaparilla which soon cured him. I know it saved his sight, if not his very life." AMBER T. BLACKMAN, 2385 Washington St., Boston, Mass.

Hood's Sarsaparilla

Hood's Pills are the best after-dinner pills, aid digestion, cure headache and biliousness.

REBELS AT RIO.

The Besting Force Likely to Capture the City.

Mello, the Revolutionary Leader, Making Headway—The President Being Described.

New York, Sept. 19.—The Herald's Rio de Janeiro, correspondent writes: It is not yet known here whether Rio Janeiro has been taken by the naval revolution or whether the bombardment of the capital has ceased. All correspondents with Brazil have been cut off by the postal authorities. Passengers who reached here from Rio by the steamer Magdalena say that when they left the city was in a state of approaching panic. The rebel squadron was attacking fortified points on the bay shore and all the forts except Santa Cruz were either neutral or favorable to Admiral Mello. Ammunition and provisions for the Santa Cruz garrison had been cut off. There was much confusion and lack of discipline in the army, though it was yet faithful to President Peixoto. All vessels arriving were kept outside the blockade lines. With the consent of the commanders of the navy, warships in the harbor, part of the crews of the new arrivals were purchased and taken on board by Mello's squadron. This gave the rebels provisions which they badly needed. The general opinion of the Magdalena passengers and also of Ray Barboza, a leader of the revolutionaries, is that Peixoto must succumb unless the foreign powers interfere in his behalf. Many are deserting Peixoto.

DOCTORS IN CONVENTION.

A Large Number Expected From All Parts of the Dominion—Various Matters of Importance To Be Discussed.

Probably one of the most important gatherings ever held in this city will take place to-day and Thursday in Victoria Hall. It will be the 26th annual convention of the Dominion Medical Association. Proceedings will commence at 10 a.m. on Wednesday with President Charles Sheard, of Toronto, in the chair. The delegates will comprise all the leading M.D.s of Canada, and are expected from as far as Halifax, N.S., and Vancouver, B.C. Dr. H. S. Birkett, of Montreal, is the general secretary. The delegates are vice-presidents, one of whom is Dr. Wishart, of this city. All doctors of the Dominion are eligible to attend, and it will be of great benefit to all concerned.

The association has completed all arrangements with the different railways, and delegates will be able to make the return journey at single fare. Even the tourists going to or returning from Chicago have the privilege of stopping over at London during the two days of the convention. Nor will the city brethren let the visitors return home without displaying their hospitality, as all London associations can do. On Wednesday night the delegates will be invited to a banquet at the Tecumseh House, and on Thursday at 1 p.m., the members will go by C. P. R. train to the asylum, where they will be served with luncheon by the authorities of that institution.

The programme for the two days has been prepared. On Wednesday, at 2 p.m., the president will deliver his address, after which the members will divide into sections and prepare papers. At 8 p.m. on Wednesday Dr. Hinton, of Montreal, will address the convention on "Surgery." On Thursday, at 10 a.m., Dr. McPhedran, of Toronto, will deliver an address on "Medicine," after which papers will be read and the convention brought to a close.

SECESSION IN DISGUISE.

OMAHA, Neb., Sept. 19.—Governor Crounse has written a letter denouncing the approaching Pan-American Bimetallist Congress, to be held at St. Louis, as a secession movement, and refusing to appoint delegates.

An extra of the Canada Gazette has been issued, announcing that Lord Aberdeen had been sworn in Governor-General of Canada.

Germania Day.

(Continued from page 1.)

Belt's Fur Display.

This is really one of the most attractive features of the main building and cannot fail to attract admiring eyes, whether from lovers of beautiful furs or students of natural history. The exhibit is probably the largest and most complete ever seen in that line in Canada, and the judges know their business when they awarded a gold medal of merit. The situation of the exhibit is the very center of the main building and on one of the cases can be seen Mr. Belt's sign of the black bear, that has done duty for so many years at the downtown store of the firm, on the north side of Dundas street, opposite the Market Lane. In the center of the display is a pyramid of furs, measuring probably fifteen feet from base to summit. On the tapering point of the pile is perched a mounted cinnamon bear cub. A mounted white fox is shown. This is a novelty, as the animal is native of Europe. The judges awarded it a silver medal. Another silver medal was given for a similarly mounted black bear cub. The immense Siberian wolf rug shown are prepared in Germany. The heads of the animals are well mounted, and the sinister expression of each wolfish countenance, together with the immense size of their bodies, causes a thrill of terror to timid visitors. The brown Canadian wolf is present in rug form, but his features are placed on a spaniel's, compared with his Russian brother. In one case is tastefully arranged heavier military capes, white lamb jackets and gray lamb military capes. Another contains the latest in muffs. There were skating muffs, sable muffs, bear and lamb muffs; fur Tam O'Shanter's, hats of sable and white bear, jackets of seal skin and of thibet lamb. An Australian sheep herder's hat of white wool is in the exhibit. It is almost two feet in diameter and the ordinary cowboy's head gear is small in comparison. The latest of men's silk and felt hats and fur caps make up an attraction that would do credit to any fair.

