

CANADIAN PATENT FOR SALE.

J. R. Duff's Hand Driller

A GREAT BARGAIN. THE MECHANIC'S FRIEND. A GREAT LABOR AND TIME SAVER. 15,000 SOLD ALREADY IN UNITED STATES.

Every erecting engineer should have one in his tool box. Can drill a hole in less time than is required in getting ready to use a ratchet. All the friction to overcome is the work of the drill, as the friction of the drill is reduced to a minimum by ball bearings.

All danger of breaking small drill when the point comes through the piece being drilled is prevented by the screw feed, which is always under perfect control of the operator.

A 1-inch hole can be drilled with the Duff Driller with less effort than a 1-inch hole can be drilled with the best driller.

With the breast driller the operator has to push against the driller in order to make it cut, but with the Duff Driller he does the feeding with the hand screw.

Just the tool for reseating valves without removing them from the pipe.

The Duff Driller can be operated where no other driller can be used.

Just the tool to be operated with a flexible shaft.

Patented December 6th, 1896, No. 513,2.

Desk or Ceiling Fans

The **BEST** ceiling fans on earth, no commutators or brushes, no sparking and dissatisfaction, economical in every sense. Write us for full particulars.

Direct Current Dynamos and Motors, Alternating Current Dynamos, Motors, Transformers & Arc Lamps. Motors for Single, Two & Three Phase Systems.

The Scott & Janney Single Phase Alternating Railway System.

The only system ever invented which has many advantages over both direct current and Polyphase alternating systems. The motors are light, powerful, and are positively load starting, will operate at any speed. Heavier torque than best direct current motors. No commutators. Perfect rotary fields, which do not depend upon frequency at any speed.

The Scott & Janney Electric & Mfg. Co.,

1707 and 1709 FILBERT STREET,

PHILADELPHIA.
