The United States Senate relations committee have agreed to recommend ratification of a treaty, signed July 20 by the United States and Great Britain, promulgating fishing regulations in Newfoundland waters. The treaty carries out, with some modifications, the rules and methods of procedure recommended by The Hague Tribunal, September 7, 1910.

The governments of Manitoba, Saskatchewan and Alberta have taken action in the matter of obtaining men for

The governments of Manitoba, Saskatchewan and Alberta have taken action in the matter of obtaining men for harvesting and the railroads are attempting to supply the demand, but even this early it is predicted that the labor shortage will be acute. The Deputy Minister of Agriculture for Saskatchewan states that 26,000 men will be needed in that province alone. Altogether it is estimated about 60,000 men can find work in Western Canada this summer.

That this year's crop will be the largest ever grown in Western Canada is the prediction made by farmers from all sections of the prairie provinces, by crop experts, by heads of elevator companies, and the Manitoba department of agriculture. Not only will the total yield be the largest, but, judging by the present conditions, the yield per acre will outstrip all previous years. One of the best known agriculturists of Western Canada states that harvest of various crops will take place during the following periods: Barley, August 1st to August 20th; fall wheat, August 1oth to 25th; spring wheat. August 18th to September 12th; oats, August 25th to September 1oth. This will put all grains in stook by the middle of September, fully three weeks ahead of the ordinary season.