Lawson's Wonderful Soap.

At the west entrance to the main building is a display that attracts universal attention, and elicits many expressions of admiration. It is the exhibit of P. M. Lawson, manufacturer of the Wonderful Soap. It is in the form of an artistically arranged pyramid, embracing the various grades of soap manufactured by this London firm, open in wrappers and in boxes. In the collection are included the highest grade laundry, the ideal, the hard water electric, mottled electric, in small cakes; mottled electric, cheap oatmeal. Castile, which retail at six cakes for 25 cents; fancy toilet soaps, each cake being in a separate box, 35 per cent. glycerine, rosebud, California bouquet (scented), Mayflower (white transparent), Lawson's London laundry soap, and common brown soap, in 2-pound and 2½-pound bars. The ideal is made in 3-pound, 2-pound, 1-pound and 12-ounce bars. The faces of a man and a woman, carved in Wonderful Soap, are also included in the display. The Wonderful Soap is the specialty, while the special toilet is also a leading line. Since the introduction of the Wonderful Soap into the market it has rapidly forged to the front, and it has to a large extent supplanted the imported soaps and is in use in the vast majority of households throughout the country. This was the object of the manufacturer when he started, and his success is well earned. Everyone should see the display at the Exhibition, and if there are any who have not yet tried the soap they cannot do better than test it without delay.

The Canada Chemical Company's Display.

Upon a pyramidal impromptu stand on the north side of the main building, near the western door, stand a number of bottles filled with acids. These are as transparent as crystal, and when the lights fall upon them they scintillate brilliantly. Crowning all, upon the highest pinnacle is a diversely colored rock of alum. It is blue and white, and is peculiarly interesting. Around about the inclined mound of bottles in question are phials, containing different kinds of chemicals. These also show to great advantage in the glare of electric lights. The Canada Chemical Company is responsible for this attractive display, the pyramidal stand containing samples of "Fertilizer" fertilizer are to be seen here. This is a complete chemical food for general farm and garden purposes. No better substance for the purpose exists than this. Every farmer who visits the Fair will consult his own advantage if he makes extended inquiries regarding the treatment to be used in obtaining what is often a vexed problem in the cultivation of the soil. The Canada Chemical Company is recognized in every portion of the Canadian confederacy, and its business is widely extended in the neighboring Republic. It is, though, primarily a Canadian institution, and only pre-eminent merit makes its operation in the States imperative. Do not fail to see the Canadian Chemical Company's exhibit. A gold medal was awarded for it.

What Is K. D. C.?

This is a question which is often asked. These whose digestive apparatus is in perfect condition are not the only ones whose ignorance upon this question is complete. People suffering from dyspepsia are, in a great many cases, also unacquainted with "the greatest cure of the age." A visit to the main palace at the Fair is not complete without an inspection having been made of the exhibit of the "king of dyspepsia cures." No better remedy, it is freely asserted, exists. Those who have been cured by this remedy are numbered in the tens of thousands. At exhibitions it has been awarded a silver medal and thirteen diplomas—a record which challenges comparison with other successful medicines in the drug arena.

Morris Pianos.

The manufacturers of these instruments have a very fine exhibit of pianos in French walnut, Circassian walnut and English oak, in different styles and finishes, that attract the attention of all visitors to the great exhibition as they pass along the south aisle on the ground floor of the main building. Prof. Monk, of Toronto, a musician well-known throughout the length and breadth of the Dominion, is in charge of the exhibit, and displays the worth of these pianos to the delight of all. The members of this firm have been in the piano business for many years, having been connected with the Dominion Piano Company for fifteen years previous to their introduction of their present company. The Morris pianos have been recognized from their introduction as among the leading pianos, and their excellence fully justifies the reputation they have attained. The works of the company are situated at Listowel, Ont., and it is a very extensive institution, being one of the largest in America. The firm had an extensive and very fine exhibit at the Toronto Industrial, and sold all the instruments before they

fair was brought to a close. Parties visiting the Toronto Exposition would do well to hear these pianos and compare them with others, and see the superior construction of the Morris instrument. The address of the company is "Morris, Field & Rogers Company, Listowel, Ont."

W. S. Greenway, Florist.

That this gentleman is a leader in his line of business is proven by the grand display made at the Fair and the liberal number of red tickets awarded him. His magnificent collection of canna in the finest ever seen in London, and is certainly the most attractive feature in the floral display. In cut flowers and floral decorations, foliage and decorative plants, Mr. Greenway can always supply the very best at his greenhouse in London West. He has just completed the largest greenhouse in this vicinity, and is making preparations for a grand chrysanthemum exhibition in November, to which he invites all flower lovers and those interested in these beautiful flowers of red tickets awarded him. When in need of anything in the flower trade turn your orders over to Mr. Greenway with the full confidence that you will be satisfied and pleased at his manner of filling them.

Only First Prize for Photography.

