## Quality Rather Than Quantity.

President Elliot of Harvard University, says:

"The International is a wonderfully compact storehouse of accurate information."

The International is Scientific and Practical.

It avoids competition as to size of vocabulary, excluding a multitude of words as having no legitimate standing or as mischievous corruptions of "the roll of English undefiled." Its arrangement of etymology and definitions it follows the historical order of derivation; the history of a word being the best guide to its correct use. In indicating pronunciation it uses characters familiar to every reader, not requiring the acquisition of a new and strange alphabet. It avoids such running into one paragraph of different titles as is liable to cause difficulty and delay to the consulter.

It is the School-Teacher of the Republic.

As an authority in the public schools, the position of Webster--both the International and abridgments--is one of unquestioned supremacy. Fresh testimonials to this effect have been received from all State Superintendents of Schools, and the Presidents of Universities and Colleges. The number of schoolbooks based upon Webster; its exclusive choice wherever a state purchase has been made for schools; the presence of a larger or smaller Webster in the common schoolroom--in these respects no other dictionary or series of dictionaries is to be named in comparison.
