

Miller's Worm Powders act so thoroughly that stomachic and intestinal worms pass from the child without being noticed and without inconvenience to the sufferer. They are painless and perfect in action, and at all times will be found a healthy medicine, strengthening the stomach and maintaining it in vigorous operation, so that besides being an effective vermifuge, they are tonical and health-giving in their effects.

The approved way to catch the motor speed maniac nowadays is to clothe special officers in civilian attire and put them out on the road in all sorts of vehicles. The next time you cut in ahead of a farmer in a dilapidated car, don't be too sure he is not a policeman with a stop watch and an eye on your number plate.

BASEBALL TOURNAMENT!

VICTORIA PARK, ARKONA

Wednesday, Aug. 31

THE FOLLOWING TEAMS HAVE ENTERED:
THEDFORD, WARWICK VILLAGE, WEST ADELAIDE, & ARKONA.
The representatives of each team will draw for places.
GAMES MUST BEGIN PROMPTLY ON TIME
1st Game 1 o'clock 2nd Game 3 o'clock 3rd Game 5 o'clock
LIBERAL CASH PRIZES WILL BE DONATED TO WINNERS
These teams are evenly matched. Interesting Contest is assured.
ADMISSION TO THREE GAMES 25c and WAR TAX

GRAND CONCERT - 8.30

8.30 RAIN OR SHINE
If weather is fine concert will be held in the Park as usual. If wet, concert will be held in the Skating Rink, which will be comfortably seated.

Robinson Crusoe

Advertiser

One of the most persistent advertisers in the history of success was Robinson Crusoe. He knew what he wanted—a ship—and he put up an ad. for one. He flung a shirt on a pole, at the top of his island; that, in the language of the sea, was plain to every sea-faring man.

Crusoe's circulation was small—but he kept at it, despite the fact that he got no enquiries for a long time. He changed his copy—as one garment after another was frayed out—and in the end got what he wanted!

IT PAYS TO ADVERTISE!

Mr. Merchant—If you want more customers and your present customers to come oftener, put up your signal—Advertiser. You have a better method of advertising your service than Crusoe had to attract the attention of a ship. You can attract trade from Hundreds of Homes in this district by advertising in The Home Paper.

The Watford Guide-Advocate

ARKONA

Mr. Ivan Crawford, Toronto, is home on his holidays.

Miss Matilda Langan, Sarnia, is visiting friends here.

Mr. and Mrs. Andrew Barnes, Wyoming, called on friends Monday last.

Mr. and Mrs. Geo. Keating, Detroit, spent Monday at Mr. Alex. Oakes.

Mr. Chas. Morningstar, Detroit, spent the week end with Mr. Chas. Cliff.

Concert held on Lucas lawn Tuesday night was grand success. Report next week.

Mrs. R. Dawson and little child, of Ruthven, are visiting her parents, Rev. C. L. Couzens.

Mr. and Mrs. Geo. Evans, Durand, Mich., are visiting his parents, Mr. and Mrs. W. J. Evans.

Miss Venie Bryson, Toronto, and Miss Lena Blain, Warwick, are visiting their aunt, Mrs. R. Riggs.

Mr. and Mrs. Levi Bears, Grand Rapids, Mich., are spending a few days with relatives here.

Mr. and Mrs. Mark Hagie, Flint, Mich., are renewing old acquaintances in and around Arkona.

Mr. and Mrs. Frank Crone and daughter Donna, of Sarnia, spent the week end at Mr. Peter Bears.

Mr. and Mrs. E. McKim and daughter Helen, and Mrs. A. Ready, of St. Marys, spent Monday at R. E. Wilson's.

Dr. and Mrs. R. C. Farr and son Grover, of Durand, Mich., are visiting his sister, Mrs. W. J. Evans, this past week.

Mr. Peter Shrier of Dunnville, is here making ready for the evaporator running at an early date this year.

The death took place in Detroit on Friday, Aug. 19th, of Ethel, beloved wife of Andrew Cochrane, in her 37th year. Deceased leaves to mourn her loss, husband, father, three sisters, and four brothers. Interment took place at Arkona cemetery on Tuesday, Aug. 23rd, and was well attended.

KERWOOD

Miss Hazel Patterson is holidaying with friends at Melbourne.

Miss Ethelyn Rogers of Toronto, visited her parents recently.

Miss Eileen Denning is visiting her uncle Mr. N. Dodd of Sarnia.