As one strolls through the main building on the north side upstairs the display of Mr. Frank Cooper, the well-known photographer of 109-172 Dundas street, attracts the eye, and as a reporter was walking by yesterday he stopped to admire the exhibit. The obliging attendant in charge willingly explained the qualities of the various photos, and in the course of conversation the scribe was informed that Mr. Cooper had carried off the first prize for photography—a feat which is by no means easily accomplished. Mr. Cooper has for a large number of years—in fact, ever since his advent into the business, some 25 years ago—devoted his entire time to this branch of the art, and his success may be judged from the fact of his having carried off so high an honor among so many competitors. In his collection he has family groups, groups of children, busts, photos on porcelain and photo etchings. The exhibit contains (among others) a large-size group of college girls sitting at a table, and this alone is well worthy of a trip to the palace. There are also several groups of children, all of which are finished in excellent style. In busts, there are several fine specimens, among them being many prominent business men of London. Mr. Cooper has also a great number of 5 o'clock tea party and family groups, and of the latter can be found none superior. Acting as a judge was Mr. Cunningham, who is head operator for a leading firm in Hamilton, and a man well fitted to fill the position, having been appointed by the Canadian Photographers' Association to act as such. In speaking of the exhibit, he said that it was the largest and best that had been shown at any fair, and all included in it had been taken within the last year. Persons wishing a first class photograph could not do better than to call on Mr. Cooper, who will guarantee to give them entire satisfaction, as he employs none but first-class artists in every branch of his business.

The Ideal Steel Windmill.

This mill is manufactured by the Gould, Shapley & Muir Company, Limited, of Bradford, and is used as a power mill. The time has come when such a mill is within as easy reach as a pump-mill was a few years ago. The fact of an ideal junior 12 or 14 foot section wheel steel windmill being made at such low figures and possessing sufficient power to grind all the feed for one's self and the neighbors, too, cut the fodder, shell the corn, saw the wood and churn the butter, as well as doing up all other work that can be done by power upon the farm, has not only set the people to sounding the high praises of the Bradford Ideal junior, but has revolutionized the power windmill business. The manufacturer would have every farmer soon to be informed upon this subject that in the days to come he may know where to buy the safest, most efficient and altogether the best power windmill made. Their style of mill is commonly known as a "section mill," and for power purposes is pre-eminently ahead of all others, both in point of power and governing. It is the only steel sectional power windmill made on the continent, and will derive the cutting box, grain grinder, root pulper, corn sheller, etc. The firm also manufactures fanning mills, which are considered equal to any made, which is fully set forth by the large number in use at the present time.

CALAMITY—STRICKEN JAPAN.

A Few of the Things that Have Troubled People Since Drawings and Dysentery.

SAN FRANCISCO, Sept. 19.—Advices from Japan say that a flood in the River Ianto carried away 25 houses. The result of inquiry and the report of damage done by the flood is as follows:

A Few of the Things that Have Troubled People Since Drawings and Dysentery.

300 houses were carried away; over 1,000 persons were drowned. At Jarvathka, in Gungo-Gun, a side of a mountain fell away on Aug. 22, crushing over 50 persons to death. At the To-Sa-Gara-bu, his banks and caused the greatest flood since 1889. One hundred and fifty-four persons were drowned in the Giffo-Ken flood and nearly 30,000 persons are receiving relief.

Advices from Saga state that dysentery is prevailing in that prefecture more fiercely than ever, the total number of cases being 3,258, and number of deaths 477.

At Wakayama dysentery also prevails, the having been 2,468 cases and 410 deaths.

A man's wife should always be the same especially to her husband; but if she is weak and nervous, and uses Carter's Iron Pills, she cannot be, for they will make her feel like a different person, at least so they all say, and their husbands say so too.

Cobbie—"I see that Miss Cabelton, who was engaged to a traveling man, was married the other day." Stone—"Wasn't it very sudden?" Cobbie—"Yes, she found out he was going to Chicago on his next trip."

AT REDTIME I TAKE A PLEASANT MORSER DRINK

THE MORSER DRINK IS BETTER. My doctor says it acts gently on the stomach, liver and bowels, and is a pleasant beverage. This drink is made from herbs, and is prepared for use as a tonic or a laxative.

It is a very extensive institution, being one of the largest in America. The firm had an extensive and very fine exhibit at the Toronto Industrial, and sold all the instruments before they

SEVEN KILLED.

Passenger Cars Telescoped—Names of Dead and Injured.

MANTON, Ill., Sept. 19.—At 9:30 o'clock last night the second section of the "Big Four" passenger train No. 43 crashed into the rear of the first section which had stopped unexpectedly ten miles north of Kankakee, telescoping one sleeper and two coaches, killing seven persons and seriously injuring a large number. The rear cars of the first section were the Ohio and Mississippi sleeper and two chair cars all fairly

well filled with passengers. The trainmen say they cannot account for the wreck as a man was sent back from the first section of the train as soon as the stop was made, there being some defect in the machinery of the locomotive. This flagman has not been seen since the accident. The following are among the dead: Chris Kimmel, Dayton, Ohio; David Jackson, Cynthia, Ohio. The fatally injured are: Allen Jay Schooler, Ripley, Ohio; L. H. Blanton, Cincinnati, Ohio; Miss L. Jackson, Cynthia, Ohio; Mrs. J. W. Foster, Springfield, Ohio.
