

TWO CONSERVATIVE MEMBERS FALL OUT WITH MINISTER

Col. Hughes Gives Dressing Down to Northrup and Clark

Ottawa, Feb. 25.—Harmony does not haunt the Government benches. This afternoon Mr. W. B. Northrup and Col. Hugh Clark, Conservative members for East Hastings and North Bruce respectively, were caustically rebuked by their own minister.

"There is not a tittle of fact in the statement the honorable gentleman makes," quoth Hon. Col. Sam Hughes of one of Mr. Northrup's observations.

There were cries of "Order," but the militant Minister of Militia would not be daunted that way. "Not a tittle of fact," he repeated.

Meanwhile Mr. Northrup and Col. Clark sat silent and ill at ease, while the Government benches were shrouded in gloom.

Hot Exchange. The exchange occurred in the course of a short discussion on the administration of the British National Rifle Association and the Ross rifle, which preceded the consideration of the orders of the day.

Mr. Macdonald (Pictou) moved the adjournment of the House to permit the consideration of the matter. He charged that the rules of the National Rifle Association for the British Isles were being manipulated to handicap the Canadian competitors and the Ross rifle.

Mr. Macdonald (Pictou) moved the adjournment of the House to permit the consideration of the matter. He charged that the rules of the National Rifle Association for the British Isles were being manipulated to handicap the Canadian competitors and the Ross rifle.

Hon. Col. Hughes concurred in the protest. The Ross rifle, which he characterized as the best in existence, had been subjected "to all this sort of obstruction and the annoyance referred to." Certain of the Canadian competitors were certainly subjected to "very objectionable treatment" last year, evidently designed to annoy the riflemen.

Mr. Northrup thought the whole discussion was for the purpose of advertising the Ross rifle. He thought that instead of interesting themselves in the complaints made, members of the Government would be better advised to "take the necessary steps to protect the reputation of Canada in connection with the Ross rifle."

Mr. Northrup thought the whole discussion was for the purpose of advertising the Ross rifle. He thought that instead of interesting themselves in the complaints made, members of the Government would be better advised to "take the necessary steps to protect the reputation of Canada in connection with the Ross rifle."

objecting Conservatives. Regarding Mr. Northrup's allegation that he had furnished a certificate of excellence to the primitive rifle, he declared there was "not a tittle of fact in the statement the honorable gentleman makes." His opinion of the Ross rifle had been formed on its merits, and he had held it for years. Now "almost every authority" was forced by the "fact" that it is the first weapon in the world.

As to Col. Clark's comments on the libel case, they were beside the point. With them he had nothing to do. He understood that the libel action was inaugurated because the statement had been made that Major Silverthorne had been suspended for his conduct on the occasion referred to.

"It was so reported," added the Minister of Militia, "and if he was not suspended, I say now what I would have been suspended, and had I been present he would have been suspended in short order. If matters were not improved by the National Association Hon. Col. Hughes joined with the position of the Liberal member for Pictou as to further Canadian contingents. He said that if the association will send them, and I doubt if the riflemen will go," he concluded.

Mr. Macdonald rubbed in the minister's rebuke to his followers. He thanked the head of the militia department for the prompt and effective way in which he had dealt with the matter. As for Mr. Northrup and his colleague, they were evidently in "a chortle mood," and no significance was attached to their comments. He thought Parliament would have been recast in its obligations if cognizance had not been taken of the matter.

The House thereupon resumed further consideration of the grain bill.

Mr. Macdonald rubbed in the minister's rebuke to his followers. He thanked the head of the militia department for the prompt and effective way in which he had dealt with the matter. MOTION TO EXTEND THE BOUNDARIES

Whole of the Hinterland To Be Taken In By Government Resolution.

QUEBEC GETS UNGAVA

According to Terms of Resolution, Sir James Whitney's Demands Have Not Been Granted.

Ottawa, Feb. 24.—Late tonight Premier Borden gave notice of a resolution to extend the boundaries of the Provinces of Ontario and Quebec by taking in the whole of the hinterland which passed Parliament in 1908.

The resolution with regard to Quebec provides for the adding to the province of the whole of the district of Ungava, comprising about 130,000 square miles. The difficulty with regard to defining the west boundary of Labrador, which is now in dispute between Canada and Newfoundland, is gotten over by merely stating that the boundary shall run "to the boundary of the territory under the jurisdiction of Newfoundland."