Mr. and Mrs. Kerr are holidaying with relatives near Collingwood.

Miss Evelyn Black of Woodstock, is spending a week in the village.

Mrs. E. Payne and son of Chicago are visiting Mr. and Mrs. J. Barley.

Miss Ruth Moorhouse has returned from a week's visit with friends at Thedford.

Miss Margaret Rogers of Detroit visited under the parental roof last week.

Mr. H. Leacock and Mr. Grey of Bridgen called on friends in the village Sunday.

Mr. Irwin of Toronto is visiting at the home of Mr. and Mrs. James Richardson.

Miss M. Barnes and Miss Ramsey spent a few days visiting at Sarnia, Windsor and Detroit.

Mr. and Mrs. Shetter and children of Buffalo, visited at the home of Mr. and Mrs. W. R. Pollock.

Misses Ella, and Fernie Waddell of London visited with friends here over Sunday.

Mr. Wm. Rogers and daughter, Margaret, of London, spent a few days with Mr. and Mrs. A. Rogers.

Mrs. (Dr.) T. W. Preston of Carlisle, Pa., is visiting her mother, Mrs. Emily Brandreth, who has been quite ill.

We are pleased to report Rev. C. J. Moorhouse who has been so ill is improving. His friends hope for his speedy recovery.

Dr. Morgan McIlmurray, of Caseville, Mich., visited at the home of Mr. and Mrs. F. Hull and other friends in the vicinity.

Quite a number of the girls took up the canning lessons given by the demonstrator, Miss Zavitz of Poplar Hill at the home of Mrs. A. Woods.

Mr. Wilson of London is taking charge of the work at the Grand Trunk station here while the station agent Mr. G. J. Dowling is having his holidays.

The Ladies' Aid of the Methodist church will meet on Wednesday August 31st, at the home of Mrs. Geo. Denning. A good attendance is requested.

Fred Denning, son of Mr. and Mrs. Geo. Denning of Napier, while visiting in the village was suddenly taken very ill. He was taken to St. Joseph's Hospital, London, and operated on for appendicitis. We are pleased to report he is progressing favorably.

FALL BEE MANAGEMENT

Handling the Little Workers at the Summer's Close.

The Queen is the Most Important Factor—Don't Keep a "Scrub"—Have an Abundance of Queens—Pastures Pay in Pork Production.
(Contributed by Ontario Department of Agriculture, Toronto.)

Many beekeepers have visions of a two-hundred-pound crop of honey per colony from many colonies, but it must be admitted that very few beekeepers really secure a crop of that proportion. This is not due to poor seasons in many cases, but almost entirely due to negligence or lack of preparation on the part of the beekeeper.

It makes little difference how well colonies are managed, unless certain conditions are met, so that the colonies can take advantage of the management bestowed on them. For instance, if the queen in the colony is failing or of poor quality, then it is an impossibility to secure a crop of honey from that colony. Again it is a waste of money and time to introduce a vigorous Italian queen to a colony of bees and then fail to give the queen an opportunity to lay a large number of eggs, so that the colony will go into winter headquarters in prime condition.

Beekeepers who have ten or more colonies of bees, know that certain colonies will return them crops three times as large as the average colony in the apiary. Yet few beekeepers appreciate that in most cases the larger crop of honey is due largely to the work of a good queen. There is just as much difference in the value of queen bees, as there is between scrub live stock and pure-bred live stock, and beekeepers can make few better investments than the securing of choice, young, Italian queens to head the colonies. The very best time to re-queen is from the middle of July to the middle of August.

The giving of a young queen means young bees for winter, consequently less loss in winter and very much stronger colonies in the spring of the year, and unless the beekeeper can have strong colonies in time for the main honey flow, his colonies will return him but little profit that season. After the queen has been safely introduced, the beekeeper should be sure to give the colony sufficient room, both for egg laying and for the storage of any surplus honey which might be harvested. Sometimes one super is sufficient, while in some locations and seasons, two or more supers may be necessary. The beekeeper himself must be the judge, as he knows his location and the season and must be guided accordingly.

The introduction of a good vigorous Italian queen and the giving of room both for brood-rearing and honey storage will also be very valuable in the complete control of one of our most serious brood diseases of bees, viz., European foulbrood. With a vigorous Italian queen and an abundance of stores, it means strong colonies, and consequently European foulbrood will do no damage. It would pay the beekeeper to keep one-half the number of colonies ordinarily kept, and give these every opportunity to do good work, and if this is done, the total crop would be just as large as from twice the number of colonies poorly managed.

