Consisting of 24 Numbers, and comprising 384 pages of reading matter. Parties desirous of having their numbers for the past year bound, will please send them to us, securely packed, (pre-paid,) with their name and address on the parcel, together with 30 cents in stamps or otherwise, and they will be returned bound.

COE'S

SUPER-PHOSPHATE OF LIME

FOR

OATS, PEAS AND BUCKWHEAT.

Letter from Mr. Charles Benoit, farmer for Messrs. Lowe & Chamberlin at Dunham, C.E.

DECEMBER 30, 1864.

GENTLEMEN,—

The barrel of Super-Phosphate you sent me for the farm in the spring of 1863, was used by way of experiment on various crops. An acre of ground which had been in grass for many years, and nearly run out, was ploughed up that spring, and was sown with buckwheat without manure. I took three pecks of the Phosphate and sowed over one-half of the acre. From the time the buckwheat came up until it was ripe, the difference in appearance was remarkable; the colour was dark green; it grew very thick and about four feet tall; while the other half acre was not half so thick or tall, and was in all respects inferior. At the harvesting it yielded 17½ bushels of grain, the other half 12 bushels, being nearly fifty per cent. in favour of the Phosphate.

In the spring of the present year I sowed oats and peas on the same ground without any manure, and the effect of last year's application of Phosphate was as great upon this year's crop as upon that of last year, the growth being fully double that of the other half acre. The extra fodder will alone pay for the cost of the Phosphate. I have not yet threshed the oats and peas, but I am confident the difference in their yield will be equal to that of the buckwheat last year. So you see that as the extra fodder of this year will pay for the Phosphate, the extra yield of buckwheat, and of the peas and oats, are a clear gain of (I think) four times its cost.

I hope you will send a good supply for the farm for next spring, and I intend to get at least two barrels on my own account.

Your obedient servant,

CHARLES BENOIT.

Messrs. LOWE & CHAMBERLIN, Montreal, Proprietors of the Montreal Gazette.

Sold by J. Fleming & Co., Toronto, C. W., and in all the principal towns throughout Canada.

v23-1t

CAPTAIN BUFORD.

THIS BEAUTIFUL THOROUGH-BRED STALLION

HAS been imported by the undersigned, and will stand for Mares the ensuing season, commencing from the 1st of April until the 1st July, 1865.

PEDIGREE.

CAPTAIN BUFORD by GLENCOR, out of LEOPARDISS by MEDOCK grandam, KITTY FISHER by MAXWELL'S MOSES; also the dam of Adolph, g. grandam by Cook's (afterwards Blackbum's) Whip; g. g. grandam, Harts' Maria by Craig's Alfred; g. g. g. grandam by Taylor's Belair. The Belair Mare, certified by her owner, Thos. D. Owens, Esq., to be Thorough Bred. All this maternal line were distinguished upon the turf, and of thorough-bred horses.

GLENCOR, the sire of CAPTAIN BUFORD, was not only one of the best horses on the English Turf, but has proved equally successful in the Stud. His pedigree can be traced down through all the best blood of England. He was bred by Lord Jersey, in 1831, was by SULTAN out of TRAMPOLIN, by TREMP. Captain Buford is now 10 years old. He has received the First Premium as the best thorough-bred stallion wherever he has been shown. He is a beautiful Chesnut, stands sixteen hands high.

Remarks of FRANK HARPER, of Kentucky, one of the best thorough-bred horsemen in the United States.

"Buford is as well bred as any Horse that ever left Kentucky, and for Northern breeding, I know of none better. He has the advantage of most all thorough-bred horses, in size, style, bone, and speed."

Remarks of H. H. YATES, Esq., of Chicago.

"Buford is a very sure foal getter; his colts are all fine size, and are either bay or the color of Buford. I do not believe there is a horse in the world that can shew as many colts as he can, with such perfect limbs."

TERMS \$25—to be settled in all cases at first service, in cash, or note, due Oct. 1, 1865; also, groom's fee, \$1.00, payable at first service.

JOSEPH GRAND, Proprietor, ROYAL HORSE BAZAAR, Wellington Street, Toronto.

Toronto, JANUARY 30, 1865.

C. H. WATEROUS & CO., Brantford, C. W.

Brantford, January 30, 1865.

\$100 CHALLENGE! Something New!

PATENT

CHAMPION CHOPPING MILL!

WARRANTED TO

HAVE NO EQUAL.

Will Grind 10 Bushels of Meal, or 20 to 30 of Corn and Cob, per hour.

Every farmer and saw-mill proprietor should have one, and millers will find it much cheaper to chop the coarse grains with this mill, than it is to keep mill stones in order for that purpose.

PRICE \$40.

On practical tests, the "Champion Mill" has exceeded all other iron mills for general grinding purposes, both for the farmer and mechanic, for grinding, crushing, and pulverizing purposes, being a powerful, durable, and simple mill, and one not liable to get out of repair, enabling the farmer to do all his meal and feed grinding at home, thereby saving both time and toil in going to mill. The "Corn and Cob Crusher" being separate from the grinding plate is more substantial, durable and effective requiring less power than mills having the crushing teeth cast on the plate. It also operates twice at each revolution of the mill. It is not liable to choke, and runs in either direction, and can be instantly changed from grinding corn meal to cob and corn.

Two horses will furnish sufficient power to drive it.

v23-1t\*

PERUVIAN GOVERNMENT GUANO.

THE undersigned have on hand a few tons of this most valuable Manure.

They can safely challenge any Manure, natural or artificial, to produce the marvellous results which the use of the Guano will positively ensure.

This manure will give life to the most worn out soil, and is peculiarly adapted to the recovery of qualities lost by land which has been subjected to a successive course of exhausting crops.

The following table, made by R. Osborn, Esq., of Henbury, England, shows the relative profit from the application of different proportions of guano:—

Guano per acre.	Grass per acre.	Hay per acre.	Increase per acre.
2 cwt.	Ton. cwt. 7. 10. 00	Ton. cwt. 2. 7. 026	From use of 2 cwt. guano. 18. 0. 02
4 cwt.	10. 1. 1.20	3. 9. 2.18	From use of 4 cwt. guano. 2.0. 1.22
None	4. 12. 3.12	1. 9. 0.24