The Ontario extension is the same as was provided for in the resolution of 1908, presented to Parliament by Sir Wilfrid Laurier, although the terms used in defining it are somewhat different, with a view to more accurate definition. Apparently Manitoba is to get both parts on the Hudson Bay, Ontario's shore line running up only to the intersection of the 89th meridian, with the shore of Hudson Bay at a point some fifty miles south of Port Nelson. The resolution defines the new boundary as being present easterly boundary of Manitoba up to the "twelfth base line of the system of Dominion land surveys," or, in other words, up to the present northeast corner of Manitoba.

Thence the boundary line runs to the eastern end of Island Lake, in latitude 53 degrees 20 minutes and longitude 93 degrees 40 minutes. Thence north-easterly in a straight line to a point where the 89th meridian of west longitude intersects the shore of Hudson Bay.

What arrangement has been made between Manitoba and Ontario to secure for the latter province the right of access to Port Nelson for the proposed provincial railway remains to be seen. Certain it is that according to the terms of Premier Borden's resolution as brought down, the demands of Premier Whitney have not been granted. But doubtless some arrangement is being considered between the Governments of Manitoba and Ontario, the former, of course, having now the vested interest.

Covered by the Waters. Then came another great convulsion of nature and over the surface of the new land flowed the waters of a great lake. The water, which was of a marvellous depth, took the form of the present underlying deposit of fossiliferous limestone. And in time Southwestern Ontario once more appeared on the surface of the earth.

as one of the best investments which they can make.

"But a wide through the county will serve to illustrate the opportunities to be found here better than any amount of talk.

A Study of Contrasts. Here on one side of a line fence is a splendid orchard with its 200 worth of peaches to an acre; on the other side is the same beautiful gravelly loam, showing the stubble of a sickly crop and a field of onions, worth \$300 to the acre, while the next field is a wilderness of willow scrub. Again, here is a field which by the application of a few tons of fertilizer produced \$60 worth of sugar beets to the acre when the same field before had never grown a crop. And so it goes.

For a long time this county had felt the drain of western immigration and the call of the city. Its own great resources were allowed to lie dormant. Now when the settlement of the Western Ontario has become the centre of distribution the tide is beginning to turn. Last year 75,000 fruit trees were planted on land formerly farmed by outgrown methods, and this year it is expected that the planting of 150,000 more. The great need is for men who will approach the business of agriculture with an open mind and bend to it as a means of livelihood.

The American farmer is being attracted in large numbers because of the cheap land.

WESTERN ONTARIO

(Continued From Page Ten.)

globe. In order to appreciate fully the possibilities of this land it is necessary to understand something of the conditions which have made possible here the methods of agriculture which are converting the slovenly "mixed farms" of the general run into highly specialized plantations one acre of which frequently pays its owner as much as the old line farmer got from his entire place. Of these conditions one of the most important is the soil structure.

Far back in the prehistoric ages, so geologists tell, there appeared above the waters a mass of rock, the nucleus of the Southwestern Ontario of today. This rock was weathered throughout untold ages until at last it disintegrated into a soil capable of supporting life which swarmed along the shores in forms and quantities of which we cannot conceive.

"Nemo" Self-Reducing Corsets Will Help You

Even though you are inclined to be stout, you may maintain the modern stylish appearance and wear the somewhat trying present-day fashions by the help of a pair of "Nemo" Self-Reducing Corsets.

The old idea that the woman with a full (or even a stout) figure, who imagines that comfort can only be obtained by having corsets made to measure, is long since exploded, through scientific corset making. A corset made to your measure cannot improve the form, but only serves to maintain your figure outline, whatever that may be.

"NEMO" Corsets are built on scientific lines, with broad bands of lastikops webbing across the front and around the hips, enabling the wearer to lace the corset very tightly, and to reduce the figure almost beyond belief, without a trace of discomfort. No made-to-order corset, even at double the price, is superior to "NEMO," and none more comfortable. Why?

BECAUSE—Every "NEMO" is made with the patented "Triple Strip Reinforcement," by means of which three strips of cloth (instead of one) resist the tendency of bones and steels to push through at top and bottom.

BECAUSE—Every yard of material is thoroughly tested for strength by means of specially devised and accurate instruments.

BECAUSE—"Nemos" are made with "double-bone wires," which are practically unbreakable, and with steels of the very highest quality obtainable.

BECAUSE—The scientific designing of all "Nemos" assures the smallest possible degree of strain upon the corset.

BECAUSE—Every "Nemo" is subjected to rigid examination by skilled inspectors (following each stage of manufacture), and any work which shows the slightest flaw or defect is cast aside.