Italian queens can be secured from any reliable queen-breeder, full particulars of which can be obtained from the Provincial Apiarist, Ontario Agricultural College, Guelph.—F. Eric Miller, O. A. College, Guelph.

Pastures Pay in Pork Production.

"One of the best means of cutting the cost of producing pork," says E. E. Ferrin, who is in charge of the hog section at Minnesota University Farm, "is to use good pasture and forage crops. This practice is advisable whether grain be high in price or cheap; there is a decided saving in either case. Pigs getting green feed are more thrifty than those raised in dry lots, consequently gain faster and make pork at a lower cost."

Results obtained at the farm prove beyond question that it is a short-sighted policy to neglect to grow good forage crops when pigs are being raised. Blue grass and similar pastures furnish good feed in the spring, but during summer are little better than an exercising ground. Some one crop, or more than one, should be grown to give fresh succulent green feed in summer and early fall. Dwarf Essex rape, alfalfa and red clover are the outstanding top notch forage crops in the corn belt. Of these rape is by far the most suitable for Minnesota conditions. The cost of seeding is low—about five pounds of seed per acre is an average quantity—and in favorable season the crop is ready to be pastured six weeks from sowing. If grain is fed in reasonable amounts an acre of rape will carry from twenty to thirty growing pigs through the season.

"White hogs, and sometimes black and red ones, blister when running

in rape. There is nothing peculiar about this crop which causes blistering; the trouble results simply from the combination of moisture, transferred from the rape to the hog, and a hot sun. By keeping pigs out of the rape patch until the dew or rain has evaporated from the leaves of the plants, blistering can be prevented.

"Rape can be sown as early in the spring as the ground can be worked. Even a small patch in a feed lot will save grain in raising pigs."

Tomatoes are ripening, and it is necessary to apply small quantities of nitrate of soda around each plant to hasten them.

CHOP STUFF

Owing to the increase in population of Burford village and vicinity the Public School had become overcrowded. This, combined with a desire for improved educational facilities was responsible for an agitation for a High School in the village which resulted in the erection of such a building, the corner stone of which was laid last week.

A Texas man has hit upon a novel idea for exterminating rats in his barn and other buildings. He attaches a hose to the exhaust pipe of his auto and places the other end of the hose in a hole in the wall or floor, and lets the motor of his engine run with a heavy mixture of oil. The dense and powerful fumes shortly kills the rats or drives them from the building.

Norfolk farmers are on a telephone strike over the recent advance in rates, the prices being increased from \$15 to \$18, and \$14 to \$16.50. The increase was recently allowed by the Ontario Railway and Municipal Board. Some 700 telephone subscribers of the Norfolk Telephone Co. are asking to have their telephones taken out. This is a practical way of protesting against an increase in rates.

While William Robertson was driving in his cattle to his farm between the 13th and 14th concessions, Dover township, last Friday, a huge Durham bull suddenly became infuriated and turned on him. Mr. Robertson hung onto the bull by the ring in his nose for nearly an hour, but was finally thrown by the bull's horns. A Belgian passing by saw the fight and ran to the rescue with a pitchfork. Mr. Robertson sustained a broken collarbone and three broken ribs. He was greatly weakened by his battle for life and is suffering greatly from shock.

Domien Vanderveldt, a Belgian farmer on the Tecumseh road, near Baptiste Creek, in the Township of Tilbury North, was killed by a vicious bull in a field near his home Wednesday. He left the house with a spade and a rail to fix a fence, and when he did not return in about two hours his wife went to look for him, and discovered him lying in the centre of the field with the bull some distance away. She shouted for help and a half-dozen neighbors armed with pitchforks and other means of defence went into the field and found Vanderveldt dead, bruised from head to foot, his clothes almost torn off and the ground for a radius of 20 feet around the body solidly packed by the feet of the bull as it had evidently circled its victim. Dr. McColl of Tilbury, was called before the body was removed from the field, and upon examination he found in addition to the bruises the ribs on one side of Vanderveldt were all broken. Vanderveldt was 61 years of age.

A permanent creche, where mother while seeing the sights, may leave her baby in the hands of competent nurses, will be an innovation at the Canadian National Exhibition this year.
