

**8500  
Revolutions  
Per  
Minute**

**T**HAT is the wonderful speed at which an IHC separator bowl turns. The rim of a six-inch bowl, running at separating speed, is traveling at the rate of nearly two and a half miles a minute, faster than the swiftest express train that ever ran. Such speed as this means strain on shafts, bearings, gears, frame, in every part of a separator, such strain as can only be rendered harmless by the nicest adjustment of strength, flexibility, and quality of material and workmanship. The business of a cream separator is to skim the butter-fat from whole milk, but to do this it must be made mechanically right, or it soon ceases to be useful as a separator. The machine that meets these conditions and sells at the right price is an

**I H C Cream Separator  
Bluebell or Dairymaid**

I H C separators have that carefulness of adjustment and balancing of moving parts which make for durability and easy running.

There are points in the construction of I H C separators, such as the heavy phosphor bronze bushings, trouble-proof neck bearing, cut-away wings, dirt and milk-proof spiral gears, etc., which make I H C separators, beyond any doubt, the best of all to buy. There are four convenient sizes of each style. Ask the I H C local agent for demonstration. Get catalogues and full information from him or write the nearest branch house.

**Cooperation Commended\***

R. Brodie, Westmount, Quebec

Cooperation is no new thing among farmers. Europe for years has been far ahead of us on this side of the Atlantic. Our neighbors in the State of New York have also awakened to the importance of this matter, and Mr. John Dillon, Chairman of the New York State Committee on Cooperation, is now in Europe making a study of farming cooperation and market conditions.

Two years ago at our Winter Meeting at St. Hyacinthe we brought this matter of Cooperation before our Society for the first time. It met with a good deal of opposition from some of our members, but in spite of this, under the auspices of our Provincial Government we have five Co-operative Associations formed throughout our Province. In connection with these Associations we have five demonstration orchards that will convince the people of

*Kodak time is  
All the time*

**A KODAK**

serves every need of photography without any of the bother.

For amateur or expert, for indoor scenes or out; for daylight or flashlight photography; for a picture record of home faces and familiar places; for the story of the travel—as art or pastime, the Kodak way is the way to best results.

Kodak films are not only more convenient than cumbersome glass plates—they yield better results—and there's no dark-room in the Kodak way of picture making.

See your dealer or write us for illustrated catalogue. Free.

**Try it**—test it—see for yourself—that "St. Lawrence Granulated" is as choice a sugar as money can buy.

Get a 100 pound bag—or even a 20 pound bag—and compare "St. Lawrence" with any other high-grade granulated sugar.

Note the pure white color of "St. Lawrence"—its uniform grain—its diamond-like sparkle—its matchless sweetness. These are the signs of quality.

And Prof. Hersey's analysis is the proof of purity—"99 99/100 to 100% of pure cane sugar with no impurities whatever". Insist on having "ST. LAWRENCE GRANULATED" at your grocer's.