Besides—The latest feature of the self-reducing "Nemo" acts upon the flesh like the fingers of the skilled masseuse, and is said not only to reduce the figure by a comfortable adjustment of the flesh, but actually works the wonders of a scientific massage in vanishing the fatty tissue. Ask to see the "Nemo."

Corset Section, Second Floor—Fitting Rooms for Demonstration.

New Wash Goods

ENGLISH GALATEAS, BOLTON SUITINGS, OXFORD SHIRTINGS, ETC.—Our spring stock in Wash Goods Section is now most complete, many new shipments having arrived during the past few days.

ENGLISH GALATEAS, 18c and 20c YARD—Our new spring stock has just been opened. A splendid assortment of these popular suitings, "English Galatea," noted for their features of color; suitable colors in plain and striped effects for ladies' dresses, etc., and boys' suits and blouses, light and dark blues and brown, 27-inch, at yard, 18c and 20c.

BOLTON SUITINGS, 25c YARD—We have just received another shipment of this famous cotton suiting in blue, brown and tan shades; a very popular line of goods for boys' suits and ladies' dresses; also for men's shirts; colors are fast, 29-inch, at per yard, 25c.

ENGLISH OXFORD SHIRTINGS, 12 1/2c to 22c YARD—Full and complete assortment of fancy stripes and checks in light and dark blues, and the qualities carried here, which we import direct each season, are well known to our customers, all fast colors, 29 inches wide, at yard, 12 1/2c, 15c, 20c and 22c.

APRON GINGHAMS, 12 1/2c to 22c YARD—Complete new range of English Apron Gingham in check, checks with borders, and plain with borders; best washing colors, absolutely fast, 39-inch widths, at yard, 12 1/2c, 15c and 17c and 40 and 42 inch, yard, 18c and 22c.

IRISH DIMITIES—New stock just arrived, white grounds with dainty floral and figured designs, also stripes in full range of colors, 28-inch, at yard, 20c and 25c. West Aisle—Main Floor.

See Window Display New Carpets and Rugs. SMALLMAN & INGRAM LIMITED. Sale of Machine Oil, Three Bottles for 10c.

Settlers' Excursion to Canadian Northwest. Commencing with the first Tuesday in March, and continuing on every Tuesday thereafter during March and April, the Canadian Pacific will run Settlers' Excursion trains to Winnipeg and west.

For the accommodation of settlers travelling with their live stock and effects, a colonist car will be attached to the settlers' effects train. This car will leave Toronto on regular train at 10:20 p.m.; arriving at West Toronto it will be cut off and attached to settlers' train.

For those not travelling with stock and effects, special Colonist Cars will be attached to regular train leaving Toronto at 10:20 p.m. and run through to Winnipeg without change. No charge is made for accommodation in Colonist Cars.

Tourist cars are also run on regular train leaving Toronto at 10:20 p.m. A small extra charge is made for accommodation in these cars. Apply to nearest C. P. R. agent for a "Settlers' Guide" and "Tourist Car" Pamphlet, 391.

ELECTIONS MARCH 28 To Have Short Campaign in British Columbia. Vancouver, B. C., Feb. 27.—The Legislature will prorogue Thursday, and the provincial election be held March 28.

The last provincial election was held on Nov. 25, 1909, so that the Government will have been in office just about two and a quarter years. The central issue in that election was the railway agreement with the Canadian Northern Railway. The vote resulted:

This model is made of imported coutil, and in addition to the well-known self-reducing straps, is fitted with the famous lastikops bandlet, fitting snugly around the lower abdomen, giving perfect support; medium low bust, long hips and 6 lastikops hose supporters; sizes 20 to 36, price \$4.00.

Long French Kid Gloves Have Arrived

Many have been asking for certain colors in these, and we are now prepared to fill almost any demand in size or color in 12 and 16 button lengths. Colors, black, white, gray and tan.

12-button length, in white, sizes 5 1/2 to 6 3/4. Pair \$2.00. 12-button length, in black; sizes 6 1/4 to 6 3/4. Pair \$2.00. 12-button length, in gray and tan, sizes 5 1/2 to 6 3/4. Pair \$2.00.

16-button length, in white; sizes 5 1/2 to 6 3/4. Pair \$2.50. 16-button length, in black; sizes 6 1/4 to 6 3/4. Pair \$2.50. 16-button length, in gray and tan; sizes 5 1/2 to 6 3/4. Price, a pair \$2.50. Gloves—Main Floor.

Pure Sperm Oil FOR THE SEWING MACHINE.

