REPORT OF OBSERVATIONS OF INJURIOUS INSECTS AND COMMON FARM PESTS DURING THE YEAR 1895, WITH METHODS OF PREVENTION AND REMEDY. Nineteenth Report, by Eleanor A. Ormerod, F. R. Met. Soc., etc.

This splendid report fully sustains the high standard of excellence which has characterized Miss Ormerod's previous publications. The preface shows that the unusual and prolonged low temperature of the winter of 1894-95 had apparently but little affected the insects which it might be supposed to destroy.

The following pests are treated of in separate chapters: Apple, Smerinthus ocellatus; bean, Bruchus rufimanus and B. fabæ; cabbage. Ceutorhynchus sulcicollis; corn and grass, Charæas graminis, Cetonia aurata, Phyllopertha horticola, Melolontha vulgaris, Rhizotrogus solstitialis, Tipula maculosa and Oscinis frit; gooseberry, Bryobia prætiosa, B. ribis and Nematus ribesii; mangolds, Aphis rumicis, Silpha opaca and Atomaria linearis; orchard caterpillars, Cheimatobia brumata; pine, Astynomus ædilis and Retinia buoliana; plum, Scolytus rugulosus; strawberry, Harpalus ruficornis, Pterostichus madidus and F. vulgaris; turnip, Helophorus rugosus.

The ravages of the bean weevil appear to have been serious, and those of the ground beetles, upon strawberry, have been more extensive than in previous years. Ninety-three pages are occupied with the discussion of the above mentioned insects, while fifty are allotted to "Flies injurious to horses, cattle," etc. These chapters are exceedingly interesting, and several species of Hippoboscidæ, Tabanidæ, and Œstridæ, which are very annoying and injurious to domestic animals, are fully and clearly discussed. In connection with the account of the attacks of the Forest Fly, Hippobosca equina, are given two magnificent plates showing upper and side views of the foot of this fly, the tarsi of which are so modified as to enable it to secure a most firm grip on the hairs of the animal upon which it alights. The report concludes with a chapter on Deer and Dog Ticks, very troublesome mites belonging to the Ixodidæ. W. H. H.