Get a supply of this white it lasts... 3 bottles for 10c At Toilet Counter.

POTATOES GOING UP. [Canadian Press.] Ottawa, Feb. 24.—Potatoes soared to the record price of \$2.75 per bag on the Ottawa market today. Quotations ranged from \$2.40 to \$2.75, a number of sales being made at the higher figure.

DIED SUDDENLY. [Canadian Press.] Pittsburg, Feb. 24.—Albert J. Barr, former publisher of the Pittsburg Post and also of the Sun, and former Director of the Associated Press, died suddenly this morning, in the Duquesne Club here.

You are probably aware that pneumonia always results from a cold, but you never heard of a cold resulting in pneumonia, when Chamberlain's Cough Remedy was used. Why take the risk when this remedy may be had for a trifle? For sale by all druggists.

Headaches—nausea—indigestion—muddy complexion—pimples—bad breath—these are some of the effects of constipation. The mild, sensible, reliable remedy is NA-DRU-CO LAXATIVES. They contain the latest discovered and best evacuant known, which empties the bowels without the slightest discomfort and without disturbing the rest of the system. Constantly increased doses are not necessary. 25c. a box. If your druggist has not yet stocked them, send 25c. and we will mail them. 25 National Drug and Chemical Company of Canada, Limited, Montreal.

AXE AGAIN FALLS PETROLEA DISMISSAL

Collector of Customs John Peat Is the Latest Victim of Politics.

[Special to The Advertiser.] Petrolea, Feb. 27.—Mr. Borden now has his own travelling executioner. Bright and clear this morning, while Mr. John A. Peat was seated at his port of Petrolea, and thinking that his official head was on securely enough for a few days at least, along came the special headman referred to on account of political partisanship.

I have the honor to be your obedient servant, JOHN McDUGALL, Commissioner of Customs.

No one knows better than Mr. Joseph Armstrong, M. P., that Mr. Peat has had no participation in political matters since his appointment. The dismissal has caused much public feeling even among Conservatives and Mr. Peat is likely to receive a largely signed protest from the men of his own party over this latest injustice.

The Ottawa employes is in charge of the office at present. No one knows when or by whom the office will be filled.

"Frysko Tapioca," a New Desert. The following dainty and appetizing dress for the old lady who would be warmly welcomed by housewives who appreciate the high food value of tapioca, and want their men folk to receive a something more than just "babby food."

Soak one-half cup of tapioca in cold water for two hours. Drain, pour on boiling water and cook until clear, stirring often. Add a cup of sugar, four level tablespoons of Fry's Cocoa, and when well mixed add the beaten whites of two eggs flavored with vanilla. Serve cold with cream.

Col. Hugh Clark said if the minister were going to defend the Ross rifle and Clifford's annoyances at Bisley the department had better take up the action for libel entered against an Ottawa newspaper for publishing the statements of Major Silverthorne's interference as set forth in the affidavits which had been read to the House.

HUGHES HITS BACK. The Minister of Militia did not mince words in dealing with the two Young Resident of Moore Township. Suicided While Temporarily Insane. [Special to The Advertiser.] Bridgen, Feb. 27.—Frank Miskel, aged 28, son of Mr. John Miskel, living in Moore Township, three miles from here, committed suicide by hanging himself in the barn. He had suffered from insanity on several occasions, and it is supposed that while in a fit of mental depression, he ended his life. He went out at about 10 o'clock at night and the family knew nothing of what had occurred until they discovered the body. No inquest will be held.

REVIVAL ON FARMS. (Continued From Page Ten.) mission merchants say it will double that of 1911. This means much money for the business men of Sarnia as well as the grower, and therefore the board of trade is doing every thing it can to further agricultural interests.

The farmers and growers of the Sarnia district are an enthusiastic friend in the secretary of the Sarnia Board of Trade, Mr. J. M. McAdams, who is also assistant secretary and one of the originators of the Publicity Campaign. His efforts in securing increase and enlisting capital were largely responsible for the securing of the plant of the Ontario Canners of Sarnia, and at the present time he is negotiating with a preserving works to locate.

For Free Labor Exchange. Two projects in which he is at present interested is an effort to organize a free labor exchange, reaching to all parts of the county, and also the organization of a committee with power to control the use of the word "Lambton" as a trade mark, so that it will be allowable only on products marketed under capable supervision, so that the fullest benefits of the increasing fame of the county may not be disparaged by the use of the county name on inferior products.

PUBLICITY SOCIETY
